Trampoline and family not included

Trampoline owners can finally surround their trampolines with
360° of protection - The JumpCourt™ safety enclosure system,
from JumpSport.

Millions of families in the United States own trampolines, but virtually none of them have a safety device to keep jumpers from falling off. Fall-off injuries account for about 80% of the total injuries from trampoline use. The U.S. Consumer Product Safety Commission estimated that there were over 83,000 injuries in 1996 directly resulting from trampoline use . . . and this number only accounts for injuries treated in hospital emergency rooms, not the many thousands of less severe injuries.

How many families do you know who have had a trampoline, only to get rid of it because the kids lose interest? By having both a dynamic play surface (the trampoline) plus an enclosed space (inside the JumpCourt™ fence), there are now infinite possibilities for new and creative fun. JumpSport's Game Paks™, AIR JAM™ Basketball Hoop, and other accessories provide years of play for everyone in the family, not just the kids.

For about the same price as an average mountain bike, which fits only one family member, the JumpCourt™ fits the entire family. It's a great way for the family to have fun together.

Features:

- Fits 12' to 14' round trampolines from all major manufacturers
- Mounts on the trampoline without frame modification.
- New, technologically-advanced net material has superior tensile strength.
- Unique independent suspension system allows net to cushion and absorb impact from falls
- Overlapping entry permits continuous access while maintaining 360° of protection
- Designed with safety, durability, and fun in mind.
- Design permits use of JumpSport-approved Game Pak™ activities, as well as JumpSport's AIR JAM™ Basketball Hoop and other accessories.
- All parts designed to withstand UV and weather exposure.
- Steel poles are galvanized inside and out, for corrosion-resistance.
- Shock-absorbing padded poles flex on impact.
- JumpSport offers a 2-year, no-hassle, limited warranty.
- Easily assembled with small hand tools.

- Overlapping entry permits continuous access while maintaining 360° of protection
- Designed with safety, durability, and fun in mind.
- Design permits use of JumpSport-approved Game Pak™ activities, as well as JumpSport's AIR JAM™ Basketball Hoop and other accessories.
- All parts designed to withstand UV and weather exposure.
- Steel poles are galvanized inside and out, for corrosion-resistance.
- Shock-absorbing padded poles flex on impact.
- JumpSport offers a 2-year, no-hassle, limited warranty.
- Easily assembled with small hand tools.
- JumpCourt™ unit includes video plus printed assembly and safety instructions

Benefits:

- Substantially reduces the single biggest risk of injury on a trampoline-the risk of falling off. Comprehensive studies show that 80% of all trampoline injuries result from such falls.
- Adds both security and fun to your trampoline at the same time. No other safety device can make that claim.
- Extends the useful life of the trampoline. JumpSport's line of accessories brings infinite variety of fun, making the family trampoline the center of family activity-a play structure for the whole family.
- Makes the trampoline fun for people of all ages.
- Gives kids a fun, healthy alternative to television, computers, and video games
- Provides organized games, to help guide children into safe, structured play, and keeps them in their own backyards.
- Encourages development of proper trampoline skills
- Acts as a security fence to keep unsupervised and unauthorized users off of the trampoline

Testimonials:

Dr. Neal Frager, M.D., Santa Clara, California: "As a doctor, I never considered purchasing a trampoline because of the risks of injury associated with falling off. But the introduction of the JumpCourt™ safety enclosure has changed my outlook-to the extent that we now have a JumpCourt™ set up in our backyard. And I can tell you as a father that this is by far the most fun and exciting play structure we could ever own. We use it nearly everyday. Besides all of the fun that we have together, it gives a tremendous aerobic workout . . . and, like most adults, that's one thing I need more of than the children!"

Dr. Richard Blankenbecler, Ph.D. Physics, Stanford University, Palo Alto, California: "JumpSport has paid careful attention to the engineering details of the JumpCourt™ such as flexibility, strength, and the design of the suspension for the safety netting. The total system has the ability to absorb the forces of impact and to smoothly return the user to the trampoline surface."

Mark Young: Coach of 1996 Olympic Gymnastics Gold Medal-Winner Amy Chow: "A trampoline is one of the best ways to develop endurance, strength, spatial awareness, and balance, but it can also be a source of serious injuries, especially from falling off. I often use the trampoline to teach gymnastics skills to athletes. When kids first come into the gym, they almost always ask: 'When can I go on the trampoline?' Right from the start, our gym kids learn proper, safe use of the trampoline. I know that being a trampoline owner,

Mark Young: Coach of 1996 Olympic Gymnastics Gold Medal-Winner Amy Chow: "A trampoline is one of the best ways to develop endurance, strength, spatial awareness, and balance, but it can also be a source of serious injuries, especially from falling off. I often use the trampoline to teach gymnastics skills to athletes. When kids first come into the gym, they almost always ask: 'When can I go on the trampoline?' Right from the start, our gym kids learn proper, safe use of the trampoline. I know that home trampolines have become very popular, so I'm concerned that children at home may not be getting proper training and supervision, which makes safety an even bigger issue. Most users are not properly trained and don't have adequate spotting available. But now, with the JumpCourt™ safety enclosure, homeowners can have "spotters" on duty around the tramp at all times. I think that this is one of the most important safety devices to come along. It's long overdue!"
