August 05, 2020

Lemko is delighted to congratulate ADAK Eagle Enterprise for 10 years of continued cellular operations in ADAK island, the southernmost town in the state of Alaska and near the Russian end of the [Aleutian Islands](#) arc. Adak Eagle Enterprise has deployed Lemko's Node1™ system to offer 2G & 3G cellular services with roaming to a Tier1 carrier in US using Lemko's Node2™.solution.

Lemko's unique distributed architecture provides ADAK Eagle Enterprise with the most economical cellular platform to operate in Adak Island in Alaska. One of the key attributes of Lemko's Node1™ is the ability to serve the customers in a remote island with only a VSAT connection to mainland.

"Lemko Solution has helped us to provide a dependable and affordable cellular service in the town of Adak which persistently has overcast skies, moderated temperatures, high winds and frequent [cyclonic storms](#). Lemko solutions has help us serve our 2G & 3G cellular customers in this challenging environment" said Andilea Weaver, vice-President at Adak Eagle Enterprise, LLC.

Lemko's Node1™, is an IP software solution that fully distributes the core functions of a cellular system pushing it to the networks' edge co-locating it with the cellular base stations. Its Linux based mobile infrastructure delivers tremendous cost savings due to reductions in various operational costs.

About Lemko

Lemko Corporation provides the world's only cellular voice and broadband mesh software-defined network. This innovation switches and routes voice and data at the network's edge. Lemko's Node1™ was developed to deliver cellular telephony to rural communities throughout the world. This technology is also used to provide communication solutions for homeland security, emergency response, and continuity of business and government operations. Lemko is headquartered in Schaumburg, Illinois.
