Consultant

Florida International
University

About

Over twenty-one years combined experience in new product development, manufacturing, and quality assurance as an engineer, project leader, program manager, and engineering executive. Drove projects to successful conclusion by fostering collaboration and trust between stakeholders. Built an R&D department from scratch for a mid-sized company, instituted dramatic quality improvement, started a successful patent services business.... [...see more](#)

Andrew MacMillan · 3rd

Patent agent. I help business owners stop worrying about their ideas getting stolen.

September 30, 2017, Alan was Andrew's client

Easy to work with and communicates very well. Alan is clearly committed to getting the best results for his clients.

Nick Young · 3rd

Amazon Expert (Seller Central, PPC, AMS) Cofounder at MarketplaceOps | Investor

December 2, 2015, Nick was Alan's client

As a first time entrepreneur, I found the patent universe incredibly confusing and daunting. After speaking to various patent search firms, it became clear to me after my first conversation with Alan that he was incredibly knowledgeable and willing to go above and beyond to help me understand my needs. To say Alan is detailed is an understatement - he's managed to wow both me and my business partner at every turn with every deliverable, and he continues to be a valuable resource for our business. I absolutely recommend Alan's work and plan to continue working with him on projects in the future.

Alan Flum · 3rd

Stone Creek Patent Services

March 8, 2010, Alan managed Mark directly

Mark is bright, energetic, enthusiast, organized, and has strong natural leadership abilities. While I was VP of Engineering at Stanton, I supervised Mark both when he was customer service manager and as a design engineer. Mark shone as both manager and designer.

Mark is a self-motivated. I could give him an important project or task and could count on him to deliver. Mark is great with people, has excellent social skills, and has a talent for leading and organizing. This makes him an idea program manager, project leader, or engineering manager.

...

James Mazur · 3rd

Product Strategy, Design | Mixed Reality Innovator

October 24, 2006, James was senior to Mark but didn't manage Mark directly

Mark is a rare and unique engineer in that he is very quick to absorb a problem at hand and find a solution. More importantly, Mark can also go a tier higher than the problem and see potential solutions that are outside immediate problem but yet resolve the issue. It was a pleasure working with Mark and I would recommend him to anyone.

Mario Alberto López García

Director comercial en Muuk Sound & Light

June 22, 2019, Mario Alberto worked with Darrin but they were at different companies

Excelente como asesor y líder de marcas para el segmento del audio profesional, siempre dispuesto a dar un extra con tal de alcanzar los objetivos.

Amador Gilman

CEO, DJ, Producer, Dancer, Audio/Video Director, Computer Technician

November 5, 2018, Amador was Darrin's client

I met Darrin when he was still a part of Stanton DJ (now a part of Gibson Pro Audio). I was impressed with his expanse knowledge and technical expertise in multiple areas of audio technology as well as his general business tips that he would pass on. I consider Darrin one of my mentors in this industry and is normally my first call for almost any audio-technical questions or concerns that I may have.

Darrin continues to impress even after his transition from Gibson Pro Audio to DAS, enhancing the company's presence in a saturated space. His ideas and expertise has led to interesting innovations as well as cost effective procedures, allowing quality over quantity, but at a cost that is more affordable to end users. This kind ...see more
