

```

1  #include <iostream>
2
3  int main() {
4
5      //initialize variables
6      std::string a;
7      std::string b;
8
9      //define variables
10     std::cout << "Enter the first day this week you exceeded an
11     exercise goal\n";
12     std::cin >> a;
13
14     std::cout << "Enter the second day this week you exceeded an
15     exercise goal\n";
16     std::cin >> b;
17
18     //process variables
19     if ((a == "Monday") && (b == "Tuesday")) {
20
21         std::cout << "A Streak Reward\n";
22
23     };
24
25     return 0;
26
27 }

```
