Dear All,

I have attached the skeleton report (v1) for RAN2#99bis.

Note that the latest tdoclist is always available from the 3GPP portal (3GU):
<https://portal.3gpp.org/Home.aspx?tbid=373&SubTB=380>

The "Tdoc" logo generates and downloads a new version of the tdoclist. Until the start of the meeting, I will update this list regularly whenever I find errors in it, or I get tdoc revision requests. No notifications of those (numerous) tdoclist updates will be sent to the reflector.

When it comes to the skeleton report, I will update the report and send the new version to the reflector, with revision marks, possibly 2-3 times before the meeting starts.

BR,
Juha
