DECLARATION OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.

4. The archived data made viewable and browseable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.

5. The Internet Archive assigns a URL on its site to the archived files in the format http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL] aka an "extended URL". Thus, the extended URL http://web.archive.org/web/19970126045828/http://www.archive.org/ would be the URL for the record of the Internet Archive home page HTML file (http://www.archive.org/) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.

6. Attached hereto as Exhibit A are true and accurate copies of screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

7. I declare under penalty of perjury that the foregoing is true and correct.

DATE: July 12, 2023

Fourteen-layer high barrier
PE/TIE/PA/EVOH/PA/TIE/PE x2
PP/TIE/PA/EVOH/PA/TIE/PE x2

3 Layer PA TIE SEAL

5 Layer PA TIE PA TIE SEAL

7 Layer PA EVOH PA TIE SEAL

8 Layer MDPE or PP TIE PA EVOH PA TIE SEAL

10 Layer BOPP MDPE TIE PA EVOH PA TIE SEAL

Technic.Converting

Our product range is completed by offering the service of an in house converting deparment. On a specially equipped machinery we produce a wide variety of pouches including tubular pouches, three side welded bags, chamberbags, gusseted bags and inliners. Also bags with euro and punch holes are available upon request.

Technic.Printing department

Our films are also available with printing. We offer up to 10-color flexographic and gravure printing

Technic.Lamination departrment

All films can be further laminated to various base materials such as OPET, OPA, OPP, CPA, CPP, Aluminium and others

Technik.Konfektion

Durch unsere Abteilung Konfektion runden wir unsere Produktpalette ab. Auf mehreren Konfektionsmaschinen werden Schlauchbeutel, Siegelrandbeutel, Kammerbeutel, Seitenfaltenbeutel und Grosssäcke produziert. Dies auf Wunsch auch mit Rund- oder Eurolochausstattung.

Technik.Druckerei

Unsere Folien sind auch in bedruckter Form lieferbar. Wir bieten Flexodruck und Tiefdruck bis zu
10 Farben an.

Technik.Kaschierung

Sämtliche Folien können durch Kaschierung gegen diverse Trägermaterialien wie OPET, OPA, OPP, CPA, CPP, Aluminium, u.a., weiter veredelt werden.
