**Pioneering
wood joining**
simple ingenuity

Intelligent and innovative design with a significant impact!

We strive for new solutions in wood joining and processing technology that give our customers new freedom in design and production. Years of practical experience and close cooperation on development with our customers, combined with quick implementation mean that we are able to provide outstanding services while continually supporting and inspiring our customers in trade and industry.

Overview of fittings	101 – 102
-----------------------------------	-----------

Lamello Distribution Network

We are there for you

– worldwide!

Lamello, Bubendorf Switzerland

As a leading manufacturer of precision joining systems, Lamello sets new standards with the P-System when it comes to joining fittings and work pieces. The system's special feature is its form-locking anchorage that does not require the use of adhesive or screws. The great benefit for the customer lies in just how simple it is to install the fittings – taking just a few seconds without the need for tools. The versatile range of P-System fittings is continually being expanded with new, highly practical, innovative components which allow for an increasingly universal application of the system. Our customers in trade and industry benefit continually from the system's high functional efficiency and process cost efficiency.

«Successfully fostering practical innovation and creativity with and through our employees and business partners in order to create clearly identifiable value and advantages for our customers in trade and industry – benefits that facilitate sustainable growth for all involved.»

Erich Zeller CEO,
Susanne Affolter Owner Lamello AG

«Our work merges tradition and modernity. Lamello's innovative ideas meet this standard perfectly.»

Markus Faißt, Manager of Holzwerkstatt Markus Faißt in Hittisau, Austria

The name Lamello combines **Tradition and Innovation.**

We particularly value:

System solutions

We develop, produce and market intelligent, innovative systems and application solutions that have clear unique selling points and high user value for joining technology. We have an extraordinarily high standard of quality and place immense value on Swiss premium perfection and precision.

Customer focus

Lamello products pay for themselves! Our products should enable our customers to work more flexibly, productively and effectively. At Lamello, we don't take things for granted, but instead set out to impress and inspire our customers on a daily basis. Our system solutions and products should not only meet but exceed our customers' expectations.

Excellent quality

Our pursuit of outstanding quality is the foundation of our practices and defines the services we offer our customers. You can trust our highly trained, committed employees. We offer many years of experience in high-quality joining and woodworking technology and are equipped with state-of-the-art machinery.

Innovation

In addition to state-of-the-art technology, we also provide unique solutions – such as the P-System – that continue to amaze our customers. We set innovative market trends thanks to the extensive knowledge we have gathered over the years. By continually developing our products, services and processes, we guarantee our customers the lead in performance. This knowledge is complemented by a large dose of curiosity and a close relationship with our customers.

Durability and economy

When it comes to the development, construction and design of our products, we are uncompromising and we focus on practical solutions. The result is machinery characterised by its hard-wearing technology, sophisticated design and simple operation. Technology from Lamello gives you significant benefits in the face of global competition, maximises your productivity and opens up new horizons for design and creativity.

Environmental responsibility

Lamello products and system solutions are proven to be designed with durability and reliability in mind. This legendary durability helps to preserve precious resources and protects the environment by reducing waste. Moreover, we are constantly improving the energy efficiency of our company and our production processes. The high environmental standards at our production site in Switzerland also ensure careful use of resources – a considerable portion of which come from sustainable management.

P-System

«The time saved with the P-System convinced us from the start.»

Daniel Kofler, purchasing and sales at Kofler in St. Felix, Italy

Joining with the **P-System**

Form-locking, tool-free installation of Lamello P-System fittings

How it works

Advantages and properties

Fittings installation twice as fast

Save cost due to the fast installation of fittings by simply inserting the elements

Tool-less fittings installation

Very simple fitting installation by hand in the workshop or on site

Low packing volume

Stackable with pre-installed fittings brings advantages in packing and transport and allows for fast assembly on site

P-System

Fast installation

Inserting instead of screwing or glueing, within seconds and without waiting time means no waiting for adhesive to dry

Clamex P

Detachable connecting fitting

Detachable

Open the connection time and time again with the rotating lever

Page 18

Tenso P

Self-clamping fitting as glueing aid

Glueing

Fixed joints of two workpieces

Page 22

Divario P

Self-clamping, invisible fitting for slide insertion

Sliding insertion

Insertion between two fixed sides or shelves via a guiding groove

Page 24

Strong and form-locking

Form-locking anchorage across large surface areas ensures optimum tensile strength even with weaker materials

