Documentation

If you are new to Snort we suggest that you start with the [Snort Manual](#) - the official documentation authored by the Snort Team. In addition to official documentation the open source community has contributed a wide array of documentation based on their experience using Snort. Contributed documentation includes:

- Set-up guides: These how-to guides deal with installing Snort in specific scenarios. These are useful for installation on specific operating systems or when you're configuring Snort with other open source applications such as Snorby, Sguil, Oinkmaster, etc.
- Translated documents: The Snort community has provide translated [Snort documentation](#) in ten languages.

For a full list of documents please visit [Docs](#)

Additional Resources

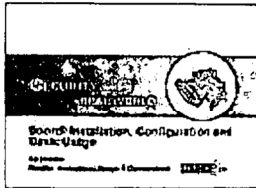

In addition to the documents discussed above, the Snort Community is often the best resource to answer questions about your installation. In many cases it has already been answered on the Snort-Users Mailing List. It is **highly** recommended that you join the Mailing List and Groups.

To join snort-users or just peruse the archives visit [Mailing Lists](#)

To join the Snort Google Groups, visit [Groups](#)
