Tesla Secures 1st Place on Cars.com 2025 American-Made Index

June 17, 2025

At Tesla, we are building the most American-made vehicles on the road. Our commitment to domestic manufacturing and supply chains has led to the creation of vehicles that deliver value for money.

This is the 4th year in the row that we secured 1st place on the American-Made Index, with Model Y claiming 1st place for the prior 2 consecutive years and Model 3 placing 1st in 2021.

Cars.com analyzes more than 400 model-year 2025 vehicles to arrive at the 99 vehicles that are included on the 2025 American-Made Index. The 99 ranked vehicles are judged through five factors:

- Location of final assembly

- Percentage of US and Canadian parts
- Country of origin for available engines
- Country of origin for available transmissions
- US manufacturing employees relative to the automaker's footprint
