Title: Browser Based Web Site Generation Tool and Run Time Engine

DECLARATION OF SYLVIA D. HALL-ELLIS, PH.D.

I, Sylvia D. Hall-Ellis, Ph.D., declare as follows:

I. INTRODUCTION

1. My name is Sylvia D. Hall-Ellis. I have been retained as an expert by Facebook, who I am informed is a petitioner to this proceeding (“the Petitioner”).

2. I have written this Declaration at the request of the Petitioner to provide my expert opinion regarding the public availability of several publications, identified below. My Declaration sets forth my opinions in detail and provides the basis for my opinions regarding the public availability of these publications.

3. I reserve the right to supplement or amend my opinions, and bases for them, in response to any additional evidence, testimony, discovery, argument, and/or other additional information that may be provided to me after the date of this Declaration.

4. As of the preparation and signing of this Declaration, libraries across the nation are beginning to reopen, but only in a limited capacity, following closures due to the COVID-19 virus pandemic. However, were the libraries fully open and had fully resumed normal services, I would expect to be able to obtain paper copies of the documents in this Declaration. I reserve the right to supplement my Declaration when the libraries are fully reopen to provide such information.

5. I am being compensated for my time spent working on this matter at my normal consulting rate of \$300 per hour, plus reimbursement for any additional

reasonable expenses. My compensation is not in any way tied to the content of this Declaration, the substance of my opinions, or the outcome of this litigation. I have no other interests in this proceeding or with any of the parties.

6. All of the materials that I considered and relied upon are discussed explicitly in this Declaration.

II. QUALIFICATIONS

7. I am currently an Adjunct Professor in the School of Information at San José State University in San José, California. I obtained a Master of Library Science from the University of North Texas in 1972 and a Ph.D. in Library Science from the University of Pittsburgh in 1985. Over the last fifty years, I have held various positions in the field of library and information resources. I was first employed as a librarian in 1966 and have been involved in the field of library sciences since, holding numerous positions.

8. I am a member of the American Library Association (ALA) and its Association for Library Collections & Technical Services (ALCTS) Division, and I served on the Committee on Cataloging: Resource and Description (which wrote the new cataloging rules) and as the chair of the Committee for Education and Training of Catalogers and the Competencies and Education for a Career in Cataloging Interest Group. I also served as the Chair of the ALCTS Division's Task Force on Competencies and Education for a Career in Cataloging. Additionally, I have served

as the Chair for the ALA Office of Diversity's Committee on Diversity, as a member of the REFORMA National Board of Directors, and as a member of the Editorial Board for the ALCTS premier cataloging journal, *Library Resources and Technical Services*. Currently I serve as a Co-Chair for the Library Research Round Table of the American Library Association.

9. I have also given over one hundred presentations in the field, including several on library cataloging systems and Machine-Readable Cataloging ("MARC") standards. My current research interests include library cataloging systems, metadata, and organization of electronic resources.

10. My full curriculum vitae is attached hereto as **Exhibit A**.

III. PRELIMINARIES

A. Scope of Declaration and Legal Standards

11. I am not an attorney and will not offer opinions on the law. I am, however, rendering my expert opinion on the authenticity of the documents referenced herein and on when and how each of these documents was disseminated or otherwise made available to the extent that persons interested and ordinarily skilled in the subject matter or art, exercising reasonable diligence, could have located the documents before the dates discussed below with respect to the specific documents.

12. I am informed by counsel that a printed publication qualifies as publicly

accessible as of the date it was disseminated or otherwise made available such that a person interested in and ordinarily skilled in the relevant subject matter could locate it through the exercise of ordinary diligence.

13. While I understand that the determination of public accessibility under the foregoing standard rests on a case-by-case analysis of the facts particular to an individual publication, I also understand that a printed publication is rendered “publicly accessible” if it is cataloged and indexed by a library such that a person interested in the relevant subject matter could locate it (*i.e.*, I understand that cataloging and indexing by a library is sufficient, though there are other ways that a printed publication may qualify as publicly accessible). One manner of sufficient indexing is indexing according to subject matter category. I understand that the cataloging and indexing by a single library of a single instance of a particular printed publication is sufficient, even if the single library is in a foreign country. I understand that, even if access to a library is restricted, a printed publication that has been cataloged and indexed therein is publicly accessible so long as a presumption is raised that the portion of the public concerned with the relevant subject matter would know of the printed publication. I also understand that the cataloging and indexing of information that would guide a person interested in the relevant subject matter to the printed publication, such as the cataloging and indexing of an abstract for the printed publication, is sufficient to render the printed publication publicly

accessible.

14. I understand that routine business practices, such as general library cataloging and indexing practices, can be used to establish an approximate date on which a printed publication became publicly accessible.

B. Persons of Ordinary Skill in the Art

15. I am told by counsel that the subject matter of this proceeding generally relates to web site editing technology.

16. I have been informed by counsel that a “person of ordinary skill in the art at the time of the inventions” is a hypothetical person who is presumed to be familiar with the relevant field and its literature at the time of the inventions. This hypothetical person is also a person of ordinary creativity, capable of understanding the scientific principles applicable to the pertinent field.

