

DECLARATION OF MARTIN L. KNOTT

Declaration of Martin L. Knott Regarding
Authentication and Public Accessibility of Publication

I, Martin L. Knott, declare as follows:

1. I am a librarian and Metadata and Linked Data Strategist within the University of Michigan Library's Technical Services Department, located at 913 S. University, Ann Arbor, MI 48109-1190. I hold a Master of Science in Information from the University of Michigan, where I studied library and information science. I joined the University Library in August of 1992. Through the course of my employment and based on the University Library's business records, I have personal knowledge of the University Library's normal business practices, including during the time period starting in the early 2000s. The University Library's normal business practices, which follows standard library practices, are described in further detail below.

2. This Declaration relates to the dates of receipt and public availability of the following:

Maziasz, R. L., & Hayes, J. P. (1992). *Layout minimization of CMOS cells*. Boston : Kluwer Academic Publishers.

3. Standard operating procedures for materials at the University of Michigan Libraries. During the early 1990s and through the present, when a journal volume or other publication was or is received by the University Library, it would be checked in, inscribed with the date of receipt, added to library holdings records, and made available to library patrons or visitors (*i.e.*, the general public) for review, photocopying, and/or

Declaration of Martin L. Knott Regarding
Authentication and Public Accessibility of Publication

borrowing as soon after its arrival as possible. This procedure normally took a few days or as long as 4 months when there were high numbers of new materials in the workflow.

4. The image attached to this Declaration is a true and accurate copy of *Layout minimization of CMOS cells* with a University Library date inscription of April 10, 1992 from the University of Michigan Library collection. The date inscription on the page following the title page indicates that *Layout minimization of CMOS cells* was received by the University of Michigan Library Technical Services located in the Harlan Hatcher Graduate Library on April 10, 1992. *Layout minimization of CMOS cells* was purchased for and transported to the Engineering Library, now named the Engineering Library, one of several University of Michigan campus libraries, for user access.

5. Based on the information in the attached image, it is clear that *Layout minimization of CMOS cells* received by the University of Michigan Library Technical Services on April 10, 1992, and was catalogued and available to the public within a few days or at most 4 months later, after which the public could search for it by at least subject matter, title, author, year, and/or topic in the Engineering Library's card and online catalogs.

I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like

Declaration of Martin L. Knott Regarding
Authentication and Public Accessibility of Publication

so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18
of the United States Code.
