Declaration of Miloche Kottman

I, Miloche Kottman, declare as follows:

1. I am the Head of Cataloging & Archival Processing at the University of Kansas Libraries. In my role of Head of Cataloging & Archival Processing, I oversee the cataloging operations. I have served as a staff member of the Department since 1987 and have been head of the Department since 2013. From my work in the Department, I am knowledgeable about the University of Kansas Libraries, and I am also knowledgeable about the practices of the University of Kansas Libraries with respect to cataloging publications, placing publications in circulation, and making publications available for inspection by the public. KU Libraries is located at 1425 Jayhawk Blvd. Lawrence KS 66045. I am over the age of majority and make this declaration of my own personal knowledge.

2. The University of Kansas uses an online system, Voyager from ExLibris (a part of Clarivate), as its online catalog. All items KU Libraries has cataloged/processed since we implemented Voyager in July 1999 automatically has a timestamp associated with it which indicates when the record was added to the catalog. Records in Voyager have three parts: the bib record, holdings record and the item record. The bib record provides a description of the book, e.g. title, author, etc. The holdings record contains the call number and the number of volumes, issues, copies, etc. that we have. The item record contains the barcode number that is assigned to that item. The item record is created with the piece in hand to ensure the barcode is associated with the correct bib record.

3. KU Libraries catalog system indicates that the following item is maintained in the Library's collection: Book title: RF microelectronics / Behzad Razavi; Date: ©1998. KU's call number: TK6560 .R39 1998.

4. This title was cataloged prior to our transition to Voyager in 1999. The record creation date from our old system was retained in an 039 field. The date in our record indicates that the bibliographic record was created January 4, 1998. The book was shelved and available to the public within 2 weeks of the bibliographic record creation date. In addition, the timestamp on the item record in Voyager, which indicates when it was created, was retained from our old system. The record creation timestamp on the item record indicates that the record was added to our circulation system on January 6, 1998.

5. I declare under penalty of perjury under the laws of the United States of America that this declaration is true, complete, and accurate to the best of my knowledge. I further

acknowledge that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. § 1001).

Executed at Lawrence, Kansas, on June 8, 2023.

Miloche Kottman