17. I am told by counsel that a person of ordinary skill in this subject matter or art would typically be someone who possessed at least a bachelor’s degree in software engineering, computer science, computer engineering, or electrical engineering with at least two years of experience in web-based software application development, including experience in developing software and systems for storing, retrieving, and transmitting information (such as text and images) over a computer network such as the Internet (or equivalent degree or experience). I have been further informed by counsel that a person of ordinary skill in the art would have been

familiar with and able to understand the information known in the art relating to these fields, including the publications discussed in this Declaration.

C. Use of Authoritative Databases

18. In preparing this Declaration, I used authoritative databases, such as the OCLC bibliographic database and the Library of Congress Online Catalog, to confirm citation details of the publication discussed.

19. *Indexing.* A researcher may discover material relevant to his or her topic in a variety of ways. One common means of discovery is to search for relevant information in an index of periodical and other publications. Having found relevant material, the researcher will then normally obtain it online, look for it in libraries, or purchase it from the publisher, a bookstore, a document delivery service, or other provider. Sometimes, the date of a document's public accessibility will involve both indexing and library date information.

20. Indexing services use a wide variety of controlled vocabularies to provide subject access and other means of discovering the content of documents. The formats in which these access terms are presented vary from service to service.

21. Online indexing services and digital repositories commonly provide bibliographic information, abstracts, and full-text copies of the indexed publications, along with a list of the documents cited in the indexed publication. These services also often provide lists of publications that cite a given document. A citation of a

document is evidence that the document was publicly available and in use by researchers no later than the publication date of the citing document.

D. Summary of Opinions

22. I am informed by counsel that the earliest claimed priority date for the patent at issue is December 2, 1999. I am also informed by counsel that, in a concurrent litigation, the Patent Owner has contended that the priority date for the patent-at-issue is April 1999. As I will explain below, it is my opinion that the printed publications discussed in my Declaration were publicly accessible more than one year before the December 2, 1999, priority date, and thus also before April 1999.

IV. LIBRARY CATALOGING PRACTICES

A. MARC Records and OCLC

23. I am fully familiar with the library cataloging standard known as the MARC standard, which is an industry-wide standard method of storing and organizing library catalog information. MARC was first developed in the 1960's by the Library of Congress. A MARC-compatible library is one that has a catalog consisting of individual MARC records for works made available at that library.

24. Since at least the early 1970s and continuing to the present day, MARC has been the primary communications protocol for the transfer and storage of

bibliographic metadata in libraries.¹ As explained by the Library of Congress:

You could devise your own method of organizing the bibliographic information, but you would be isolating your library, limiting its options, and creating much more work for yourself. Using the MARC standard prevents duplication of work and allows libraries to better share bibliographic resources. Choosing to use MARC enables libraries to acquire cataloging data that is predictable and reliable. If a library were to develop a “home-grown” system that did not use MARC records, it would not be taking advantage of an industry-wide standard whose primary purpose is to foster communication of information.

Using the MARC standard also enables libraries to make use of commercially available library automation systems to manage library operations. Many systems are available for libraries of all sizes and are designed to work with the MARC format. Systems are maintained and improved by the vendor so that libraries can benefit from the latest advances in computer technology. The

¹ A complete history of the development of MARC can be found in *MARC: Its History and Implications* by Henrietta D. Avram (Washington, DC: Library of Congress, 1975) and available online from the Hathi Trust (<https://babel.hathitrust.org/cgi/pt?id=mdp.39015034388556;view=1up;seq=1>; last visited June 14, 2021).

MARC standard also allows libraries to replace one system with another with the assurance that their data will still be compatible.

Why Is a MARC Record Necessary? LIBRARY OF CONGRESS, <http://www.loc.gov/marc/umb/um01to06.html#part2> (last visited June 14, 2021).

25. Thus, almost every major library in the world is MARC-compatible. See, e.g., *MARC Frequently Asked Questions (FAQ)*, LIBRARY OF CONGRESS, <https://www.loc.gov/marc/faq.html> (last visited June 14, 2021) (“MARC is the acronym for MACHine-Readable Cataloging. It defines a data format that emerged from a Library of Congress-led initiative that began nearly fifty years ago. It provides the mechanism by which computers exchange, use, and interpret bibliographic information, and its data elements make up the foundation of most library catalogs used today.”). MARC is the ANSI/NISO Z39.2-1994 standard (reaffirmed in 2016) for Information Interchange Format. The full text of the standard is available from the Library of Congress at <http://www.loc.gov/marc/bibliographic/> (last visited June 14, 2021).

