AFFIDAVIT OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.

4. The archived data made viewable and browsable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.

5. The Internet Archive assigns a URL on its site to the archived files in the format http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL] aka an "extended URL". Thus, the extended URL http://web.archive.org/web/19970126045828/http://www.archive.org/ would be the URL for the record of the Internet Archive home page HTML file (http://www.archive.org/) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.

6. Attached hereto as Exhibit A are true and accurate copies of browser screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

Petitioner Dr. Squatch
Ex. 1017

INTERNET ARCHIVE
archive.org

7. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

July 13, 2016 By Rebecca D. Dillon 7 Comments

This natural neem oil deodorant recipe is a no baking soda deodorant that won't irritate skin. Learn how to make your own plus choose from two printable deodorant labels for your own no baking soda neem oil deodorant. It really works!

This natural neem oil deodorant recipe is a no baking soda deodorant that won't irritate skin. Learn how to make your own plus choose from two awesome printable deodorant labels for your own no baking soda neem oil deodorant. Choose from a Star Wars inspired deodorant label for a Wook Control Stick – a spin on my natural deodorant spray recipe for wookiees – or a basic Natural Neem Oil Deodorant label.

Does it work?

Yes! I tested my neem oil deodorant recipe on myself on some pretty hot days over two and a half weeks. And I'm still using it daily!

Can anyone wear it?

Absolutely! The essential oils used help to fight odor causing bacteria. While they do lend the deodorant a light scent, it's pretty unisex and not at all overpowering. Plus, the absence of baking soda means no itchy, red pits in a week or so for those of us with sensitive skin. And, it's vegan.

Does it smell like neem oil?

Nope. I'll be one of the first to admit that neem oil can smell pretty awful solo. But you can't detect any trace of the neem's natural scent in my neem oil deodorant recipe. Like the essential oils used for this deodorant recipe, neem oil is also fantastic at fighting odor causing bacteria as it's naturally anti-bacterial.

Natural Neem Oil Deodorant Recipe

© Rebecca's Soap Delicatessen

Ingredients:

1.5 oz. arrowroot powder
.5 oz. magnesium hydroxide
1 oz. mango butter
.2 oz. fractionated coconut oil
.2 oz. neem oil
.15 oz. emulsifying wax
.05 oz. stearic acid
.05 oz. pink Himalayan salt, fine ground
1 mL lavender essential oil
1.5 mL patchouli essential oil
1 mL tea tree essential oil
.5 mL rosemary essential oil

Instructions:

Begin by using a digital scale to weigh out mango butter, emulsifying wax and stearic acid. Combine in a glass Pyrex measuring cup and heat at 50% power in the microwave until fully melted. (Alternately you may use a double boiler.)

Remove from microwave (or heat source) and weigh out the fractionated coconut oil and neem oil into the melted butter, wax and stearic acid. Stir to combine.

Use graduated plastic transfer pipettes to measure out each of the essential oils. Use a new pipette for each essential oil to avoid cross contamination. Stir into the now liquid deodorant base. Set aside.

In a separate glass Pyrex measuring cup, weigh out the salt, arrowroot powder and magnesium hydroxide. Mix well to combine.

Now slowly pour the dry ingredients into the wet ingredients whisking as you go

Now slowly pour the dry ingredients into the wet ingredients whisking as you go until the wet and dry ingredients are thoroughly combined.

Pour the deodorant into a 2.65 oz. deodorant tube with cap. I used the silver deodorant tubes with a domed cap from SKS Bottle & Packaging. Alternately you could also use their white styrene twist up deodorant tubes that I used for my cracked heel repair balm recipe found here. (My neem oil deodorant recipe makes one 2.65 oz. deodorant.)

Due to the heat sensitive nature of this product you'll need to wait at least 48 hours before your deodorant is ready for use. Otherwise it will not be fully set up and will be soft and/or melt easily. Even if you place your deodorant in the refrigerator, it will still be at least two full days before it reaches final consistency. (You'll find it softens back up after removing from the refrigerator before it solidifies to its final consistency.)

If you are simply allowing your deodorant to solidify at room temperature, allow at least three days for it to reach its final consistency. This is especially important in summer.

Once your deodorant has set up, it's ready to be labeled!

This natural neem oil deodorant recipe is a no baking soda deodorant that won't irritate skin. Choose from a Star Wars inspired deodorant label for a Wook Control Stick or a basic Natural Neem Oil Deodorant label.

Click here to download my printable Wook Control Stick Labels. Print onto a full sheet white label. Cut out with scissors and apply to your container as desired.

This natural neem oil deodorant recipe is a no baking soda deodorant that won't irritate skin. Learn how to make your own plus choose from two awesome printable deodorant labels for your own no baking soda neem oil deodorant. Choose from a Star Wars inspired deodorant label for a Wook Control Stick or a basic Natural Neem Oil Deodorant label.

Or click here to download my Natural Neem Oil Deodorant labels. Print onto a full sheet white label or, as I have done, print onto a full sheet clear gloss or clear matte label. (I got my labels in bulk for a great price at WorldLabel.) Cut out the labels with scissors, remove the backing and apply to your container(s) as desired.

Your natural neem oil deodorant is now ready for use! Simply apply to underarms as needed to fight odor every day.

Prefer a jar deodorant over a stick deodorant? Use .1 oz. of emulsifying wax instead of .15 oz. and omit the stearic acid entirely.

If you like this neem oil deodorant recipe then you may also like my natural lavender and patchouli deodorant recipe. While this deodorant recipe does contain baking soda, you can simply substitute the baking soda with magnesium hydroxide. You can find that recipe here. For more of my skin care recipes that contain neem oil go here. For more Star Wars inspired projects go here.

No time to make your own natural deodorant? Check out All Good deodorants. All Good deodorants don't contain baking soda. Instead they use arrowroot powder as an ingredient to help absorb moisture and dry underarms. These deodorants also contain naturally-occurring enzymes and essential oils to provide long lasting protection, while aloe vera and certified organic calendula are gentle on sensitive skin. Alternately, you may also be interested in Handcrafted Honeybee's Natural Unscented & Baking Soda Free Probiotic Deodorant.

I love your recipes. And the information you provide for the ingredients. Now I know what to do for that neem oil smell. Thank you so much.

You're welcome. Typically a small amount of eo's will easily cover the smell of neem. Lemongrass is a good one for covering the scent of neem as well!

can you use regular coconut oil instead of fractionated

Reply

Rebecca D. Dillon says:
July 14, 2016 at 6:40 pm

No, you'll need to use the fractionated coconut oil which is liquid at room temp.

Is there a sub for the magnesium hydroxide?

Reply

Rebecca D. Dillon says:
July 16, 2016 at 9:13 am

You could try using zinc oxide however it will make your pits white. (I've not tried zinc oxide only read about it so I can't vouch for how well it does or doesn't work.) The magnesium hydroxide is the sub for baking soda that makes this deodorant work. Without it you won't have a very effective deodorant.
