CopperJet™ Services

No expensive infrastructure build-outs that DSL or cable services require.

- Competitive Access Systems (CAS) can combine all of a typical home/SOHO user's voice and data communications into a single unified service.
- Using CopperJet™ technology, you can provide the following new services to your customers:
  - Dial tone for up to three separate telephone numbers per POTS line
  - Local and long distance services
  - 24/7 instant Internet Access and ISP services
  - Broadband access (proprietary – ask us how we can do this!)
  - Enhanced calling, messaging, voice mail and email services
  - FAX support
  - Lifeline support
  - Flat-rate billing
  - Video Telephone (future)
- All services provided over customer's existing POTS line!

CopperJet™

Opens up a new era of communication services for CLEC's

- CopperJet™ opens up a new era of communications by unlocking the local, long distance, ISP services and universal messaging markets for Competitive Local Exchange carriers.
  - These new services are market enablers as well as revenue generators for the carriers.
- No central office or network equipment is required
  - So you can quickly grow your customer base throughout the world.
- CopperJet™ converges users' voice and data services into a unified service that is sent over any Carrier's network.
- CopperJet™is installed at the customer premise – by the customer!
  - No service call is necessary
- CopperJet™ is remotely upgradeable
  - Allows service providers to add features and upgrade the CopperJet™ gateway from their central administrative site. No customer involvement is necessary.
- Compatible with all PSTN equipment
- CopperJet™ is secure

Value Proposition

Cut your customers' telecommunications bills by 50%

- Take advantage of the huge residential and SOHO markets by providing new services that operate with all existing teleco equipment
- You can grow your company quickly by deploying CopperJet™ with these friendly features:
  - Easy to install, even for a typical consumer.
    - System auto-configures and registers automatically.
  - Can be sold through mass market consumer channels
  - Supports remote upgradeability to increase its functionality and life span
  - Private labeling possible
  - Least-cost routing for both voice and data
    - Re-route traffic at any time to take advantage of lowest carrier costs
  - Least-cost routing saves you money so you can:
    - Cut your customers' telecommunications bills by 50%

- All services are provided over the customer's existing POTS line!!!