26. A MARC record comprises several fields, each of which contains specific data about the work. Each field is identified by a standardized, unique, three-digit code corresponding to the type of data that follow. See, e.g., <http://www.loc.gov/marc/umb/um07to10.html> (last visited June 14, 2021); <http://www.loc.gov/marc/bibliographic/> (last visited June 14, 2021). For example,

a work's title is recorded in field 245, the primary author of the work is recorded in field 100, a work's International Standard Book Number ("ISBN") is recorded in field 020, a work's International Standard Serial Number ("ISSN") is recorded in field 022, and the publication date is recorded in field 260 under the subfield "c." *Id.*² If a work is a periodical, then its publication frequency is recorded in field 310, and the publication dates (e.g., the first and last publication) are recorded in field 362, which is also referred to as the enumeration/chronology field. *See* <http://www.loc.gov/marc/bibliographic/bd3xx.html> (last visited June 14, 2021).³

² In some MARC records, field 264 is used rather than field 260 to record publication information. *See* <http://www.loc.gov/marc/bibliographic/bd264.html> (last visited June 14, 2021) ("Information in field 264 is similar to information in field 260 (Publication, Distribution, etc. (Imprint)). Field 264 is useful for cases where the content standard or institutional policies make a distinction between functions").

³ Upwards of two-thirds to three-quarters of book sales to libraries come from a jobber or wholesaler for online and print resources. These resellers make it their business to provide books to their customers as fast as possible, often providing turnaround times of only a single day after publication. Libraries purchase a significant portion of the balance of their books directly from publishers themselves, which provide delivery on a similarly expedited schedule. In general, libraries make these purchases throughout the year as the books are published and shelve the books as soon thereafter as possible in order to make the books available to their patrons. Thus, books are generally available at libraries across the country within just a few days of publication.

27. The library that initially created the MARC record is reflected in field 040 in subfield “a” with that library’s unique library code. *See, e.g.,* <http://www.loc.gov/marc/umb/um07to10.html> (last visited June 14, 2021); <http://www.loc.gov/marc/bibliographic/> (last visited June 14, 2021). Once a MARC record for a particular work is originally created by one library, other libraries can use that original MARC record to then create their own MARC records for their own copies of the same work. These other libraries may modify or add to the original MARC record as necessary to reflect data specific to their own copies of the work. However, the library that created the original MARC record would still be reflected in these modified MARC records (corresponding to other copies of the same work at other libraries) in field 040, subfield “a”. The modifying library (or libraries) is reflected in field 040, subfield “d”. *See* <http://www.loc.gov/marc/bibliographic/bd040.html> (last visited June 14, 2021).

28. I consulted the Directory of OCLC Libraries (<http://www.oclc.org/contacts/libraries.en.html>; last visited June 14, 2021) in order to identify the institution that created or modified the MARC record. Moreover, when viewing the MARC record online via Online Computer Library Center’s (“OCLC”) bibliographic database, which I discuss further below, hovering over a library code in field 040 with the mouse reveals the full name of the library. I also used this method of “mousing over” the library codes in the OCLC database to

identify the originating and modifying libraries for the MARC records discussed in this Declaration.

29. MARC records also include one or more fields that show information regarding subject matter classification. For example, 6XX fields are termed “Subject Access Fields.” See <http://www.loc.gov/marc/bibliographic/bd6xx.html> (last visited June 14, 2021). Among these, for example, is the 650 field; this is the “Subject Added Entry – Topical Term” field. See <http://www.loc.gov/marc/bibliographic/bd650.html> (last visited June 14, 2021). The 650 field is a “[s]ubject added entry in which the entry element is a topical term.” *Id.* These entries “are assigned to a bibliographic record to provide access according to generally accepted thesaurus-building rules (e.g., *Library of Congress Subject Headings* (LCSH), *Medical Subject Headings* (MeSH)).” *Id.*

30. Further, MARC records can include call numbers, which themselves contain a classification number. For example, a MARC record may identify a 050 field, which is the “Library of Congress Call Number.” See <http://www.loc.gov/marc/bibliographic/bd050.html> (last visited June 14, 2021). A defined portion of the Library of Congress Call Number is the classification number, and “source of the classification number is *Library of Congress Classification* and the *LC Classification-Additions and Changes*.” *Id.* Thus, the 050 field may be used to show information regarding subject matter classification.

31. Each item in a library has a single classification number. A library selects a classification scheme (*e.g.*, the Library of Congress Classification scheme just described or a similar scheme such as the Dewey Decimal Classification scheme) and uses it consistently. When the Library of Congress assigns the classification number, it appears as part of the 050 field, as discussed above. For MARC records created by libraries other than the Library of Congress (*e.g.*, a university library or a local public library), the classification number may appear in a 09X (*e.g.*, 090) field. See <http://www.loc.gov/marc/bibliographic/bd09x.html> (last visited June 14, 2021).

32. When a MARC-compatible library acquires a work, it creates a MARC record for its copy of the work in its computer catalog system in the ordinary course of its business. This MARC record (for the copy of a work available at the particular library) may be later accessed by researchers in a number of ways. For example, many libraries, including the Library of Congress, make their MARC records available through their website. As an example, the MARC record for the copy of *The Unlikely Spy*, by Daniel Silva,⁴ available at the Library of Congress can be viewed through the Library of Congress website, at <https://catalog.loc.gov/vwebv/staffView?searchId=20265&recPointer=1&recCount>

⁴ *The Unlikely Spy* is a 1996 novel written by Daniel Silva, who happens to be one of my favorite authors.

