U.S. Patent No. 9,808,036 (Independent Claim 1)	**Infringing Tracksmith Product** (Allston Bra)
[1pre] A pocket bra comprising:	The Allston Bra has a "secret stash" between the bra's lining.[1]
[1(a)] a strap assembly comprising a chest strap;	The Allston Bra has a chest strap:
[1(b)] and comprising left and right cups, each cup being an area to receive a breast of a wearer and having inside and outside surfaces, the strap assembly being attached to the cups whereby the strap assembly connects the cups to the wearer, each cup having upper, lower, interior body facing, and opposite exterior edges;	The Alston Bra has an area for receiving each a left and right breast of the wearer with inside and outside surfaces: The Alston has a strap assembly attached to the cups connecting the cups to the wearer:

[1] https://www.tracksmith.com/products/w-allston-pocket-bra?sku=WT66301LAK

	 Each area for receiving a breast on the Alston has an upper, lower, interior, and exterior-facing edge or the equivalent of each of those features:  Alston directly infringes claim element 1(b) literally or by the doctrine of equivalents.
[1(c)] a patch forming a pocket operatively associated with at least one of the left and right cups, the patch having an upper edge, a lower interior body facing edge, and an opposite lower exterior edge, the patch having inside and outside surfaces;	Allston has an inner-layer patch across the front forming a pocket associated with one or more cups:

[1(d)] stitching coupling the lower interior body facing edge, and the opposite lower exterior edge of the patch to at least one of the lower, interior body facing, and opposite exterior edges of the at least one of the left and right cups, or the chest strap;	Allston's pocket is attached with stitching:
[1(e)] an opening formed along the upper edge of the patch;	Allston's pocket has an opening along the upper edge of the patch:
[1(f)] the opening capable of repeated receiving and removal of an item when being worn by the wearer; and	Allston's patch opening is capable of repeatedly receipt and removal of items (e.g., a car key) when being worn:

[1(g)] wherein the upper edge of the patch crosses over a surface of the cup to form the opening, the upper edge of the patch being offset from an upper edge of the cup	Allston's upper-edge patch opening is offset below the upper edge of the cup, crossing over a surface of the cup.

U.S. Patent No. 9,808,036 (Dependent Claim 3)	**Infringing Tracksmith Product** (Allston Bra)
[3] A bra pocket system comprising the pocket bra of claim 1 and further comprising a non-padding item removably positioned within the pocket of at least one of the left and right cups.	Tracksmith's marketing materials demonstrate the Allston with a non-padding item removably inserted into the front pocket:

U.S. Patent No. 9,808,036 (Independent Claim 6)	**Infringing Tracksmith Product** (Allston Bra)
[6 pre] A pocket bra comprising:	The Allston Bra has a "secret stash" between the bra's lining.[2]
[6(a)] a strap assembly comprising a chest strap;	The Allston Bra has a chest strap:

[2] See Note 1.

[6(b)] and comprising left and right cups, each cup being an area to receive a breast of a wearer and having inside and outside surfaces, the strap assembly being attached to the cups whereby the strap assembly connects the cups to the wearer, each cup having upper, lower, interior body facing, and opposite exterior edges;	The Alston Bra has an area for receiving each a left and right breast of the wearer with inside and outside surfaces: The Alston has a strap assembly attached to the cups connecting the cups to the wearer: Each area for receiving a breast on the Alston has an upper, lower, interior, and exterior-facing edge or the equivalent of each of those features:  Alston directly infringes claim element 1(b) literally or by the doctrine of equivalents.

[6(c)] a patch forming a pocket operatively associated with one at least of the left and right cups, the patch having an upper edge, a lower interior body facing edge, and an opposite lower exterior edge, the patch having inside and outside surfaces;	Allston has an inner-layer patch across the front forming a pocket associated with one or more cups:
[6(d)] stitching coupling the lower interior body facing edge, and the opposite lower exterior edge of the patch to the lower, interior body facing, and opposite exterior edges of the at least one of the left and right cups;	Allston's pocket is attached with stitching:
[6(e)] an opening formed along the upper edge of the patch;	Allston's pocket has an opening along the upper edge of the patch:

[6(f)] the opening capable of repeated receiving and removal of an item when being worn by the wearer; and	Allston's patch opening is capable of repeatedly receipt and removal of items (e.g., a car key) when being worn:
[6(g)] wherein the upper edge of the patch crosses over a surface of the cup to form the opening, the upper edge crossing in such that the opening faces the interior body facing edge of the one of the left and right cup to which it is attached, the upper edge of the patch being offset from an upper edge of the cup.	Allston's upper-edge patch opening is offset below the upper edge of the cup, crossing over a surface of the cup. The opening faces the interior.

U.S. Patent No. 9,808,036 (Dependent Claim 8)	**Infringing Tracksmith Product** (Allston Bra)
[8] A bra pocket system comprising the pocket bra of claim 6 and further comprising a non-padding item removably positioned within the pocket of at least one of the left and right cups.
