
Robotic & AI solutions for smarter, more productive operations

Automated inventory management

Accurately monitoring inventory is difficult and labor-intensive. Our robots, AI, and computer vision automate warehouses to optimizing stock tracking with robots and AI, driving efficiency, improving the bottom line, and enhancing customer satisfaction.

Discover smarter inventory tracking

Automated floor care

Keeping businesses clean and safe with maintaining consistent, high-quality floor care. Our robots, AI, and computer vision automates floor care tasks, empowering facilities to boost productivity and improve cleanliness.

Remote site management

In person visits by managers and corporate teams incur high costs and disrupt operations. Our robots, AI, and computer vision site visits with robot-enabled 360° views, empowering individuals to see their sites, engage in communication with their teams and maintain thorough oversight of daily operations.

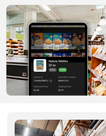
Industries we serve

Retail

Enhance operational efficiency with automated inventory tracking, ensure floor care, and streamline site management, tailored for the unique demands of retail.

Explore retail



Education

Create a safe and inspiring environment with automated floor care, ensuring more resources towards creating enriching educational experiences.

Explore education

Warehouses

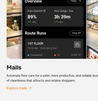
Streamline inventory with automated inventory tracking and floor care, creating a workspace that bolsters productivity.

Explore warehouses

Airports

Ensure a clean airport environment with automated floor care, allowing more resources for passenger service and facility management.

Explore airports



Malls

Automate floor care for a safer, more productive, and reliable level of cleanliness that attracts and retains shoppers.

Explore malls

Healthcare

Maintain pristine healthcare facilities with automated floor care, creating a safer environment while redirecting resources towards patient services.

Explore healthcare

Hospitality

Enhance guest satisfaction with automated floor care, ensuring pristine hospitality spaces while freeing up resources for superior guest services.

Explore hospitality

A word from our customers

been self-enhance cleaning) calculate time back to businesses time doing what is most important. Our robots and technology are up to improve in store experiences & ROI values.

Kathryn Mclay
Former President & CEO at Sam's Club, and now CEO of Walmart International

Speaking at Retail 2023 Global Consumer, Technology, & Services Conference

"I think that we're one of the first retailers in the world that actually gets a daily snapshot of exactly what our items are in what locations in the Club, whether it's on the floor or in back. We've been using that to a remarkable degree. We have, 25% of inventory data — and, in the very near future, 75% of inventory data."

sam's club

Todd Garner
Vice President of In-Club Product Management at Sam's Club

"Sam's Club is hyper focused on have a seamless shopping experience and we've been piloting inventory. Scan in our current 5. we obtain critical inventory data. Associates can use this data to proactively manage our clubs in inventory. Scan success items at the shelf, and free up associates focus on members and the shop deserve.