Lateral tolerance in P-System groove

The P-System allows both workpieces to be aligned perfectly flush

Shallow cutting depth

Minimal cutting depth with maximum tensile strength – ideal for connections with panels

No twisting

The positioning pins prevent twisting without the need for additional dowels

Aesthetic

The small, hardly visible opening ($\varnothing = 6 \text{ mm}$) serves to close and open the connector

High clamping force

Clamp and glue work pieces at any angle, ~ 80 kg

Stackable

Work pieces with pre-installed P-System fittings are stackable for storage and transport

Versatile

The shallow element depth allows for mitres from $22.5^\circ - 180^\circ$, surface, corner and dividing panel connections

Invisible

No visible fitting

High clamping force

Allows for perfect alignment and clamps the workpieces ~ 15 kg

Stackable

Work pieces with pre-installed P-System fittings are stackable for storage and transport

Flexible

The off-set groove allows center panel connections ($>19\text{mm}$) as well as joining varying panel thicknesses

Invisible

Guiding groove covers the fittings

Clamped joint

No resistance while inserting until shortly before building the clamping force

Fast installation

Quick installation of the fittings without glue after transport. Drill holes in the surface are possible with CNC without glue aggregates (eg. Nesting machines)

Assemble by sliding

Partially routed guiding groove for completely invisible furniture joints

P-System fittings

Clamex P-14

Detachable connecting fitting

Technical data

Size	66 × 27 × 9.7 mm
Cutter	Ø 100.4 x 7 x 22
Material of connector	fibreglass reinforced plastic
Material of lever	zinc die cast
Installation tolerance	longitudinal ± 1 mm

Tensile strength (N)

MDF	~ 900
Particle board	~ 800
Beech	~ 1'000

--------------------------	---------------

Bisco P-14

Aligning element suitable for Clamex P-14
and Tenso P-14

Advantages and properties

- **Ideal addition to Clamex P and Tenso P**, fits into the P-System grooves, **without requiring a different cutter**
- **Bisco P-14 is ideal for dry-assembly before glueing a joint with Tenso P-14**
- **For aligning P-System grooves**, aligning function without glue
- **Surface structure allows use as a connecting element** when glueing work pieces with PVA glue
- **Lateral tolerance** +/- 2mm

Applications of Bisco P

- Separation walls
- Furniture with large depth
- Glueing of work pieces

Bisco P-10

Aligning element suitable for Clamex P-10

Technical data

Size Bisco P-14.....	65 × 27 × 7 mm
Size Bisco P-10.....	52 × 19 × 7 mm
Cutter.....	Ø 100.4 × 7 × 22
Material.....	plastic
Installation tolerance.....	longitudinal ± 2 mm
Tensile strength with adhesive	~ 400 N ≈ 40 kg

Bisco P-14

Art.No.

Carton with 80 pieces	145301
Carton with 300 pieces	145302
Carton with 1000 pieces	145303

Bisco P-10

Art.No.

Carton with 80 pieces	145304
Carton with 300 pieces	145305

Application:

Clamex P – applications

Furniture manufacturing / Interior fitting

Your advantages with Clamex P

Aesthetic solution

– Differentiation to furniture standards

Stackable with pre-installed fittings

– Advantages in packaging, transport and logistics

Short assembly time on site

– Minimal installation cost

- | | |

Applications

wall elements | furniture | show cases | changing rooms |
stools | etc.

P-System fittings

Tenso P-14

Self-clamping fitting as gluing aid

Save time and money!

- No pressure marks and damaged areas on your work piece
- Work pieces are automatically in the correct angle
- Surplus glue can be easily wiped off
- Workpieces can be stacked or moved to temporary storage (no waiting time)

Save yourself from:

- Preparing clamps and protectors
- Needing an additional person holding the clamps and protectors
- Waiting time until the clamps can be removed

Important:

The aligning element Bisco P-14 is ideal to dry-assemble the joints before gluing

Technical data

Size.....	66 × 27 × 9.7 mm
Cutter.....	Ø 100.4 × 7 × 22
Material	fibreglass reinforced plastic
Installation tolerance	longitudinal ± 1 mm

Clamping force (N)

per fitting	~ 150

Carton with 300 pairs	145420
Carton with 1000 pairs	145431

Accessories can be found from page 90 onwards

Furniture manufacturing / Interior fitting

Your advantages with Tenso P-14

Fast glueing process

- Time saving without clamps and protectors
- Ship workpieces immediately after assembly, no waiting time for the glue to dry