[=25&bibId=2579985](#) (last visited June 14, 2021). One could, of course, always physically visit the library at which the work is available, and request to see that library's MARC record for the work. Moreover, members of the Online Computer Library Center ("OCLC") can access the MARC records of other member institutions through OCLC's online bibliographic database, as I explain further below.

33. The OCLC was created "to establish, maintain and operate a computerized library network and to promote the evolution of library use, of libraries themselves, and of librarianship, and to provide processes and products for the benefit of library users and libraries, including such objectives as increasing availability of library resources to individual library patrons and reducing the rate of rise of library per-unit costs, all for the fundamental public purpose of furthering ease of access to and use of the ever-expanding body of worldwide scientific, literary and educational knowledge and information."⁵ Among other services, OCLC and its members are responsible for maintaining the WorldCat database (<http://www.worldcat.org/>; last visited June 14, 2021), used by independent and

institutional libraries throughout the world. All libraries that are members of OCLC are MARC-compatible. *See, e.g.,* https://help.oclc.org/Metadata_Services/OCLC-MARC_records/About_OCLC-MARC_records (last visited June 14, 2021) (“OCLC-MARC records describes records produced since November 1993.”); <https://www.oclc.org/support/services/worldcat/documentation/cataloging/electronicresources.en.html> (last visited June 14, 2021) (“Like the two superseded OCLC documents, this revised set of guidelines is intended to assist catalogers in creating records for electronic resources in WorldCat, the OCLC Online Union Catalog. These guidelines pertain to OCLC-MARC tagging (that is, content designation). Cataloging rules and manuals (such as AACR2) govern the content of records. You should implement these guidelines immediately.”).

34. When an OCLC member institution acquires a publication, like the other MARC-compatible libraries discussed above, it creates a MARC record for this publication in its computer catalog system in the ordinary course of its business. MARC records created at the Library of Congress are tape-loaded into the OCLC database through a subscription to MARC Distribution Services daily or weekly. Once the MARC record is created by a cataloger at an OCLC member library or is tape-loaded from the Library of Congress, the MARC record is then made available to any other OCLC members online, and thereby made available to the public. Accordingly, once the MARC record is created by a cataloger at an OCLC member

library or is tape-loaded from the Library of Congress, any publication corresponding to the MARC record has been cataloged and indexed according to its subject matter such that a person interested in that subject matter could, with reasonable diligence, locate and access the publication through any library with access to the OCLC bibliographic database or through the Library of Congress.

35. *Fields 008, 005, and 955 in MARC Records as Indicators of Public Accessibility.* When a MARC-compatible library creates an original MARC record for a work, the library records the date of creation of that MARC record in **field 008**, characters 00 through 05, in the ordinary course of its business. See <http://www.loc.gov/marc/bibliographic/bd008a.html> (last visited June 14, 2021). For OCLC member institutions that use OCLC software to create original MARC records, the date of creation in field 008 is automatically supplied by the OCLC software. The MARC record creation date in field 008 thus reflects the date on which, or shortly after which, a work was first acquired and cataloged by the library that created the original MARC record.

36. When other MARC-compatible libraries subsequently acquire their own copies of the same work, as mentioned, they create MARC records in their own computer catalog systems for their copies in the ordinary course of business.⁶ They

⁶ Initial contributions to the bibliographic database for a work are called “master records.”

may use a MARC record previously created for that work (by another MARC-compatible library) to create their own MARC records for their own copies of that same work.⁷ The previously created MARC record used by subsequently-acquiring libraries to create MARC records for their own copies may be obtained through the OCLC bibliographic database, as described above. If, when creating a MARC record to represent its own copy of the work, the subsequently-acquiring library uses the master MARC record in its original form, the subsequently-acquiring library cannot reenter data into the 008 field; therefore, the date in the 008 field will continue to reflect the date the MARC record was initially created by the originating library. On the other hand, if the subsequently-acquiring library modifies the previously created MARC record when creating its own MARC record for its own copy of the work, the subsequently-acquiring library may enter into the 008 field of its own MARC record the date its own MARC record was created.⁸ But the library that

⁷ When a local library uses a master record in OCLC and produces (or downloads) it to the in-house system, the three-character symbol for the subsequent library is added to the holdings for the work.

⁸ This practice is not required by, but is nevertheless consistent with, the MARC standard. Many MARC records exist today whose 008 fields indicate when the first original MARC record for a work was created, rather than when a derivative record was created based on the original MARC record by a subsequently-acquiring library for its own computer catalog system.

created the original MARC record used by the subsequently-acquiring library would still be reflected in the MARC record of the subsequently-acquiring library in field 040, subfield “a”. Thus, the work identified by any MARC record possessed by any MARC-compatible library would have been accessible to the public at least as of the date shown in the 008 field, or shortly thereafter, either from the library that possesses the MARC record itself, or from the originating library indicated in field 040, subfield “a”. As discussed, a MARC-compatible library in the ordinary course of its business creates a MARC record in its own catalog system for a work when it acquires a copy of that work.

