

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent Application of:

Aaron B. Weast et al.

Application No.: 14/194,191

Confirmation No.: 6633

Filed: February 28, 2014

Art Unit: 3764

For: Wearable Device Assembly Having Athletic
Functionality and Streak Tracking

Examiner: G. E. Richman

AMENDMENT UNDER 37 CFR § 1.312

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In response to the Notice of Allowance mailed October 02, 2015, please amend the above-identified application as follows. The Commissioner is hereby authorized to charge any fees due or credit any overpayment to Deposit Account No. 19-0733.

Amendments to the Claims begins on page 2 of this paper.

Remarks/Arguments begin on page 5 of this paper.

Amendments to the Claims

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1. (Original) A method, comprising:
receiving athletic activity data from a device configured to be worn by a user;
receiving an activity time period;
receiving a first activity goal for the activity time period;
determining, at a processor, whether the received athletic activity data exceeds the first activity goal for a predetermined number of consecutive activity time periods; and
presenting a streak reward to the user when the received athletic activity data exceeds the first activity goal for the predetermined number of consecutive activity time periods.
2. (Original) The method of claim 1, further comprising:
determining a number of activity points earned by the user in accordance with the received athletic activity data.
3. (Original) The method of claim 1, wherein the device is a wrist-worn monitoring device.
4. (Original) The method of claim 1, further comprising:
providing a first application interface configured to communicate athletic activity data to the user, wherein the interface includes one or more functions configured to be invoked for at least the device.
5. (Original) The method of claim 4, wherein a portion of the first application interface is configured to provide a visualization of athletic activity data, and wherein different visualizations are provided in accordance with a user's progress toward completing the first activity goal.

6. (Original) The method of claim 4, wherein a portion of the first application interface is configured to provide a visualization of athletic activity, and wherein different visualizations are provided in accordance with a user's progress toward achieving or extending an activity streak.

7. (Currently Amended) The method of claim 1, further comprising:
receiving a second activity goal for the activity time period; and
determining, at a processor, whether the received athletic activity data exceeds the second activity goal for a predetermined number of consecutive activity time periods.

8. (Original) The method of claim 1, wherein presenting a streak reward further comprises providing the user with at least one of a new image, a new color, or a new function to be utilized in accordance with and application interface.

9. (Original) The method of claim 4, wherein the first application interface is further configured to communicate content to the user indicating that a streak reward is available upon performing a specified athletic activity.

10. (Original) The method of claim 1, wherein presenting a streak reward to the user further comprises:

transmitting, to the device, content indicating that an activity streak has been achieved or extended by the user.

11.-16. (Cancelled)

17. (Original) A non-transitory computer-readable medium containing computer-executable instructions for causing a computer device to perform the steps of:

receiving athletic activity data from a device configured to be worn by a user;

receiving an activity time period;

receiving an activity goal for the activity time period;

determining whether the received athletic activity data exceeds the activity goal for a predetermined number of consecutive activity time periods; and

presenting a streak reward to the user when the received athletic activity data exceeds the activity goal for the predetermined number of consecutive activity time periods.

18. (Original) The computer-readable medium of claim 17, further containing computer-executable instructions to cause the computer device to provide a first application interface configured to communicate athletic activity data to the user, wherein a portion of the first application interface is configured to provide a visualization of athletic activity, and wherein different visualizations are provided in accordance with a user's progress toward achieving or extending an activity streak.

19. (Original) The computer-readable medium of claim 17, further containing computer-executable instructions to cause the computer device to determine whether the received athletic activity data exceeds the activity goal for a greater number of consecutive activity time periods than the predetermined number of consecutive activity time periods.

20. (Original) The computer-readable medium of claim 17, wherein presenting a streak reward to the user includes transmitting, to the device, content indicating that an activity streak has been achieved or extended by the user.

REMARKS

Entry of the amendment herein prior to issuance is respectfully requested. The above amendment inserts the term “and” that is missing in dependent claims 7. No new matter is added by the above amendment, and no new issues are raised. Applicants respectfully submit that the claims remain in condition for allowance. The Examiner is invited to contact the undersigned should it be deemed necessary to facilitate prosecution of the application.

Respectfully submitted,
BANNER & WITCOFF, LTD.
