AFFIDAVIT OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.

4. The archived data made viewable and browsable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.

5. The Internet Archive assigns a URL on its site to the archived files in the format http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL] aka an "extended URL". Thus, the extended URL http://web.archive.org/web/19970126045828/http://www.archive.org/ would be the URL for the record of the Internet Archive home page HTML file (http://www.archive.org/) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.

6. Attached hereto as Exhibit A are true and accurate copies of browser screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

INTERNET ARCHIVE
archive.org

7. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Natural Handmade Lavender & Patchouli Deodorant Recipe with Printable Labels

March 23, 2013 By soapdelinews 3 Comments

Want to make your own homemade natural deodorant for you and your family? Here's a simple all natural, vegan deodorant recipe that actually works. Plus, I've included a free download for printable deodorant labels you can print and customize.

My Natural Handmade Lavender Patchouli Deodorant is made with aluminum free baking soda and certified organic arrowroot powder to help keep you dry while a combination of certified organic lavender essential oil, certified organic tea tree oil and patchouli essential help to combat odor causing bacteria. Ingredients like cocoa butter, shea butter, fractionated coconut oil, jojoba oil and rich vitamin E oil help keep skin feeling smooth and conditioned without feeling greasy. This natural homemade deodorant has a light natural fragrance that is pleasant, not overbearing.

Natural Lavender & Patchouli Deodorant Recipe

Recipe Yields: 5 – deodorant tubes containing 3.4oz/96g net weight each
© Rebecca's Soap Delicatessen (Printable PDF recipe and labels.)

Supplies:
Digital Kitchen Scale
glass bowl or large glass measuring cup
double boiler or microwave
plastic spoon
spatula
Graduated 3ml Plastic Transfer Pipettes
permanent markers
sticker label sheet
5 – 2.25oz. deodorant containers

Ingredients:
8 oz. aluminum free baking soda
4 oz. arrowroot powder
3 oz. cocoa butter
2 oz. fractionated coconut oil
.5oz. jojoba oil
.25 oz. shea butter
1/4 tsp. carnauba wax
2 ml lavender essential oil
1.5 ml patchouli essential oil
1 ml vitamin E oil
10 drops tea tree oil

Directions: Weigh out the cocoa butter and place into a double boiler or glass container. Measure out 1/4 teaspoon of carnauba wax and add to the cocoa butter. Heat in double boiler or microwave until melted.

Now weigh out the shea butter and stir into the melted cocoa butter and wax until it melt completely.

Next, weigh out the fractionated coconut oil and jojoba oil and stir into the the melted butters and wax.

After that you can go ahead and add the dry ingredients by weighing out the baking soda and arrowroot powder and stirring into the liquified mixture. Mix well.

Using a pipette, you will measure out the lavender, patchouli and vitamin E, using a different pipette for each oil, and then stir into the liquid deodorant mixture.

Finally, using a pipette to contain the oil, add 10 drops of tea tree oil and mix well.

You can now slowly pour the deodorant into five 2.25oz. white lotion bar tubes or empty deodorant containers. Use the spatula to help get all of the deodorant into the containers if needed. Each container should hold a net weight of 3.4oz. of this product.

Allow your deodorants to cool completely, then cap and label.

To label, simply download and print out the natural deodorant labels onto blank sticker paper. You can customize the look of your labels by using permanent markers to color in the images. I used a combination of BIC Mark-It Colored Permanent Markersin Polynesian Purple, Petal Pink and Cloud Nine Gray to "color" in the lavender flowers by simply dotting the colors in at random locations within the flower bunch.. I then used Pink Flamingo to color the ribbon on the "natural" label and the bow around the flowers. For the stems I used Lime Sorbet. Add more or less color to your liking or simply leave the labels a simple black and white. Now, using sharp scissors, simply cut out the labels and adhere to your deodorant containers.

Like the font I used for my labels? I created this font using my own handwriting! You too can create your own custom fonts easily and quickly. Simply visit the website: http://www.myscriptfont.com and download and print the template provide. Fill in the alphabet with the corresponding squares, then scan into your computer and upload the file to MyScriptFont. Name the font, select the format you'd like to use and send the file. You can then save the font to your computer and install to your font program. Since I'm on a mac, my fonts are installed into My Font Book. (It should automatically prompt you once downloaded and opened.)

Don't have time to make this product? You can buy it for a limited time online from Rebecca's Soap Delicatessen. Also be sure to check out my all natural, handmade cream eye shadow recipe for an alternative to chemical laden cosmetics. Thanks for the recipe, Rebecca! I keep collecting natural recipes – it's time to start turning them into actual products. Your blog is such an inspiration.

Oh thank you for the link to the font website too.