37. Moreover, when a MARC record is created by a library for its own copy of a work, **field 005** is automatically populated with the date that MARC record was created in year, month, day format (YYYYMMDD). *See* <http://www.loc.gov/marc/bibliographic/bd005.html> (last visited June 14, 2021).⁹ Thereafter, the library’s computer system may automatically update the date in field 005 every time the library updates the MARC record (*e.g.*, to reflect that an item has been moved to a different shelving location within the library). *Id.*¹⁰ Thus, the work

⁹ Some of the newer library catalog systems also include hour, minute, second (HHMMSS).

¹⁰ Field 005 is visible when viewing a MARC record via an appropriate computerized interface. But when a MARC record is printed directly to hardcopy

identified by any MARC record possessed by any MARC-compatible library would have been accessible to the public at least as of the date shown in the 005 field, or shortly thereafter, from the library that possesses the MARC record itself. As noted, because the 005 field may be updated each time the library updates its MARC record, the work identified by the MARC record may, in fact, have been accessible to the public from that library much earlier than the date indicated in the 005 field.

38. Moreover, MARC records for copies of works available at the Library of Congress can have a **955 field**. *See* http://www.loc.gov/cds/PDFdownloads/dcm/DCM_2007-03.pdf (last visited June 14, 2021). The 955 field in MARC records obtained from the Library of Congress provides Local Tracking Information, which is a record of internal steps in the cataloging process followed by the Library of Congress. *Id.* Entries in the 955 field for a particular work are generated by Library of Congress staff as the work progresses through the cataloging process. *Id.* One of the mandatory fields that library staff must enter for each step is the date (in the form of “yyyy-mm-dd” or “yy-mm-dd”) the step was taken. *Id.* Thus, the work identified by a MARC record possessed by the Library of Congress would have been accessible to the public at least as of the earliest date shown in the 955 field, or shortly thereafter, from the

from the OCLC database, the “005” label is not shown. The date in the 005 field instead appears next to the label “Replaced.”

Library of Congress.

39. Based on my personal experience as a professional librarian using the MARC and OCLC resources, it has been my experience that both of these resources were continuously operational and available since at least 1992. Indeed, in the course of my work, I have extensively used both of these resources over the past 30+ years, and I have consistently found the information contained within these resources to be complete and reliable. I have never found the date of accessibility as indicated in fields 008, 005, or 955 to be incorrect. And in only a minute number of cases have I found any errors at all in these records – none of which affected my ability to render an accurate opinion as to accessibility, indexing, or subject headings.

V. PUBLICATIONS IN THIS PROCEEDING

A. Coombs [Exhibit 1008]

40. Attached hereto as Exhibit 1008 is a copy of selections from a book, *Setting Up an Internet Site for Dummies*, 3rd edition, by Jason Coombs, Ted Coombs, David Crowder, and Rhonda Chrowder (hereafter “Coombs”) and issued by Wiley & Sons in 1998. Exhibit 1008 is a true and correct copy of the title page, copyright page, table of contents, Chapter 1, “Introduction” (pages 1-6), Chapter 2, “Internetworking” (pages 17-24), Chapter 3, “What’s in a Name?” (pages 25-52), Chapter 5, “Creating Web Pages” (pages 65-92), Chapter 12, “Promoting Your Internet Site” (pages 241-270), Chapter 13, “Ten Trends in the Interactive Global

Village” (pages 273-278), “Glossary” (pages 349-358), and back cover that I obtained from the Library of Congress. The selected text in Exhibit 1008 is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. Exhibit 1008 is a true and correct copy in a condition that creates no suspicion about its authenticity.

41. Attached hereto as Attachment 2a is a true and correct copy of the MARC record for this monograph from the Library of Congress online catalog. The library ownership is indicated by the presence of the library’s code (DLC) in field 040. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to the MARC record occurred on June 9, 2000, as shown in the field 005 (“20000609”). I personally identified and retrieved the library catalog record which is Attachment 2a.

42. Based on finding a print copy of the Coombs book in the Library of Congress and MARC record in its online library catalog attached as Attachment 2a, it is my opinion that the book *Setting Up an Internet Site for Dummies*, 3rd edition, was publicly available on or shortly after June 8, 1998, as shown in field 955 (“06-08-98”). The International Standard Book Number (ISBN) on Exhibit 1008 (0-7645-0358-8) matches the ISBN in field 020 of Attachment 2a. Therefore, Exhibit

1008 is the same book as the one that the cataloger in the Library of Congress used to create the MARC record that is Attachment 2a.

43. Field 955 indicates that the Coombs book arrived and was sent to cataloging on April 27, 1998 (“04-27-98”), subject analysis on April 29, 1998 (“04-29-98”), shelf listing on May 7, 1998 (“05-07-98”), and classification assignment on June 8, 1998 (“05-08-98”).

