Collapse H series: Audiovisual and multimedia systems — H series: Audiovisual and multimedia systems

- Collapse H.100-H.199 : Characteristics of visual telephone systems — H.100-H.199 : Characteristics of visual telephone systems
  - H.100: Visual telephone systems
  - H.110: Hypothetical reference connections for videoconferencing using primary digital group transmission
  - H.120: Codecs for videoconferencing using primary digital group transmission
  - H.130: Frame structures for use in the international interconnection of digital codecs for videoconferencing or visual telephony
  - H.140: A multipoint international videoconference system
- Collapse H.200-H.499 : Infrastructure of audiovisual services — H.200-H.499 : Infrastructure of audiovisual services
  - Expand H.200-H.219 : General — H.200-H.219 : General
  - Expand H.220-H.229 : Transmission multiplexing and synchronization — H.220-H.229 : Transmission multiplexing and synchronization
  - Expand H.230-H.239 : Systems aspects — H.230-H.239 : Systems aspects
  - Expand H.240-H.259 : Communication procedures — H.240-H.259 : Communication procedures
  - Expand H.260-H.279 : Coding of moving video — H.260-H.279 : Coding of moving video
  - Expand H.280-H.299 : Related systems aspects — H.280-H.299 : Related systems aspects
  - Expand H.300-H.349 : Systems and terminal equipment for audiovisual services — H.300-H.349 : Systems and terminal equipment for audiovisual services
  - Expand H.350-H.359 : Directory services architecture for audiovisual and multimedia services — H.350-H.359 : Directory services architecture for audiovisual and multimedia services
  - Expand H.360-H.369 : Quality of service architecture for audiovisual and multimedia services — H.360-H.369 : Quality of service architecture for audiovisual and multimedia services
  - Expand H.450-H.499 : Supplementary services for multimedia — H.450-H.499 : Supplementary services for multimedia
- Collapse H.500-H.599 : Mobility and Collaboration procedures — H.500-H.599 : Mobility and Collaboration procedures
  - Expand H.500-H.509 : Overview of Mobility and Collaboration, definitions, protocols and procedures — H.500-H.509 : Overview of Mobility and Collaboration, definitions, protocols and procedures
  - Expand H.510-H.519 : Mobility for H-Series multimedia systems and services — H.510-H.519 : Mobility for H-Series multimedia systems and services
  - Expand H.520-H.529 : Mobile multimedia collaboration applications and services — H.520-H.529 : Mobile multimedia collaboration applications and services
  - Expand H.530-H.539 : Security for mobile multimedia systems and services — H.530-H.539 : Security for mobile multimedia systems and services
  - Expand H.540-H.549 : Security for mobile multimedia collaboration applications and services — H.540-H.549 : Security for mobile multimedia collaboration applications and services
  - Expand H.550-H.559 : Mobility interworking procedures — H.550-H.559 : Mobility interworking procedures
  - Expand H.560-H.569 : Mobile multimedia collaboration inter-working procedures — H.560-H.569 : Mobile multimedia collaboration inter-working procedures

INTEL-1088
9,641,841

- Collapse H.600-H.699 : Broadband, triple-play and advanced multimedia services — H.600-H.699 : Broadband, triple-play and advanced multimedia services
  - Expand H.610-H.619 : Broadband multimedia services over VDSL — H.610-H.619 : Broadband multimedia services over VDSL
  - Expand H.620-H.629 : Advanced multimedia services and applications — H.620-H.629 : Advanced multimedia services and applications
- Collapse H.700-H.799 : IPTV multimedia services and applications for IPTV — H.700-H.799 : IPTV multimedia services and applications for IPTV
  - Expand H.700-H.719 : General aspects — H.700-H.719 : General aspects
  - Expand H.720-H.729 : IPTV terminal devices — H.720-H.729 : IPTV terminal devices
  - Expand H.730-H.739 : IPTV middleware — H.730-H.739 : IPTV middleware
  - Expand H.740-H.749 : IPTV application event handling — H.740-H.749 : IPTV application event handling
  - Expand H.750-H.759 : IPTV metadata — H.750-H.759 : IPTV metadata
  - Expand H.760-H.769 : IPTV multimedia application frameworks — H.760-H.769 : IPTV multimedia application frameworks
  - Expand H.770-H.779 : IPTV service discovery up to consumption — H.770-H.779 : IPTV service discovery up to consumption
- Collapse H supplements : Supplements to the Series H Recommendations — H supplements : Supplements to the Series H Recommendations
  - H Suppl. 1: Application profile – Sign language and lip-reading real-time conversation using low bit rate video communication
  - H Suppl. 2: ITU-T H.248.x sub-series packages guide – Release 13
  - H Suppl. 3: Operator requirements for full-service VDSL in ITU-T Recommendations H.610 and H.611
  - H Suppl. 4: Repository of generic parameters for ITU-T Recommendations H.460.x sub-series
  - H Suppl. 5: Gateway control protocol: Guidelines for resource management of 'IP Address & Port' resources for H.248 RTP terminations
  - H Suppl. 6: Control load quantum for decomposed gateways
  - H Suppl. 7: Gateway control protocol: Establishment procedures for the H.248 MGC-MG control association
  - H Suppl. 8: Gateway control protocol: Guidelines for synchronized time in ITU-T H.248 domains
  - H Suppl. 9: Gateway control protocol: Operation of H.248 with H.225.0, SIP, and ISUP in support of emergency telecommunications service (ETS)/international emergency preference scheme (IEPS)
  - H Suppl. 10: Proxy-aided NAT/FW traversal scheme for ITU-T H. 323 multimedia systems
  - H Suppl. 11: Analysis of class-based home network QoS solutions
