systems, and components to customers in more than 79 countries. We currently have strategic relationships with three of the world's top four engine producers and supply or have strategic relationships with six of the world's top ten truck producers, as well as seven of the world's top ten automotive manufacturers. Our strategic relationships with OEMs provide us with access to their manufacturing capacity, supply chain and global distribution networks without incurring the considerable investment associated with these assets. We commercialize our technology in markets where demand for clean, low emission engines is prevalent.

Since our founding in 1995, we have invested over \$863 million towards the research, development and commercialization of our proprietary technologies and related products. Conversely, our research and development efforts and investments have resulted in a substantial patent portfolio that serves as the foundation for our differentiated technology offerings and competitive advantage. Our technologies and related products enable combustion engines to use gaseous fuels, such as natural gas, propane, renewable natural gas ("RNG") or hydrogen. The substitution of natural gas for petroleum-based fuel drives a reduction in harmful combustion emissions, such as particulate matter and greenhouse gases, in addition to providing a relatively inexpensive alternative fuel from a more plentiful natural resource.

The principle focus of the operating business units are summarized below:

OPERATING BUSINESS UNITS

During the first quarter of 2015, Westport realigned the structure of the Company's internal organization. The realignment combines, our historical operating segments, Westport Applied Technologies, Westport On-Road Systems and Westport Off-Road Systems into a single operating segment, Westport Operations. This change reflects the manner in which operating decisions and assessing business performance is currently managed by the Chief Operating Decision Makers (the CEO and the COO "CODMs"). As Westport narrows its focus within certain business units, including its investments in joint ventures, and defers certain products and related programs, the CODMs manage the combined businesses as a whole. Therefore, the Westport Operations segment provides more meaningful information to users of Westport's financial statements. All comparable prior period information has been recast to reflect this change.

Westport Operations

Westport Operations designs, manufactures and sells compressed natural gas ("CNG"), liquefied natural gas ("LNG"), and liquefied petroleum gas ("LPG") components and systems to over 20 global OEMs, including Fiat, Volkswagen, Tata Motors, the GAZ Group, Chrysler, General Motors, Ford Motor Company ("Ford"), PACCAR Inc., Volvo Car Group, Hyundai and Kia and to aftermarket customers in over 79 countries. Sales from Westport's wholly-owned Italian subsidiaries, OMVL S.p.A. ("OMVL") and Emer S.p.A. ("EMER"), including Emer's wholly-owned subsidiary Valtek S.p.A., Westport's Australian operations, and, recently acquired Netherlands based Prins Autogassystemen Holding B.V. ("Prins") are made either directly to OEMs or through one of their many global distributors. Westport Operations has a strong customer base in Europe and North America and is growing in Asia, South America, and Africa.

Westport supports customers with vehicle conversions through the Ford Qualified Vehicle Modifier ("QVM") program with products in the Ford line, including transit, cargo shuttle and taxi vehicles. Sold under the Westport WING™ Power System brand, product offerings include the Ford Transit Van dedicated, F-250/F-350 bi-fuel (CNG and gasoline) and dedicated, F-450 to F-650, F-59 dedicated, E-450 dedicated and Transit Connect bi-fuel vehicle models. Westport also provides aftermarket conversion products, alternative fuel systems and application engineering.

Other products include Volvo Car bi-fuel systems (CNG and gasoline) for the V60 and V70 bi-fuel wagon; Westport mobile LNG fuel services; Westport iCE PACK™ LNG Tank System for spark-ignited ("SI") engines; LNG tender products for the rail market; and Westport industrial engines sold to Clark Material Handling and Cummins Western Canada for forklift and oilfield applications.

Corporate & Technology Investments

The Corporate and Technology Investments business unit ("**Corporate and Technology Investments**") is responsible for investments in new research and development programs with OEMs, corporate oversight and general administrative duties. Corporate and Technology Investments focuses on long-term product development and future return on investments. Once a
