EagleView® Technologies Announces QuickSquares™ Reports for Rapid Estimating

EagleView Technologies, Inc., a leading technology provider of aerial imagery, data analytics and GIS solutions, is proud to introduce the QuickSquares Report. An excellent sales and marketing tool for roofing sales teams, this report delivers an overall estimate of the roof size within approximately one hour from the time that the order is placed.

“The QuickSquares Report provides roofing contractors the information needed to quickly prepare an estimate for a residential roofing project,” explained Rishi Daga, EagleView executive vice president of commercial sales. “The report is delivered on average in about an hour so the contractor can be first to deliver an estimate. The customized cover transforms the report into a professional presentation tool that leaves a lasting impression on the homeowner.”

The QuickSquares product provides an easy price point for roofing contractors to quickly obtain an overall square count for residential roofs. It works in conjunction with the entire EagleView suite of solutions offering an easy means to upgrade to an EagleView Premium report when more detail is required for ordering materials. After winning the job, contractors can simply upgrade their QuickSquares Report to a Premium Report for industry-leading, precise measurements to be used for material ordering and production planning.

The report is created using EagleView’s patented technology and includes a color aerial image of the property. It is available now and can be ordered online at www.eagleview.com.

About EagleView

EagleView Technologies is the unparalleled provider of aerial imagery, data analytics and GIS solutions serving the commercial, government and public utility sectors. The company’s patented image capture processes and 3D modeling algorithms coupled with property-centric analytic tools empower end-user workflows with scalable, efficient and highly accurate answer sets in support of property claims, risk management, emergency response, assessment, corridor mapping and more. For more information contact (866) 659-8439 or visit www.eagleview.com or www.pictometry.com.
