(U) Introduction

(U) Authority

(U) DCID 6/6 dated 13 July 2001, mandates a classification marking system for the Intelligence Community (IC). This system uses a uniform list of security classification and control markings authorized for all dissemination of classified national intelligence information by components of the IC. This marking system augments and further defines the markings requirements established in Executive Order 12958, as amended, for portion markings and overall classification. This system does not stipulate or modify the classification authority information required by E.O. 12958, as amended.

(U) Purpose

(U) This Authorized Classification and Control Markings Register is maintained by the Controlled Access Program Coordination Office (CAPCO) (hereafter, referred to as the CAPCO Register) of the Director of National Intelligence Special Security Center (DNI SSC) pursuant to DCID 6/11. The CAPCO Register identifies the official classification and control markings, and their authorized abbreviations and portion markings. It provides for the allowable vocabulary for all national intelligence markings and other non-IC markings to control the flow of information. The CAPCO Register provides a list of the human-readable syntax for these markings, regardless of medium (e.g., text, image, graphics, electronic documents including web page, etc.) While not the policy basis for individual agencies' use of any particular marking, the CAPCO Register cites the applicable authority and sponsor for each marking. Some of the Dissemination Controls and Non-Intelligence Community Markings are restricted to use by certain agencies. They are included in the Register to provide guidance on handling documents that bear them. Their inclusion in the Register does not authorize other Agencies to use these markings.

(U) Non-US Classification and Joint Classification Markings are restricted to the respective countries or international organizations.

(U) Certain unpublished controlled access program markings are not included in the CAPCO Register. The unpublished markings are contained in a separate unpublished Register maintained by CAPCO. The CAPCO Register does not include markings that only indicate addressing or routing of information. Contact the CAPCO staff if you have questions regarding these items.

(U) The CAPCO Register is available from the CAPCO home page on Intelink-TS at:

http://capco.dssc.ic.gov/

and from the CAPCO home page on Intelink-S at:

http://capco.dssc.sgov.gov/

(U) The Register has eight general categories of Classification and Control Markings as follows:

1. US Classification Markings
2. Non-US Classification Markings
3. Joint Classification Markings
4. SCI Control System Markings
5. Special Access Program Markings
6. Foreign Government Information Markings
7. Dissemination Control Markings
8. Non-Intelligence Community Dissemination Control Markings

(U) Additional Sections contained in the Register are as follows:

9. Legacy Markings
10. Banner Syntax History
11. Marking Guidance
12. Miscellaneous Banner Line Marking Examples

(U) NOTE: The "Registered International Organizations and Alliances Tetragraphs" section has been removed from the Register due to classified content. These markings have been compiled into a separate classified addendum, called "Annex A – Tetragraph Table."

Marking Title	Authorized Abbrev	Authorized Portion Marking	Policy Basis	Marking Sponsor	Relationship to Other Markings
//JOINT [classification] plus ISO 3166 Trigraphic Country Codes (e.g., "//JOINT SECRET DEU USA " for Joint German and USA SECRET Document)	None	(//JOINT + class. portion marking + Relevant ISO 3166 trigraphic country codes) If the portion's country/ int'l org. list is different from the banner line JOINT marking. (//JOINT + class. portion marking) May be used if the portion's country/ int'l org. list is the same as the banner line JOINT marking.	E.O. 12958, as amended, Sec. 6.1(r)(2)	Respective Countries	May be used with the non-US markings TOP SECRET, SECRET, CONFIDENTIAL, RESTRICTED, or UNCLASSIFIED. (RESTRICTED is the non-US classification for which there is no US equivalent marking and may not be used when USA is one of the co-owners.) The JOINT marking in the banner line indicates co-ownership and implied releasability of the entire document to the co-owners. All JOINT information is withheld from further release until approved for release by the co-owners.

10. (U) Banner Syntax History

(U) The following changes to the banner line syntax have been made since inception of the standard:

(Table is UNCLASSIFIED)

Effective Date	Change Description	Handling Instructions
October 2003	Moved the Special Access Required (SAR) marking from the Non-Intelligence Community Dissemination Control Markings category to a new category called Special Access Program Markings. The new category follows the existing SCI Control Markings category.	Remarking of legacy documents is not required.
July 2005	Changed the separators from commas to a single forward slash for multiple Dissemination Control Markings and the Non-Intelligence Community Dissemination Control Markings categories. For the "REL TO" marking, the lower case "and" was eliminated as the indicator for the end of a country code and/or tetragraph code list.	Remarking of legacy documents is not required.
February 2008	Eliminated the Declassification Value category in the Banner Line per DD, CAPCO memo, dated 22 January 2008. This action: ▪ Made the Manual Review (MR) marking obsolete – MR is no longer a valid marking on classified documents and was never an authorized value for the classification authority block. ▪ Eliminates the need to link a declassification value in the banner line to the "Declassify On" line in the classification authority block as required by ISOO Dir. 1. ▪ Makes proper use of the "Declassify On" line even more critical as this value reflects applicable declassification review and exemption information.	Remarking of legacy documents is not required. Does not eliminate or rescind ISOO's requirement for a "Declassify On" value in the classification authority block on the first page of each classified document, regardless of media. Refer to ISOO DIR.1, ISOO Marking Booklet, October 2007, and ISOO Marking Booklet, May 2005 for handling instructions.

11. (U) Marking Guidance

(U) The first value in the banner line (classification) should be followed by a double forward slash if additional categories are used. US classified documents must always have a classification marking. Non-US or JOINT documents must always have the US classification left blank and the banner line start with a double forward slash followed by the Non-US or JOINT classification marking. In the Marking Title column, items that are indented are subsets of the immediately preceding non-indented items. SCI Control systems and their subsets should be kept together, separated by a hyphen. SCI Control Systems should be separated from each other by a single forward slash. Foreign Government Information markings, if any, should follow, preceded by a double forward slash. Multiple FGI countries should be separated by a single space. Dissemination controls, if any, should follow, preceded by a double forward slash. A single forward slash with no space interjected should be used to separate multiple dissemination controls. Dissemination controls and their subsets should be kept together, separated by a hyphen. The hierarchy for markings must follow the order in which they appear in the above Register. The banner line must always have the classification spelled out, but the caveats may be abbreviated.