44. Attached hereto as Attachment 2b is a true and correct copy of the MARC record for the book *Setting Up an Internet Site for Dummies*, 3rd edition, obtained from the OCLC bibliographic database. I personally identified and retrieved the MARC record that is Attachment 2b. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 2b, that library code is “DLC,” which means that the MARC record for this book was created at the Library of Congress. As can be seen in the “Entered” field in the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 38919248 on April 27, 1998, as shown in the “Entered” field (“19980427”). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 2b occurred on May 9, 2020, as shown in the “Replaced” field (“20200509”). I personally identified and retrieved the MARC record that is Attachment 2b.

45. Attachment 2b further includes an entry in field 050 (“TK5105.875.I57 \$b S46 1998”)—as described above, this includes a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system). Attachment 2b further includes an entry in field 082 (“005.2/76”), a subject matter consistent with the Dewey Decimal classification system. Attachment 2b further includes two descriptor terms reading “Internet” (see Attachment 2c, Library of Congress subject heading sh92002816) and “Web sites” (see Attachment 2d, Library of Congress subject heading sh96008680) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 2b was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 050 entry, the field 082 entry, and the field 650 entries. Further, as of April 27, 1998, the MARC record attached hereto as Attachment 2b was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that added this book to its collection, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

46. Attachment 2b indicates that the Coombs book as cataloged at the Library of Congress is currently available from 91 libraries. In view of above, the

Coombs monograph was publicly available on or shortly after June 8, 1998, because by that date it had been received, cataloged, and indexed at the Library of Congress and made part of the OCLC bibliographic database. For these reasons, it is my opinion that Exhibit 1008 was published and accessible to the public on or shortly after June 8, 1998.

47. Further supporting my opinion that Exhibit 1008 was publicly accessible to ordinarily skilled and interested researchers in the field is the fact that the book *Setting Up an Internet Site for Dummies*, 3rd edition was registered with the U. S. Copyright Office as item TX0004810201 on November 18, 1998, and indicated a publication date of March 19, 1998 (see Attachment 2e, U.S. Copyright Office Public Catalog). As noted above, this would have provided a POSA with keyword searching capabilities and other tools to locate this book.

B. Lemay Java [Exhibit 1005]

48. Attached hereto as Exhibit 1005 are selections from the book, *Teach Yourself Java in 21 Days*, by Laura Lemay, Charles L. Perkins, and Michael Morrison (hereafter “Lemay Java”) and issued by Sams.net in 1996. Exhibit 1005 is a true and correct copy of the title page, copyright page, table of contents, Day 1, “An Introduction to Java Programming” (pages 1-17), Day 5, “Arrays, Conditionals, and Loops” (pages 79-93), Day 8, “Java Applet Basics” (pages 129-148), Day 10, “Simple Animation and Threads” (pages 173-193), Day 11, “More Animation,

Images, and Sound” (pages 195-215), Day 13, “The Java Abstract Windowing Toolkit” (pages 237-278), Day 18, “Multithreading” (pages 353-373), and Day 21, “Under the Hood” (pages 421-471). that I obtained from the British Library. The text in Exhibit 1005 is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. Exhibit 1005 is a true and correct copy in a condition that creates no suspicion about its authenticity.

49. Attached hereto as Attachment 3a is a true and correct copy of the metadata record for this monograph from the British Library online catalog. The library ownership is indicated by the presence of the library’s code (Uk) in subfields a and c of field 040. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. I personally identified and retrieved the library catalog record which is Attachment 3a.

50. Based on finding a print copy of the book *Teach Yourself Java in 21 Days* in the British Library and MARC record in its online library catalog attached as Attachment 3a, it is my opinion that the book was publicly available on or shortly after June 17, 1996, as shown by the ownership and receipt date on page 6 of Exhibit 1005 and further corroborated by the creation of the MARC record on June 18, 1996 as indicated by the 008 field of Attachment 3a (“960618”). The International Standard Book Number (ISBN) on Exhibit 1005 (1-57521-030-4) matches the ISBN

in field 020 of Attachment 3a. Therefore, Exhibit 1005 is the same book as the one that the cataloger in the British Library used to create the MARC record that is Attachment 3a.

51. Attached hereto as Attachment 3b is a true and correct copy of the MARC record for the book *Teach Yourself Java in 21 Days* obtained from the OCLC bibliographic database. I personally identified and retrieved the MARC record that is Attachment 3b. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 3b, that library code is “NNM,” which means that the MARC record for this book was created at the Davidson College Library. As can be seen in the “Entered” field in the MARC record for this exhibit, a cataloger at the Davidson College Library created OCLC record number 34090117 on February 6, 1996, as shown in the “Entered” field (“19960206”). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 3b occurred on April 8, 2021, as shown in the “Replaced” field (“20210408”). I personally identified and retrieved the MARC record that is Attachment 3b.