Clamps the joint from the inside

- Clamping force perfectly perpendicular to the glue surface
- Glueing of shaped workpieces
- Simultaneously aligns and clamps

- | | |
|---|--|
| ✓  Glueing | ✓  Fast installation |
| ✓  Invisible | ✓  Strong and form-locking |
| ✓  High clamping force | ✓  Lateral tolerance in P-System groove |
| ✓  Stackable | ✓  Shallow cutting depth |
| ✓  Flexible | ✓  No twisting |

Applications

furniture | shelves | stools | sideboards | wardrobes | separating walls | cladding | decorative strips | covering panels | plinths | face frames etc.

Shop fitting

Your advantages with Tenso P-14

Stackable with pre-installed fittings

- Advantages in packaging, transport and logistics

Short assembly time on site

- Quick and easy glueing without additional aids
- Minimal installation cost

- | | |
|---|--|

Applications

furniture | shelves | stools | sideboards | wardrobes | show cases | sales counters | separating walls | cladding | face frames etc.

P-System fittings

Divario P-18

Self-clamping, invisible fitting for slide insertion

Groove with Zeta P2 / CNC

Cut P-System groove

Insert Divario P-18

Drive in the positioning pin

Drill holes Ø 8mm

Insert Divario P-18

Insert the shelf

Clamped invisible joint

Advantages and properties

- **Completely invisible joint** for highest quality standards
- **Joins and clamps** during insertion for perfectly closed joints
- **Efficient machining and installation** with a CNC or a Zeta based on the P-System
- Narrow element for the use in **shelves from 19 mm**
- No resistance while inserting until shortly before building the clamping force
- **Insertion of shelves** after transport for lower transport weight

Technical data

Half for P-System groove 65 × 16 × 9.7 mm
 Half for drill holes Ø 8 × 9 mm, distance 32 mm
 Cutter Ø 100.4 × 7 × 22
 Material fibreglass reinforced plastic
 Installation tolerance longitudinal ± 1 mm

Load per fitting (N)

	19 mm	22 mm	25 mm	30 mm
Particle board	500	600	700	1000
MDF	600	700	800	1000
Spruce	800	900	1300	1400
Beech	1700	2000	2000	2000

Tensile strength (N)

all materials 600

Divario P-18

	Art.No.
Carton with 80 pairs	145550
Carton with 300 pairs	145560
Carton with 1000 pairs	145570

Divario P-18 Installation tool **125500**
 to insert the fittings and drive the positioning pins into the wood

Accessories can be found from page 90 onwards

Furniture manufacturing / Interior fitting

Your advantages with the Divario P-18

Efficient installation

- Fitting to insert by hand or install by hammer
- Fixing pins to drive into the wood for efficient installation
- Drilling into the surface possible with a CNC machine without angle aggregates (e.g. nesting machines)
- Possible in the factory or on site with a CNC or a Zeta P2

Clamped joints

- Joint with high tensile strength
- Reinforcing tall cupboards with fixed shelves
- perfect look with closed joints
- No clamps or presses necessary

Sliding insertion in a second process

- The outer cabinet can be joined in a first process
- Transport of the empty cabinet to save weight
- Assembly of the complete furniture piece on site possible (flat pack)
- Insertion of the shelves without glue or clamping aids
- Detachable for transport

Sliding insertion

Invisible

Clamped joint

Fast installation

Assemble by sliding

Fast installation

Strong and form-locking

Lateral tolerance in P-System groove

Shallow cutting depth

No twisting

Applications

Cabinets, shelves, open room dividers, wine racks, side boards, cupboards, separating walls, showcases, hanging elements etc.

hülsta, D-48702 Stadthorn

Zeta P2

The machine for the evolving P-System, saving you time daily! Differentiate your products from the standard!

Exceptionally fast joining method with a power tool.
Make any corner joint in less than 2 minutes!

0:30

Cut four profile grooves with the Lamello Zeta. Fast and precise by applying on the work piece edge

1:05

Drill two holes with the drill jig, for all angles from 22.5 – 180°

1:35

Slide the P-System connectors into the profile groove by hand without tools!

1:45

Close with an allen key – Finished!

Lamello Zeta P2 is the right investment into your future

Time saving with every groove!

Improve your profit by lowering your labour cost!

Labour cost
30 – 40 % *

Other cost

*Source: VSSM, Schreinerei-Kennzahlen (Swiss wood working association, economic figures)

Very short setup time for all angles

- **Fast, easy and precise** working, with the well-established Lamello principle
- **Same cutting depth for both workpieces**, saves the time for changing the setting and makes mistakes less likely
- **Time saving when installing fittings** due to the innovative profile groove concept which saves labour cost as well as the cost for glue or screws
- **Future time saving** with every new joining element of the P-System family

Advantages in the production process

1. P-groove with Zeta P2

- Corner joint with 2 connectors in under 2 minutes
- Short setup time
- No side stops necessary, line up to the work piece edge or to the pencil mark

2. Storage

- Small storage volume due to stacking despite installed connector
- Take out the connector for surface treatment – fast and easy

Vertical mechanical drive (VMD)

Exterior flush mitre joints

Unique features

Profile groove function

The vertical mechanical drive (VMD) is the core of the machine and the key to the P-System, the new joining system with profile

During the cutting process the VMD moves the cutter up and down **automatically** for the profile cut.

– **Fast ~ 1 second**

– **User-friendly**

– triggers the **vertical movement automatically**

– **optical VMD control**

– **Safe process** using reliable, mechanical low-wear technology

– **Switch off the VMD** to use the machine as a standard biscuit joiner enabling 20 more applications (see page 44)

Technical data

Power 800 W

Voltage 230 V

Speed 9'000 min⁻¹

Cutter Carbide tipped profile groove cutter
Diamond tipped profile groove cutter
Ø 100 x 7 x 22 mm

Teeth Z3

Cutting depth max. 20 mm

Weight 3.7 kg

Zeta P2-Set

Art.No.

with carbide tipped profile groove cutter **101402**

with diamond tipped profile groove cutter **101402D**

Kit contains

– Zeta P2 with 800 W motor

– P-System cutter 7 mm

– Stop square

– Suction stub 23 mm

– Suction stub 36 mm

– Spacer 4 mm

– Spacer 2 mm

– Tools

– P-System drill jig incl. drill

– P-System angle disk

Accessories can be found from page 90 onwards

Rotatable depth adjuster for P-System depths

- **Depth 18** for Divario P-18
- **Depth 14** for Tenso P-14, Clamex P-14 and Clamex P Medius (larger side), Bisco P-14
- **Depth 10** for Clamex P-10 and Clamex P Medius (smaller side), Bisco P-10
- **Depth «off»** for groove millings without profile groove = for standard biscuit joiner

Clamex P-14

Clamex P Medius 14/10

Clamex P-10

Tenso P-14

Divario P-18

3. Delivery: in parts

- **Smaller transport volume** without damaging the work pieces
- Easy transport of the parts into the building (stairs, elevator)

4. Assembly on site

- **Fast and efficient assembly** with an allen key
- **No waiting time after clamping the glue joint**

P-System CNC

«With the P-System on our CNC machine we achieve a significant increase in productivity daily.»

from left to right: Nicolas Rassinfosse and Pierre Vereecken, directors of Modul 3 in Gembloux, Belgium

Joining with the **P-System** **CNC technology**

CNC partners

Design and production software, aggregates, cutting tools and CNC machining – these companies assist you with the efficient manufacturing with the P-System:

Partners for **CNC-technology**

Partners for **aggregates**

Partners for **software**

Partners for **tooling**

CNC machines

What setup do I need if I want to create P-System grooves with my CNC machine?

1. CNC machine

- Machine with 3/4/5 axes + angle aggregate

2. CNC software

- Purchase software/macro/component from the manufacturer or
- Program the macro yourself

3. Suitable angle aggregate

- Aggregate sub program

The angle aggregate also enables the P-System groove to be cut in the centre of the surface

An overview of other aggregates is available on our website: www.lamello.com

Attention: Get the approval to use the P-System cutter on the aggregate from the CNC manufacturer

4. P-System cutting tool

P-System CNC drill bit

P-System CNC drill bit	Art.No.
6 mm, solid carbide, for mitres, L = 100/35 mm, shaft = 10	131556

P-System CNC groove cutter

× 30 mm, 4 / 6.6 / DTK 48 mm, Z3	132142
× 30 mm, 4 / 6.6 / DTK 48 mm, Z6	132145
* Suitable for all cutter arbors listed below	
× 40 mm, 4 / 5.5 / DTK 52 mm, Z3	132143
E.g. for angle aggregates, Flex 5, Flex 5+	
× 16 mm, 4 / 5.5 / DTK 28 mm, Z3	132144
E.g. for corner notching aggregate	

* P-System CNC cutter arbors

P-System CNC cutter arbor 30 / DTK 48 mm	Art.No.
Shaft Ø 20 × 50, L = 102 mm	132150
Shaft Ø 25 × 60, L = 102 mm	132151
Shaft Ø 16 × 50, L = 85 mm	132152
Shaft Ø 16 × 55, L = 68 mm	132153
Shaft Ø 16 × 50, L = 85 mm, with clamping surface (2°- angle)	132154
E.g. for aggregate for door locks	
Shaft Ø 20 × 50, L = 85 mm, with clamping surface (2°- angle)	132155
E.g. for aggregate for door locks	

Possible combination of CNC machines and Zeta P2

Positioning pins for Zeta P2	Art.No.
Ø 5 mm, 1 pair	251048
Ø 8 mm, 1 pair	251066
Instead of using an angle aggregate, the Zeta P2 power tool can be used to cut the P-System groove in the centre of the surface. To do so, drill two 5 mm positioning holes spaced at 101 mm in the work piece surface using the CNC machine. These are required to align the Zeta P2 on the work piece.	

Requirements for CNC machines:

- Either the macro and component software for the desired angle are provided or you have programmed these yourself
- Aggregate sub program is available

Machine with 3 axes

+ 1 P-System cutter

Machine with 3 axes

+ Angle aggregate
+ 2 P-System cutters

Machine with 3 axes/4 axes

+ Manually adjustable swivelling aggregate
+ 1 P-System cutter

* Several tool changes required for angle cuts, drilling and P-System grooves

Tip: drilling can be performed using a manual drill jig

** Depending on the brand and model, it may not be possible to process the centre of the surface without an additional angle aggregate

Machine with 3 axes/4 axes

+ Automatically adjustable swivelling aggregate with tool changer

+ 1 P-System cutter

Advantages in the production process

1. P-System groove with CNC

- Same profile groove for both work pieces
- Short process time
- Less processing than for other connection methods
- Direct data transfer from CAD CAM

2. Storage

- Small storage volume due to stacking despite installed connector
- Shorter reaction time for the continuation of the next process

For more information, visit: www.lamello.com/p-system-cnc

Machine with 5 axes

+ 1 P-System cutter

** Depending on the brand and model, it may not be possible to process the centre of the surface without an additional angle aggregate

Machine with 5 axes

+ Angle aggregate

E.g. Corner notching aggregate

Aggregate for door locks

+ 2 P-System cutters

Positioning pins for Zeta P2
Art.No. 251048 (see page 36)

Tip: Instead of using an angle aggregate, the Zeta P2 power tool can be used to cut the P-System groove in the centre of the surface. To do so, drill two 5 mm positioning holes spaced at 101 mm in the work piece surface using the CNC machine. These are required to align the Zeta P2 on the work piece more on page 36

3. Delivery: in parts

- **Smaller transport volume** without damaging the parts
- Easy transport of the parts into the building (stairs, elevator)

4. Assembly on site

- 1. Easy assembly by customer possible**
- 2. Assembly by sales personnel or tradesman**
 - **Shorter assembly time on site**

Ideas for standardising the machining on a CNC machine

Depth 10 mm for all P-System grooves **in the surface**

Depth 14 mm for all P-System grooves **in the edge**

	Art.No.
Clamex P-14, element with the lever	
box with 2'000 pcs	145338
Clamex P-10, element without lever	
box with 2'000 pcs	145358
Clamex P-10, element Medius	
box with 2'000 pcs	145369

Ideal combination of CNC machines and Zeta P2

Positioning drill holes on a CNC

Combining strengths: Precise drilling on a CNC machine; use these drill holes to position the Zeta P2 to cut the P-System grooves.

This application is especially ideal for nesting machines, when the cost for an additional aggregate can't be justified or the machine cannot be upgraded anymore.

This method combines the precision and efficiency of a CNC machine and uses the simple and fast machining of a P-System groove with a Zeta P2.

Positioning pin Zeta P2	Art.No.
ø 5 mm.....	251048
ø 8 mm.....	251066

Advantages and properties
– Save time and money!
– Short setup time with a Zeta P2
– No specific angle aggregates, software or CNC tools necessary
– Precise positioning for center panels

Positioniong clip for Zeta P2	Art.No.
ø 5 mm.....	251067
For positioning in the Clamex access hole (5mm) available	

Cutting the groove in the surface

Drill the positioning holes with the CNC, $\varnothing 5 \text{ mm}$ / $\varnothing 8 \text{ mm}$

Hole pattern of the positioning drill holes

Insert the positioning pins in the Zeta P2

Position the machine in the drill holes

Cutting the groove in the edge

Drill the positioning hole with the CNC, $\varnothing 5 \text{ mm}$

Insert the positioning clip

Insert the positioning clip in the drill hole $\varnothing 5 \text{ mm}$

Cut the groove with the positioned machine

Lamello-System

«The Lamello original wood biscuits are simple to use, precise and ingenious!»

from left to right: Ivan Gehrig, production foreman and Daniel Hofer, market specialist and junior manager of Stöcklin kitchens, Switzerland

Joining with the **Lamello System**

Lamello-System

An exceptionally efficient, simple and precise joining system for panels

How it works

1. Cut grooves

2. Apply glue

3. Insert biscuits

4. Clamp work piece

The precise work results of the system and the long life of the power tools pay off

Advantages and properties

Fast – Lateral sliding tolerance

- **Easy positioning** of the machine to the pencil mark
- **No additional side stops or positioning aids necessary**
- **Great flexibility** when assembling, possibility to join panels by sliding together from different angles – not just perpendicular unlike dowels (see large picture left)

Easy – Same groove depth for both sides

- No changing of the cutting depth means **less room for error**
- **Saves time** with every joint

Precise – Established cutting principle with disc cutter

- Disc-shaped tools cannot bend or flex**
- **Always parallel, precise grooves** – despite wood knots or fast working
- **No tool change** for 13 different joining elements
- **Low maintenance cost** throughout the long life of the power tool, maintenance comprises **one cutting tool only**

Versatile – Thin flat joining element with minimal installation depth

- **Join thin work pieces** 8 or 10 mm in many various angles
- **Minimal material weakening**
- **Non-rotating, cost effective** joining elements

Original Lamello biscuit joiners

These properties make the difference

Multifunctional stop square included in the kit

Both sides flush surfaces on baseplate, swivelling front and stop square for efficient positioning of the biscuit joiner on the work piece's outer edge

Vertical stability by attaching to the baseplate to increase the surface

Perfect precision of mitres by applying on the outer surface for 22.5 and 45° angles

Variable positioning of the groove from the application surface 0–50 mm

Swivelling front with fixed rotational point

Exactly the same distance from both sides to the cutter = 8 mm

Allows alternating the application surface from the swivelling front 1. to the baseplate 2., especially important when cutting thin dividing panel connections

- **Safe process** guarantees always precise, parallel grooves
- **No inaccuracies or source of mistakes** because the height cannot be adjusted

Application with the swivelling front
With the 4 mm spacer for 12 mm dividing panel (groove in the centre)

Application with the baseplate
The dividing panel (moved by 4 mm) serves as application surface

High-precision machined application surfaces

- **CNC machined high-precision application surfaces** for exact application on the work piece

- **Long-life precision guide** provides exact, parallel grooves for perfect fit of the work pieces

Classic X

The original biscuit joiner for every workshop. Choose Lamello for precision, reliability, longevity and many other benefits

Swivelling front and base plate are flush

Central lock

Versatile applications

Joint with biscuits

Joint with Clamex S

Groove for Duplex-hinges

Advantages and properties

- **Powerful 780 W**, ergonomic slim shape
- **Base plate is flush on both sides for efficient positioning of the machine on the work piece**
- **High-precision machined guide and application surfaces for perfect fit of the work pieces** (see p 45)
- **Multifunctional stop square** (see p 45)
- **Versatile use**, with the possibility for 19 more applications (see p 42 – 43)
- **Swivelling front stop 0–90°** catching at 22.5°, 45°, 67.5°, 90°
- Rotating depth adjuster with **6 standard depths**

Technical data

Power	780 W
Voltage	230 V oder 120 V
Speed	10'000 min ⁻¹
Cutter	Carbide tipped cutter Ø 100 x 4 x 22
Teeth	Z6 (3+3) with reversing teeth
Cutting depth max.	20 mm
Weight	3.1 kg

Classic X

Art.No.

in wooden case	101600
in systainer	101600S
in carton	101600K

Kit contains

Classic X with:	– stop square
– carbide tipped cutter	– spacer 4 mm
– suction stub 36 mm	– set of tools

Accessories can be found from page 90 onwards

Top 21

The original biscuit joiner with height adjustable blade from the inventor of biscuit joiners. Choose Lamello for precision, reliability, longevity and many additional applications

Adjust groove to middle

Off-set work pieces

Double cut for Clamex S

Unique features

1. Height adjustable cutter

SMS: Step Memory System

- Scale +/- 2 mm in steps of 0.1 mm (total 4 mm)
- Adjust groove position to exact **center of the work-piece** (material thickness 8 – 24 mm)
- Easy joining of laterally **off-set workpieces**
- Double cut 2 x 4 mm **for Lamello Clamex S**
- **Expansion gaps** (adjustable from 8 to 12 mm) adjustable in steps of 0.1 mm
- Individual positioning of the groove

2. New baseplate

- Base plate, swivelling front stop and stop square are flush on both sides – **for efficient positioning of the machine on the edge of the workpiece**
- New multifunctional stop square with smooth running, precise guidance – **for quick, exact setting of the groove position**

3. Precision cutter

with 4 scoring teeth and hub

4. Including dust bag

and adapter Ø 36 mm

Clamex S connector

For aesthetic constructions. Demountable, flexible and easy. Installation in an 8mm groove with screws

Flexible

Stackable

Aesthetic

Detachable

Advantages and properties

- Detachable connections
- Aligns and connects, 2 functions in one
- Aesthetic joint due to the small hole for opening and closing
- Safe from twisting due to the aligning studs
- Flexible mitres in all angles
- Stackable, since no parts protrude from the surface, so ideal for flat packing
- Easy installation with any Lamello biscuit joiner

Applications of Clamex S

- Detachable furniture joints
- Surface, corner and dividing wall connections
- All angles
- Frame connections
- Dividing walls
- Glue aid

Technical data

Size.....	66 x 29 x 8 mm
Cutter.....	Ø 100 x 8 x 22
Material of connector.....	fibreglass reinforced plastic
Material of lever.....	zinc die cast
Installation tolerance	longitudinal ± 1.0 mm (max. ± 1.25 mm)

Clamex S-18	Art.No.
18 pairs	145231
80 pairs	145236
300 pairs	145241
1000 pairs	145251

Accessories can be found from page 90 onwards

How it works

Clamex S installation with cutter Ø 100 x 8 x 22 mm (Art.No.132108)

1. Cut groove, 8 mm

2. Drill hole 6 mm

3. Screw in the Clamex S

4. Connect, finished!

E20

The self-clamping element

E20-H

E20-L

Inserting E20-L

Inserting E20-H

Inserting E20-L

Advantages and properties

- **Connects and clamps** with one strike. The curved ridges clamp the connection together during insertion.
- Cut groove in both work pieces **simultaneously**
- **No clamps** – no waiting time
- Easy joining with a Lamello biscuit joiner

Applications of E20

- Door frames
- Furniture plinths
- Elongating of panels and profiles
- Ideal on site

Technical data

Size E20-L	56 x 11.5 x 4 mm

E20-L

1. Cut groove

2. Apply glue

3. Insert E20-L

4. Finished!

Fast

Detachable clip-in connector with self-cutting edges

Advantages and properties

- For workpieces such as covers, blinds or profiles **to clip-in**
 - Fast installation, no waiting time before continuing
 - Clip-in and detachable, **without lateral movement** (sliding)
- With installation tool and clip for cutting depth

Cutter	Size (mm)	Quantity	Art.No.
Ø 100 x 4 x 22	56 x 12.7 x 4	50 pair	145120

Metal

Heavy duty detachable slide-in connector with screw insertion

Advantages and properties

- For **detachable constructions** such as shelves, covers or as glueing aid
 - With **integrated stop** for blocking one side if required
 - **Adjustable joint pressure** due to screws
- Fast installation, no waiting time before continuing the work
- With 83 screws of each size 3 x 13 and 3 x 25, clip for cutting depth

Cutter	Size (mm)	Quantity	Art.No.
Ø 100 x 4 x 22	57.2 x 12.7 x 4	40 pair	145115

Champ

Slide-in connector to be glued with PUR glue

Advantages and properties

- **Glueing aid** for furniture when assembling mitres and corners
 - **Glue work pieces** with various shapes **without clamps**
 - Ideal for wood and all wood composites
- With installation template

Cutter	Size (mm)	Quantity	Art.No.
Ø 100 x 4 x 22	64 x 13 x 4	50 pair	145110

K20

Clamping element

Advantages and properties

- Clamping aid for work pieces which are difficult to clamp, e.g. screens, crown moulding etc.
- Use in combination with wooden Lamello biscuits.
- Made of plastic, barbed cross ribs for grip.

