

DECLARATION OF MARTIN L. KNOTT

Declaration of Martin L. Knott Regarding
Authentication and Public Accessibility of Publication

I, Martin L. Knott, declare as follows:

1. I am a librarian and Metadata and Linked Data Strategist within the University of Michigan Library's Technical Services Department, located at 913 S. University, Ann Arbor, MI 48109-1190. I hold a Master of Science in Information from the University of Michigan, where I studied library and information science. I joined the University Library in August of 1992. Through the course of my employment and based on the University Library's business records, I have personal knowledge of the University Library's normal business practices, including during the time period starting in the early 2000s. The University Library's normal business practices, which follows standard library practices, are described in further detail below.

2. This Declaration relates to the dates of receipt and public availability of the following:

Rabaey, J. M., Chandrakasan, A. P., & Nikolić, B. (2003). *Digital integrated circuits : a design perspective*. (2nd ed.). Upper Saddle River, N.J. : Pearson Education.

3. Standard operating procedures for materials at the University of Michigan Libraries. During the early 2000s and through the present, when a journal volume or other publication was or is received by the University Library, it would be checked in, inscribed with the date of receipt, added to library holdings records, and made available to library patrons or visitors (*i.e.*, the general public) for review, photocopying, and/or

Declaration of Martin L. Knott Regarding
Authentication and Public Accessibility of Publication

borrowing as soon after its arrival as possible. This procedure normally took a few days or as long as 4 months when there were high numbers of new materials in the workflow.

4. The image attached to this Declaration is a true and accurate copy of *Digital integrated circuits* with a University Library date inscription of January 20, 2003 from the University of Michigan Library collection. The date inscription on the page following the title page indicates that *Digital integrated circuits* was received by the University of Michigan Library Technical Services located in the Harlan Hatcher Graduate Library on January 20, 2003. *Digital integrated circuits* was purchased for and transported to the Media Union Art, Architecture & Engineering Library, one of several University of Michigan campus libraries, for user access.

5. Based on the information in the attached image, it is clear that *Digital integrated circuits* was received by the Art, Architecture & Engineering Library on January 20, 2003, and was catalogued and available to the public within a few days or at most 4 months later, after which the public could search for it by at least subject matter, title, author, year, and/or topic in the University Library's online catalog.

I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

Declaration of Martin L. Knott Regarding
Authentication and Public Accessibility of Publication

Date: March 19, 2019

*To Kathelijn, Karthiyayani, Krithivasan,
and our Parents*

"Qu'est-ce que l'homme dans la nature?

Un néant a l'égard de l'infini,

un tout al l'égard du néant,

un milieu entre rien et tout."

"What is man in nature?

Nothing in relation to the infinite,

everything in relation to nothing,

a mean between nothing and everything."

Blaise Pascal, *Pensées*, n. 4, 1670.

Maintaining the Spirit of the First Edition

While maintaining the spirit of the original design, we have been inspired by the spirit of the original design. The result is a design that is both functional and aesthetically pleasing. The design is based on a solid understanding of the principles of design and the use of color and typography. The design is a testament to the power of design to create a lasting impression. The design is a testament to the power of design to create a lasting impression. The design is a testament to the power of design to create a lasting impression.

Contents

	Preface	vii
Part 1	The Fabrics	1
Chapter 1	Introduction	3
1.1	A Historical Perspective	4
1.2	Issues in Digital Integrated Circuit Design	6
1.3	Quality Metrics of a Digital Design	15
1.3.1	Cost of an Integrated Circuit	16
1.3.2	Functionality and Robustness	18
1.3.3	Performance	27
1.3.4	Power and Energy Consumption	30
1.4	Summary	31
1.5	To Probe Further	31
	Reference Books	32
	References	33
Chapter 2	The Manufacturing Process	35
2.1	Introduction	36
2.2	Manufacturing CMOS Integrated Circuits	36
2.2.1	The Silicon Wafer	37
2.2.2	Photolithography	37
2.2.3	Some Recurring Process Steps	41
2.2.4	Simplified CMOS Process Flow	42
2.3	Design Rules—The Contract between Designer and Process Engineer	47
2.4	Packaging Integrated Circuits	51
2.4.1	Package Materials	52
2.4.2	Interconnect Levels	53
2.4.3	Thermal Considerations in Packaging	59
2.5	Perspective—Trends in Process Technology	61
2.5.1	Short-Term Developments	61
2.5.2	In the Longer Term	63
2.6	Summary	64
