**Trademark/Service Mark Statement of Use
(15 U.S.C. Section 1051(d))**

To the Commissioner for Trademarks:

MARK: VECTOR GAIT AND SAFETY SYSTEM(Standard Characters, see <http://tsdr.uspto.gov/img/85822129/large>)

SERIAL NUMBER: 85822129

The applicant, Bioness, Inc., having an address of
25103 Rye Canyon Loop
Valencia, California 91355
United States

is submitting the following allegation of use information:

For International Class 010:

Current identification: Physical rehabilitation, physical therapy and sports medicine apparatus designed to provide body weight support to a patient during training exercises

The mark is in use in commerce on or in connection with all of the goods/services, or to indicate membership in the collective organization listed in the application or Notice of Allowance or as subsequently modified for this specific class.

The mark was first used by the applicant, or the applicant's related company, licensee, or predecessor in interest at least as early as 04/00/2013, and first used in commerce at least as early as 04/00/2013, and is now in use in such commerce. The applicant is submitting one specimen for the class showing the mark as used in commerce on or in connection with any item in the class, consisting of a(n) selected pages from Clinician's Guide delivered with Applicant's product.

The applicant is not filing a Request to Divide with this Allegation of Use form.

A fee payment in the amount of \$100 will be submitted with the form, representing payment for the allegation of use for 1 class.

Declaration

Applicant requests registration of the above-identified trademark/service mark in the United States Patent and Trademark Office on the Principal Register established by the Act of July 5, 1946 (15 U.S.C. Section 1051 et seq., as amended). Applicant is the owner of the mark sought to be registered, and is using the mark in commerce on or in connection with the goods/services identified above, as evidenced by the attached specimen(s) showing the mark as used in commerce.

The undersigned, being hereby warned that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. Section 1001, and that such willful false statements may jeopardize the validity of the form or any resulting registration, declares that he/she is properly authorized to execute this form on behalf of the applicant; he/she believes the applicant to be the owner of the trademark/service mark sought to be registered; and that all statements made of his/her own knowledge are true; and that all statements made on information and belief are believed to be true.

Introduction

Introduction of Vector Gait and Safety System™

The Vector Elite is a body weight support system designed to accelerate physical rehabilitation of patients with severe gait or balance impairment. The system provides dynamic body weight support and trolley tracking, enabling the patient to practice gait and balance training with less than a full body weight. When using the Vector Elite System a computer controlled motor keeps the trolley at a desired location relative to the patient, and a separate computer controlled motor ensures that the rope tension is kept at a desired value. The patient may walk along a predetermined path or on a treadmill. The system receives control signals through an encrypted WiFi signal from a PC or remote control.

Figure 1-1: Vector Elite Trolley

Device Description:

The Vector Elite System consists of a mechanical track, power rail, power station, motorized trolley with rope, spreader bar, PC computer with proprietary software and an optional remote control.

Mechanical Track and Power Rail

The mechanical track is mounted overhead, typically attached to a support beam, floor or truss, and the trolley runs along the track. The mechanical track defines the horizontal aspect of the walking path of the patient. The track includes straight and curved portions that form a closed loop track.

The power rail is also mounted overhead, and runs parallel to the mechanical track. The power rail delivers electricity to the Elite trolley.

Launching the Vector Gait and Safety Software

1. To launch the Vector Elite Software click on the icon labeled “Vector Gait and Safety System” located on the computer screen.
2. The Login screen will appear, enter in your username and password. Click on the green arrow to login and proceed to the Main Menu. See Figure 4-2.

Note: Login username will be set up when the administrator creates new user accounts.

Figure 4-2: Login Screen

3. After logging into the software the Main Menu screen will appear. See Figure 4-3. There are four menu options to choose from on the Main Menu screen:
 - Patient Training menu – This option is to access the patient database, create a new patient account and start a training session.
 - Manual Control menu – This option allows the clinician to control the Vector Elite Trolley manually without needing to select a patient account.
 - Summaries menu – This option allows the clinician to view a patient's training history data.
 - Reference Library menu- This is the location of training videos of examples of patients using the product and of the Vector Elite Clinician's Guide.

Note: Log-out arrow is used to return to the login screen. Use after a session has ended.

Note: You can always quit the Vector Elite software any time by simply clicking on the 'X' mark in the upper right hand side of the screen.
