EagleView and Xactware team up to revolutionize roof dimensioning

OREM, Utah — Monday, March 2, 2009 — EagleView Technologies and Xactware Solutions, Inc., are teaming up to offer insurance adjusters, contractors, and roofers a streamlined method to quickly generate sketched roofs.

EagleView and Xactware announced a new technology integration that will allow Xactware customers to access EagleView's breakthrough roof measurement capabilities via XactAnalysis, the Property industry's foremost network for sending and receiving structural and contents estimates. The agreement will enable insurance adjusters and roofers to automatically create detailed roofs in Xactimate as part of the everyday claims process.

"We're excited to have our detailed roof measurement reports embedded into Xactimate," EagleView CEO Chris Barrow said. "Many of our current customers have been asking for this functionality. This will provide seamless access to our reports for insurance companies and adjusters who use the industry-leading Xactware product line."

Xactware users will be able to send measurement requests for a particular roof to EagleView from Xactimate. Using aerial photography and patent-pending software, EagleView accurately calculates measurements for the roof's ridges, rafters, valleys, slopes and more.

Xactware users can then take advantage of the new technology integration to electronically import the roof measurements into the Xactimate Sketch module and view the completed roof layout in both 2D and 3D. From there, users can graphically add shingles, ridge caps and other roofing material to the sketch. They can also graphically estimate costs to repair damages to complex roof structures.

The process saves contractors and roofers hours of time spent measuring and scoping a roof.

"This is the next logical step from Xactware as we continue to look for innovative ways to service the needs of our customers," said Jim Loveland, CEO of Xactware. "EagleView provides key technology for insurance adjusters and service providers using our products within the reconstruction and remodeling industries."

About EagleView Technologies

Headquartered in Woodville, Wash., EagleView Technologies, Inc. is the industry standard for aerial measurement services. EagleView invented the concept of measuring from the sky and developed its proprietary software (for which multiple patents are pending) which provides detailed measurements that are more accurate and more precise than any other method. With EagleView's system, insurance adjusters, roofers and solar installers significantly improve measurements' accuracy, dramatically reducing costs and time, while increasing profitability. For additional inquiries, please contact EagleView Technologies, at (866) 338-1841 or contact us online at www.eagleview.com

About Xactware

Xactware Solutions, Inc., ("Xactware") is a wholly owned subsidiary of ISO specializing in the property insurance, remodeling and restoration industries. Xactware's technology tools include estimating software programs for PCs and tablet PCs, as well as powerful online systems for replacement-cost calculations, estimate tracking and data trending in real time.

For more information about Xactware's products and services, contact Xactware at 1-800-424-9228 or contact us online at www.xactware.com.

About ISO

A leading source of information about risk, ISO provides data, analytics and decision-support to professionals in many fields, including insurance, finance, real estate, health services, government, human resources and risk management. Using advanced technologies to collect, analyze, develop and deliver information, ISO helps customers evaluate and manage risk. The company draws on vast expertise in actuarial science, insurance, coverage's, fire protection, fraud prevention, catastrophe and weather risk, predictive modeling, data management, economic forecasting, social technological trends, and many other fields. To meet the needs of diverse clients, ISO employs an experienced staff of business and technical specialists, analysts and certified professionals. In the U.S. and around the world, ISO helps customers protect people, property and financial assets. For more information, visit www.iso.com.