52. Attachment 3b further includes an entry in field 050 (“QA76.73.J38 \$b L46 1996”)—as described above, this includes a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system). Attachment 3b further includes an entry

in field 082 (“005.133”), a subject matter consistent with the Dewey Decimal classification system. Attachment 3b further includes a descriptor term reading “Java (Computer program language)” (see Attachment 1c, Library of Congress subject heading sh95008574) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 3b was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 050 entry, the field 082 entry, and the field 650 entry. Further, as of February 6, 1996, the MARC record attached hereto as Attachment 3b was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that added this book to its collection, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

53. Attachment 3b indicates that the book *Teach Yourself Java in 21 Days* as cataloged at the British Library is currently available from 398 libraries. In view of above, the book *Teach Yourself Java in 21 Days* was publicly available on or shortly after June 17, 1996, because by that date it had been received, cataloged, and indexed at the British Library. For these reasons, it is my opinion that Exhibit 1005 was published and accessible to the public on or shortly after June 17, 1996.

54. Further supporting my opinion that Exhibit 1005 was publicly

accessible to ordinarily skilled and interested researchers in the field is the fact that the book *Teach Yourself Java in 21 Days* was registered with the U. S. Copyright Office as item TX0004209033 on April 23, 1996, and indicated a publication date of January 19, 1996 (see Attachment 3c, U.S. Copyright Office Public Catalog). As noted above, this would have provided a POSA with keyword searching capabilities and other tools to locate this book.

C. Lemay HTML [Exhibit 1004]

55. Attached hereto as Exhibit 1004 is a copy of selections from a book, *Teach Yourself Web Publishing with HTML 3.2 in a Week*, 3rd edition, by Laura Lemay (hereafter “Lemay HTML”) and issued by Sams.net in 1996. Exhibit 1004 is a true and correct copy of the title page, copyright page, table of contents, acknowledgements, introduction, Day 1, Chapter 1 “The World of the World Wide Web” (pages 3-21), Day 1, Chapter 2, “Get Organized” (pages 23-42), Day 5, Chapter 9, “External Files, Multimedia, and Animation” (pages 237-263), Day 5, Chapter 10, “Sound and Video Files” (pages 265-294) and back cover that I obtained from the Library of Congress. The selected text in Exhibit 1004 is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. Exhibit 1004 is a true and correct copy in a condition that creates no suspicion about its authenticity.

56. Attached hereto as Attachment 4a is a true and correct copy of the MARC record for this monograph from the Library of Congress online catalog. The library ownership is indicated by the presence of the library's code (DLC) in field 040. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to the MARC record occurred on July 11, 2000, as shown in the field 005 ("20000711"). I personally identified and retrieved the library catalog record which is Attachment 4a.

57. Based on finding a print copy of the Lemay HTML book in the Library of Congress and MARC record in its online library catalog attached as Attachment 4a, it is my opinion that the book *Teach Yourself Web Publishing with HTML 3.2 in a Week*, 3rd edition, was publicly available on or shortly after January 14, 1997, as shown in field 955 ("01-14-97"). The International Standard Book Number (ISBN) on Exhibit 1004 (1-57521-192-0) matches the ISBN in field 020 of Attachment 4a. Therefore, Exhibit 1004 is the same book as the one that the cataloger in the Library of Congress used to create the MARC record that is Attachment 4a.

58. Field 955 indicates that the Lemay HTML book arrived on December 31, 1996 and was sent to cataloging on January 3, 1997 ("01-03-97"), subject analysis on January 7, 1997 ("01-07-97"), shelf listing on January 9, 1997 ("01-09-97"), and classification assignment on January 14, 1997 ("01-14-97").

59. Attached hereto as Attachment 4b is a true and correct copy of the MARC record for the book *Teach Yourself Web Publishing with HTML 3.2 in a Week*, 3rd edition, obtained from the OCLC bibliographic database. I personally identified and retrieved the MARC record that is Attachment 4b. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 4b, that library code is “DLC,” which means that the MARC record for this book was created at the Library of Congress. As can be seen in the “Entered” field in the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 35752009 on December 31, 1996, as shown in the “Entered” field (“19961231”). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 4b occurred on September 27, 2018, as shown in the “Replaced” field (“20180927”). I personally identified and retrieved the MARC record that is Attachment 4b.

60. Attachment 4b further includes an entry in field 050 (“QA76.76.H94 \$b L45 1996b”)—as described above, this includes a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system). Attachment 4b further includes an entry in field 082 (“005.7/2”), a subject matter consistent with the Dewey Decimal classification system. Attachment 4b further includes five descriptor terms reading

“HTML (Document markup language)” (see Attachment 4c, Library of Congress subject heading sh95002791), “World Wide Web” (see Attachment 4d, Library of Congress subject heading sh95000541), “Internet” (see Attachment 2c, Library of Congress subject heading sh92002816), “Electronic publishing \$v Programmed instruction” (see Attachment 4e, Library of Congress subject heading sh85042368 and Attachment 4f, Library of Congress subject heading sh85107307), and “Hypertext systems” (see Attachment 4g, Library of Congress subject heading sh88002671) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 4b was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 050 entry, the field 082 entry, and the field 650 entries. Further, as of December 31, 1996, the MARC record attached hereto as Attachment 4b was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that added this book to its collection, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

61. Attachment 4b indicates that the Lemay HTML book as cataloged at the Library of Congress is currently available from 202 libraries. In view of above, the Lemay HTML monograph was publicly available on or shortly after January 14,

1997, because by that date it had been received, cataloged, and indexed at the Library of Congress and made part of the OCLC bibliographic database. For these reasons, it is my opinion that Exhibit 1004 was published and accessible to the public on or shortly after January 14, 1997.

