The TUS eCall IVS module contains the following main function blocks: □ **Network Access Device** NAD, GSM/GPRS □ GNSS: GPS receiver (positioning) □ uController control unit □ External GSM/GPS antenna □ SIM card interface (common SIM cards will be used) □ Human interface (Push buttons, etc.) □ Car interface (CAN bus, Power supply) □ Audio interface (microphone and speaker) □ Sensors for crash detection (Inertial, Gyro, Compass, etc.) Existing third party eCall modem is used.

Once the enforcement module analyses compliance, it will contact the corresponding **Network Access Device** (NAD) with the access response; granted or not; and with the access right to apply to the client.

Related to *Network Access Device*

Access Device (/dictionary/access-device) means a card, plate, code, account number, personal identification number, electronic serial number, mobile identification number, or other telecommunications service, equipment, or instrument identifier or means of account access that alone or in conjunction with another device may be used to:

Network Interface Device (/dictionary/network-interface-device) or "NID" is a Network Element (including all of its features, functions and capabilities) that includes any means of Interconnection of End User Customer premises wiring to Qwest's distribution plant, such as a cross connect device used for that purpose. "New Service Provider" means the Party to which an End User Customer switches its local Exchange Service or the Party to which an End User Customer is porting its telephone number(s).

Switched Access Detail Usage Data (/dictionary/switched-access-detail-usage-data) means a category 1101xx record as defined in the EMI iconectiv Practice BR 010-200-010.

Access Channel (/dictionary/access-channel) means any Channel, or portion thereof, designated for Access purposes or otherwise made available to facilitate or transmit Access programming or services.

Access Card (/dictionary/access-card) means an ATM card, debit card or credit card and includes our Visa Card

Network User (/dictionary/network-user) means a customer or a potential customer of a transmission system operator, and transmission system operators themselves in so far as it is necessary for them to carry out their functions in relation to transmission;

Broadband Internet access service (/dictionary/broadband-internet-access-service) means a mass-market retail service by wire or radio that provides the capability to transmit data to and receive data from all or substantially all Internet endpoints, including any capabilities that are incidental to and enable the operation of the communications service, but excluding dial-up Internet access service. This term also encompasses any service that the State finds to be providing a functional equivalent of the service described in the previous sentence, or that is used to evade the protections set forth in this section.

Carrier Access Billing System (/dictionary/carrier-access-billing-system) ("CABS") is the system which is defined in a document prepared under the direction of the Billing Committee of the OBF. The CABS document is published by Telcordia in Volumes 1, 1A, 2, 3, 3A, 4 and 5 as Special Reports SR-OPT-001868, SR-OPT-0011869, SR-OPT-001871, SR-OPT-001872, SR-OPT-001873, SR-OPT-001874, and SR-OPT-001875, respectively, and contains the recommended guidelines for the billing of access and other connectivity services. Sprint's carrier access billing system is its Carrier Access Support System (CASS). CASS mirrors the requirements of CABS.

internet access service (/dictionary/internet-access-service) means a publicly available electronic communications service that provides access to the internet, and thereby connectivity to virtually all end points of the internet, irrespective of the network technology and terminal equipment used.

ACD (/dictionary/acd) means Threadneedle Investment Services Limited, the authorised corporate director of the Company.

Connectivity (/dictionary/connectivity) means the physical and logical interconnection to the TELVIVA System (including via third party data telecommunications networks) as may be specified by TELVIVA to access and use the Communication Services, including the type and bandwidth of the relevant access circuit;

Interface (/dictionary/interface) means the mixture occurring in pipeline operations between adjoining batches having similar or dissimilar physical characteristics.

Backflow prevention device (/dictionary/backflow-prevention-device) means a safety device used to prevent pollution or contamination of the water supply due to the reverse flow of water from the irrigation system.

Network Load (/dictionary/network-load) means the load that a Network Customer designates for Network Integration Transmission Service under Tariff, Part III. The Network Customer's Network Load shall include all load (including losses, Non-Dispatched Charging Energy, and Load Serving Charging Energy) served by the output of any Network Resources designated by the Network Customer. A Network Customer may elect to designate less than its total load as Network Load but may not designate only part of the load at a discrete Point of Delivery. Where an Eligible Customer has elected not to designate a particular load at discrete points of delivery as Network Load, the Eligible Customer is responsible for making separate arrangements under Tariff, Part II for any Point-To-Point Transmission Service that may be necessary for such non-designated load. Network Load shall not include Dispatched Charging Energy. Network Operating Agreement:

Access control (/dictionary/access-control) means a system for allowing only approved individuals to have unescorted access to the security zone and for ensuring that all other individuals are subject to escorted access.

public telecommunications network (/dictionary/public-telecommunications-network) means the public telecommunications infrastructure which enables signals to be conveyed between defined network termination points by wire, by microwave, by optical means or by other electromagnetic means;

Satellite (/dictionary/satellite) means any satellite owned by the Issuer or any of its Restricted Subsidiaries and any satellite purchased by the Issuer or any of its Restricted Subsidiaries pursuant to the terms of a Satellite Purchase Agreement, whether such satellite is in the process of manufacture, has been delivered for launch or is in orbit (whether or not in operational service).

Integrated Services Digital Network (ISDN) (/dictionary/integrated-services-digital-network-isdn) means a switched network service that provides end-to-end digital connectivity for the simultaneous transmission of voice and data. Basic Rate Interface-ISDN (BRI-ISDN) provides for a digital transmission of two (2) 64 Kbps bearer channels and one (1) 16 Kbps data channel (2B+D).

Digital network (/dictionary/digital-network) or "network" means any online-enabled application, software, website, or system offered or used by a transportation network company that enables the prearrangement of rides with transportation network drivers.

Customer Application (/dictionary/customer-application) means the application form for the supply by the Company of the Equipment and/or Services, completed by, or in accordance with an order from, the Customer;

Network Upgrades (/dictionary/network-upgrades) means modifications or additions to transmission-related facilities that are integrated with and support the Transmission Provider's overall Transmission System for the general benefit of all users of such Transmission System. Network Upgrades shall include:

Communications Network (/dictionary/communications-network) means a data communication system, which allows a number of independent devices to communicate with each other, including its internal bridges and the workstations physically attached to it.

Online Services (/dictionary/online-services) means Microsoft-hosted services to which Customer subscribes under this Agreement. It does not include software and services provided under separate license terms.

Smart Meter (/dictionary/smart-meter) means a meter which tells us how much Energy you are using without us having to visit your home and which enables you to see how much Energy you are using;

Client Application (/dictionary/client-application) means an application developed by Licensee that a) utilizes the Runtime Product, b) is installed fully on an end user's machine, with all report processing local to that machine, and c) adds significant and primary functionality to the Runtime Product.

User Interface(s) (/dictionary/user-interfaces) means any technologies that (a) Licensee owns and/or for which Licensee has secured an appropriate license/subscription and (b) is/are used to develop/manage user interaction features and characteristics for ERP. Solely for clarity regarding ERP licensing requirements under a contract, User Interfaces for ERP shall be deemed part of ERP and therefore require human users Using ERP via such User Interfaces to have a "Named User" and/or "User" license for ERP, as applicable.
