System Components

The Lite-On 19-inch Rack is a central building block for your data center. The table below provides additional information on the different options available to create a customized solution. Please contact your local Lite-On CIPS representative for support.

Component	Description
Front/rear doors	Contoured high-density perforated door exceeds major IT equipment air flow requirements. Quick release, field-reversible doors are easily removed.
Side panels	Split-level side panels provide convenient access to installed equipment. Also, can be used as end-of-row airflow containment panels.

Component	Description
IT support brackets	Design to support IEC-60297-2 type B equipment. Several options are available based on equipment weight and height.
Cable management	Several cable management panels/organizers are available to manage the rack cables.
Baying kit	Connects racks together to provide more stability.
Lift eye bolts	Provides the capability to lift the whole rack if needed.
