SPEEDBOARD PRO XL | *Engineered for performance and quality*

SpeedFit announces the second generation of the Speedboard series of non-motorized treadmills, a new generation of treadmill that provides an unparalleled running experience. This is the finest quality, motorless treadmill ever produced. It allows people to walk, jog, run, and sprint without making any adjustments to the treadmill other than shifting the body's center of gravity forward and backwards.

Step onto the Speedboard and the gravity of your own body brings it to life! Begin walking, step up a little further on the curved surface and begin running, step up even further and you can start to sprint, step backward and the Speedboard will stop. The Speedboard's innovative, patented engineering provides a completely natural running experience – it's the only treadmill that gives you the same control as leaving your front door — you dictate your pace not a machine!

The result is much like running outside – and isn't that the point of it all? There's nothing else like it – it's unique, indeed!

The patented **Speedboard Pro XL** is the first manual treadmill that lets you run effortlessly, with better performance and workouts than you would expect from a motorized treadmill or at the track. The curved profile with its soft tread belt matches your stride, reduces joint stress and allows you to naturally adjust your speed from standing still to a full-out sprint, simply by adjusting your position on the tread belt.

Engineered for performance and quality, Speedboard Pro provides the athlete with an unparalleled fitness experience on a machine that will provide years of maintenance-free service. The low-mass, shockabsorbing tread belt system is smooth, quiet, rugged and operates without friction or wear; enjoyable at maximum effortless running experience ever achieved on a non-motorized treadmill. The Speedboard Pro, the finest fitness machine crafted to date, is engineered to provide years of trouble free operation. It incorporates many features to ensure customer satisfaction:
