# Performance of the Petitioners and Patent Owners.

This section provides a comprehensive examination of both petitioners and patent owners involved in the 6,573 IPR and 267 PGR proceedings filed between July 1, 2020, and June 30, 2025. Our analysis evaluates activity levels, success rates, and overall performance in order to highlight the Most Active and Best-Performing parties on each side of these proceedings. A full list of the 1,000 Most Active parties is available in **Appendix B**, included in the accompanying Excel spreadsheet.

To ensure accuracy, we have carefully attributed cases to the correct parent companies, as it is common for participants, especially on the patent owner side, to operate through multiple legal entities for strategic purposes. Large corporations that primarily engage in IPR and PGR as a defensive strategy often structure their operations through subsidiaries or acquisitions. Companies such as Sony and AT&T exemplify this trend, with multiple affiliates involved across different proceedings.

By consolidating these entities under their parent organizations, this study offers a more reliable view of the true scale of participation at the corporate level. In the subsections that follow, we break down activity and performance for petitioners and patent owners separately, providing insight into the leading players, their strategies, and their influence on the overall landscape of PTAB litigation.

## Most Active Companies in PTAB

On average, petitioners and patent owners have participated in 5.7 and 4.6 PTAB proceedings, respectively. However, this distribution is far from uniform. A relatively small group of companies accounts for a disproportionately large share of all challenges filed. To highlight these players, **Tables 3.1** through **3.3** present the 100 most active petitioners, patent owners, and combined overall. For a more complete view, the top 1,000 most active companies are detailed in **Appendix B** of the accompanying Excel file.

Intellectual Ventures Management, LLC, with 67 proceedings, ranks as the most active patent owner, followed closely by Jawbone Innovations LLC with 70 proceedings and Ericsson with 72. Together, the top 10 patent owners have been involved in 509 proceedings, representing more than 7% of all PTAB cases.

On the petitioner side, Samsung leads by a wide margin with 614 proceedings, followed by Apple with 397 and Alphabet Inc. with 293. Collectively, the top 10 petition-

Copyright © 2025 Patexia Inc. All Rights Reserved

ers account for 1,398 IPR and PGR filings, or roughly 28.3% of all challenges during the study period.

It is worth noting that activity rankings are not determined solely by the number of proceedings. Recency of cases is also factored in, with more recent filings carrying greater weight. As a result, two companies with the same number of proceedings may appear at different ranks, with priority given to the one with more recent activity. Further details on the methodology are provided in Section 6.

**Did you know in the last five years:**
Samsung has been the most active petitioner in PTAB with 614 proceedings.
Intellectual Ventures Management, LLC, with 67 proceedings, is the most active patent owner.
The 10 most active petitioners have filed 28.3% of all proceedings.

**Tables 3.1**, **3.2**, and **3.3** summarize the 100 most active patent owners, petitioners, and overall, respectively.

## Table 3.1 - The 100 Most Active Patent Owners

| PO Activity Rank | Company | Patent Owner Cases |
|---|---|---|
| 1 | Intellectual Ventures Management, LLC | 67 |
| 2 | Jawbone Innovations LLC | 70 |
| 3 | Ericsson | 72 |