62. Further supporting my opinion that Exhibit 1004 was publicly accessible to ordinarily skilled and interested researchers in the field is the fact that the book *Teach Yourself Web Publishing with HTML 3.2 in a Week*, 3rd edition was registered with the U. S. Copyright Office as item TX0004690788 on November 26, 1997, and indicated a publication date of September 20, 1996 (see Attachment 4h, U. S. Copyright Office Public Catalog). As noted above, this would have provided a POSA with keyword searching capabilities and other tools to locate this book.

D. Perry [Exhibit 1006]

63. Attached hereto as Exhibit 1006 is a copy of a book, *C++ Programming 101*, 1st edition, by Greg Perry (hereafter “Perry”) and issued by Sams Publishing in 1992. Exhibit 1006 is a true and correct copy of the title page, copyright page, table of contents, Lesson 27 “Multi-Dimensional Arrays” (pp. 455-467) and back cover that I obtained from Amazon.com. The text in Exhibit 1006 is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. Exhibit 1006 is a true and correct copy in a condition that creates no

suspicion about its authenticity.

64. Attached hereto as Attachment 5a is a true and correct copy of the MARC record for this monograph from the Library of Congress online catalog. The library ownership is indicated by the presence of the library's code (DLC) in field 040. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to the MARC record occurred on January 30, 2019, as shown in the field 005 ("20190130"). I personally identified and retrieved the library catalog record which is Attachment 5a.

65. Based on finding a print copy of the Perry book from Amazon.com and its MARC record in the Library of Congress online library catalog attached as Attachment 5a, it is my opinion that the book *C++ Programming 101*, 1st edition, was publicly available on or shortly after March 11, 1993, as shown in field 955 ("03-11-93"). The International Standard Book Number (ISBN) on Exhibit 1006 (0-672-30200-4) matches the ISBN in field 020 of Attachment 5a. Therefore, Exhibit 1006 is the same book as the one that the cataloger in the Library of Congress used to create the MARC record that is Attachment 5a.

66. Field 955 indicates that the Perry book arrived on February 11, 1993 and was sent to cataloging on February 18, 1993 ("02-18-93"), subject analysis on March 4, 1993 ("03-04-93"), shelf listing on March 9, 1993 ("03-09-93"), and

classification assignment on March 11, 1993 (“03-11-93”).

67. Attached hereto as Attachment 5b is a true and correct copy of the MARC record for the book *C++ Programming 101*, 1st edition, obtained from the OCLC bibliographic database. I personally identified and retrieved the MARC record that is Attachment 5b. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 5b, that library code is “DLC,” which means that the MARC record for this book was created at the Library of Congress. As can be seen in the “Entered” field in the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 27816338 on February 11, 1993, as shown in the “Entered” field (“19930211”). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 5b occurred on October 29, 2020, as shown in the “Replaced” field (“20201029”). I personally identified and retrieved the MARC record that is Attachment 5b.

68. Attachment 5b further includes an entry in field 050 (“QA76.73.C153 \$b P43 1992”)—as described above, this includes a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system). Attachment 5b further includes an entry in field 082 (“005.13/3”), a subject matter consistent with the Dewey Decimal classification system. Attachment 5b further includes a descriptor term reading

“C++ (Computer program language)” (see Attachment 5c, Library of Congress subject heading sh87007505) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 5b was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 050 entry, the field 082 entry, and the field 650 entry. Further, as of February 11, 1993, the MARC record attached hereto as Attachment 5b was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that added this book to its collection, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

69. Attachment 5b indicates that the Perry book as cataloged at the Library of Congress is currently available from 51 libraries. In view of above, the Perry monograph was publicly available on or shortly after March 11, 1993, because by that date it had been received, cataloged, and indexed at the Library of Congress and made part of the OCLC bibliographic database. For these reasons, it is my opinion that Exhibit 1006 was published and accessible to the public on or shortly after March 11, 1993.

VI. CONCLUSION

70. In signing this Declaration, I recognize that the Declaration will be filed as evidence in a case before the Patent Trial and Appeal Board of the United States Patent and Trademark Office. I also recognize that I may be subject to cross-examination in the case and that cross-examination will take place within the United States. If cross-examination is required of me, I will appear for cross-examination within the United States during the time allotted for cross-examination.

71. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.
