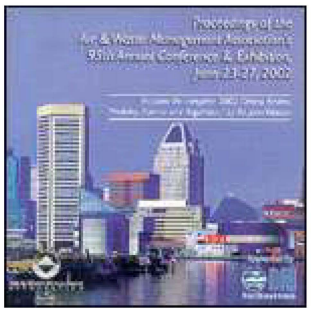
A&WMA; 2002 Annual Conference Proceedings CD-ROM

Author(s): Various



This comprehensive compact disc features the latest in environmental research from every peer-reviewed paper presented at the June 2002 A&WMA; annual conference and exhibition in Baltimore, Maryland, including the complete 2002 Critical Review, "Visibility: Science and Regulation," by Dr. John Watson. Using the highly flexible Adobe Acrobat portable document format, the CD is easy to navigate and fully searchable by title, author, subject, and keyword text strings. It is also accessible to PC, Mac, and Unix users.

Air Pollution Engineering Manual, second edition

Completely revised and updated to reflect the latest on emission factors and control measures for reducing air pollutants. The first revision of this seminal 1992 volume features new chapters and sections on such topics as fugitive dust emissions, semiconductor manufacturing, and accidental and catastrophic releases.

The complete collection of publications offered for sale through the association can be ordered at this website. Orders may also be placed by calling 1-800-275-5851 (outside U.S. or Canada, ++1-412-741-1288). A pdf order form is available for mailing or faxing. Click here for more info on offline ordering.
