Leading Business Portal to Leverage **DoDots** ' Unique Technology

REDWOOD CITY, Calif., March 13 /PRNewswire/ -- Excite@Home (Nasdaq: ATHM), the leader in broadband, today announced that it has licensed Dots(TM) technology from **DoDots** of Palo Alto, California. DoDot's unique technology will enable live web content to be created outside the browser, allowing users to access the Work.com service even when they are working in other applications.

A comprehensive set of Work.com Dots(TM) will be available on the Work.com site (www.work.com). With a single click of the mouse, users can access Dots(TM) that will help search and navigate the service. For example, users will be able to search for companies, news, and industries among other types of information from the Work.com dots. Because the dots are small in size, a user can have multiple dots open at the same time while taking up far less screen real estate than a single browser window at full screen. **DoDots** (TM) distribution infrastructure also allows Dots(TM) to be easily shared with others, much like e-mail messages, which will aid in the further distribution of Work.com Dots(TM).

"This is a valuable addition to Work.com's service," said David Williams, Work.com general manager, Excite@Home. " **DoDots** ' technology will make Work.com a more flexible tool in serving the needs of our business users."

Excite@Home and Dow Jones recently announced an agreement to form a new company, Work.com that will build on the existing business portal. The new company will leverage the portal experience of Excite and the premier business content of Dow Jones, building on the initial success of the existing Work.com and Dow Jones' dowjones.com.

About Excite@Home

Excite@Home, the leader in broadband, offers media services through the Excite Network (www.excite.com, www.bluemountain.com and other properties), and broadband subscription services through @Home (www.home.com) and @Work (www.work.home.net). The company has a worldwide footprint of 72 million cable homes under long-term contract. Excite@Home's MatchLogic division (www.matchlogic.com) offers marketers industry-leading digital advertising capabilities including rich media production, ad and email services, and database analysis all integrated into a complete solutions package.

About **DoDots**

Based in Palo Alto, Calif., **DoDots** was founded in early 1999 by John and George Kembel and Tony Medrano. The company is privately held, with initial funding from Softbank Venture Capital. More information is available at [www. DoDots .com](http://www.DoDots.com).
