🎉 Congratulations to Katalin Karikó and Drew Weissman on winning the 2023 #NobelPrize in Physiology or Medicine! Their work in #mRNA research has helped pave the way for transformative medicines and bring us closer to conquering some of the most challenging diseases. Thank you for your contributions to mRNA research!

BREAKING NEWS
The Nobel Assembly at Karolinska Institutet has today decided to award the 2023 Nobel Prize in Physiology or Medicine to Katalin Karikó and Drew Weissman for their discoveries concerning nucleoside base modifications that enabled the development of effective mRNA vaccines against COVID-19.

The discoveries by the two Nobel Prize laureates were critical for developing effective mRNA vaccines against COVID-19 during the pandemic that began in early 2020. Through their groundbreaking findings, which have fundamentally changed our understanding of how mRNA interacts with our immune system, the laureates contributed to the unprecedented rate of vaccine development during one of the greatest threats to human health in modern times.

When I took up the job at Moderna more than 2 years back. Being a science student I was curious to find out how this worked, and I was fascinated, blown off my feet, with the simple science behind the technology and immediately accepted the job with #Moderna. I also connected with it personally due to my auto-immune condition, I believe in this kind of ...more

From the theory that was taught to me in the Biotechnology degree (Molecular Biology) to seeing its application in the real world that worked and saved us all. Thank you, Katalin Kariko and Drew Weissman. Also, to #Moderna Moderna for assisting in all sorts and forms.

Three years ago I was telling my wife Dr. Kariko's story, and predicted she was going to save millions of lives and win a Nobel Prize. I am so happy for her and Dr. Weissman.
