Systems and methods for preventing data loss
Multi-cluster database management system
System and method for backing up highly available source databases in a hyperconverged system
Multi-cluster database management services
Display screen or portion thereof with a user interface for database time-machine

Bakul Banthia

Co-Founder | Data & AI
San Francisco Bay Area

Summary

More than a decade of experience in the lifecycle management of business-critical applications and cloud services.

Are you skilled in Java?
Or proficient in ReactJS?
Or an expert in Python?
Or a master at database management?
Come join us on a journey of a lifetime.

Experience

Tessell

Co-Founder
March 2021 - Present (4 years 4 months)
San Francisco Bay Area

Tessell is reimagining the way you manage data in the cloud. Tessell provides a highly differentiated, fully-managed database service for your choice of database engine on your choice of cloud.
Key features of Tessell include:
1. 10X IOPS at fractional & fixed cost: Eliminate IOPS meter by turning cloud-native high-performance i4i, i3en, and Lsv3 compute into durable, zero data loss infrastructure.
2. Enterprise-grade data protection: Multi-AZ HA. Cross-region DR. High fidelity BCP. Tessell can provide HA/DR using database-native replication.
3. Unified data management: Database-native backups to achieve compliance and avoid infrastructure lock-in. Policy-driven secure data sharing for UAT, QA, and Dev environments.
4. Choice of deployment: a) Hosted and managed by Tessell; b) Hosted at the customer, managed by Tessell.
