EagleView® Technologies Introduces Wall Measurement Reports

EagleView Technologies, an Inc. 500 leading technology company, continues to develop solutions to automate traditionally manual processes with the introduction of another industry first: wall measurement reports for residential properties.

“The introduction of wall measurement reports affirms EagleView’s commitment to continue creating solutions through technology for the insurance and construction industries,” said Rishi Daga, vice president of insurance and client relations, EagleView Technologies. “This first-of-its-kind technology offers an automated process to gather measurements and information faster and with a higher degree of accuracy.”

The measurements are derived from high-resolution photographs using EagleView’s patented technology. The report provides a 3D wall area diagram, the total square footage of the wall areas, the number and total square feet of windows and doors, and north, south, east and west elevation diagrams. The information is presented in an easy-to-read table format with wall sections labeled for quick reference.

The reports are available now and can be ordered by simply entering a property address on EagleView’s website at www.eagleview.com. Wall reports can be ordered separately or bundled with EagleView’s leading roof measurement reports.

About EagleView Technologies

Headquartered in Bothell, Wash. EagleView Technologies automates manual processes through technology. The insurance and construction industries rely on EagleView’s patented technology and methods to provide detailed, accurate measurements from aerial imagery. The company continues to develop new technologies that lead to improved efficiency and increased profits for businesses. For more information contact EagleView Technologies at (866) 659-8439 or at www.eagleview.com.
