Find your way in the Symbian community with Symbian Pages

Symbian Pages is the comprehensive online directory for everyone in the Symbian community, from developers to Symbian OS phone users. Use Symbian Pages to find organizations, services, publications, hardware, accessories or software related to Symbian OS and Symbian OS phones.

Community

Year of the smartphone arrives with Nokia 7650

Nokia 7650

The Nokia 7650 is encouraging developers to take advantage of the advanced imaging functionality, multimedia messaging and rich connectivity made possible by Symbian OS.

Developers rally around the Nokia 9200

The Nokia 9200 Communicator series is attracting a large community of Symbian OS developers.

Developer

Symbian OS open to US developers

If you are developing for Symbian OS phones in the USA, read these papers from Symbian DevNet, including Symbian OS for Palm developers, an introduction to C++ for the Nokia 9290 and Java on the Nokia 9290.

Join the Nokia Mobile Challenge

screenshot of the Nokia 7650

Enter Nokia's series of application developer contests. A MIDP Java contest is already open and a Symbian OS applications contest began on December 10, 2001.

Events

Developer Expo 2002

See the advanced products and services to drive wireless in 2002.

Technology

Why Symbian OS?

Symbian OS is designed to meet a variety of demands imposed by the evolving wireless market.

Creating the mass-market

This paper explains the need for an advanced operating system that supports data-enabled phones.

Supporting packet-switched

Symbian OS plays a key role in driving new revenue streams in packet-switched wireless networks.

Symbian OS v6.x overview

This white paper gives a detailed overview of the features available in Symbian OS Version 6.x.

Symbian OS phones

Symbian OS phones

The Ericsson R380 and the Nokia 9210 show the diversity of phones that can be created with Symbian OS.