Cutter	Size (mm)	Quantity	Art.No.
Ø 100 x 4 x 22	60 x 24 x 4.5	80 pieces	145001
		250 pieces	145000

C20 / C10

Solid surface element

Advantages and properties

For joining solid surface materials such as Corian®, Varicor® etc. Made of translucent plastic

Cutter	Size (mm)	Quantity	Art.No.
C20 Ø 100 x 4 x 22	60 x 23 x 4	250 pieces	145010
C10 Ø 100 x 4 x 22	53 x 19 x 4	300 pieces	145012

Simplex

Detachable slide-in connector

Advantages and properties

Detachable, two part connector for ceiling panels, screens, shelves and general caseloads.

Install with insertion tool and two-part epoxy adhesive.

Made of aluminum

Cutter	Size (mm)	Quantity	Art.No.
Ø 100 x 4 x 22	54 x 23 x 4.1	50 pair	166101
		100 pair	166100
Inserting tool for Simplex (For accurate positioning of Simplex)			166110

Duplex

Furniture hinge

Advantages and properties

Aesthetic detachable hinges in two pieces.

Easy cutting with the biscuit joiner.

Material: nickel plated

Cutter	Version	Quantity	Art.No.

Invis Mx2

«I am impressed with the strength of this invisible connection. Even after we have repeatedly opened and closed the joint.»

Walter Fankhauser, Production Manager at Röthlisberger, Gohl Branch, in Emmental, Switzerland

Joining with the **Invis Mx2 System**

Magnet-driven connections with an even higher clamping force!

Invisible as if glued, versatile as if screwed!

60% higher clamping force
250 kg clamping force per connector
Even more applications

Invis Mx2-System

Powerful mechanical connections

Detachable within seconds

Completely invisible

No openings | no protective caps | no filler | **a perfect look!**

The MiniMag Mx2 drive opens or closes the connection
The speed of the cordless drill must be 1200-1500 rpm

Invis Mx2

The unique invisible connection for highest demands on aesthetics, stability and productivity

Drill the hole for the Invis Mx2 connector with ...

... the Rasto drill jig or a CNC machine

Fast and easy installation

Save time!

1.

2.

1. Screw the connector into the pre-drilled hole
2. Screw in the stud vertically using the insertion jig
3. Join and clamp the connection using MiniMag Mx2
4. If desired, open the connection by reversing the rotation of the cordless drill

3.

4.

Invis Mx2 insertion jig for	1 piece	6112333

Clamp

1. Clamp **high-gloss painted furniture** without causing damage | 2. Easily connect and clamp **moulded parts**
3. Prepare **stairs and handrails** in the workshop and connect them quickly on-site

Invisible

4. Install **wall elements** without any visible fasteners | 5. Connect and plaster **substructures** without needing to fill holes
6. Join **separation walls** without screw clamps

Detachable

7. Deliver **large furniture items** in parts and assemble them on-site in next to no time | 8. Join **table legs** without visible fasteners and unscrew them again if necessary
9. Quickly assemble and dismantle **trade fair stands**

Rasto

The drill jig allows for precise drilling without measuring or marking into any workpiece shape. It is ideal for Invis Mx and many other applications

How Rasto works

Drill precise and efficient holes without measuring or marking into any shape!

The Rasto concept uses positioning pins as stops instead of measuring the hole position. The holes always align perfectly because the position of the pins is not changed when drilling the second workpiece. The transparency allows for easy set up on the work piece or aligning to a pencil mark. Due to its approximately 180 positioning holes Rasto can be used for nearly any shape, thickness or size.

Advantages and properties

- Fast and precise holes
- Drill holes into all workpiece shapes
- Drill without measuring or marking
- Handles and 32mm hole rows
- Ideal for exact drilling of holes for Invis Mx elements and studs

Holes in the centre of 16 and 19 mm panels

Holes in the centre of any workpiece thickness

Mitre connections

Dividing wall connections

Furniture handle holes and 32 mm hole rows

32 mm hole rows by referencing from the last hole

8 mm or 12 mm hole rows by referencing from the last hole

Tables

1. Position the pins and drill the table leg

2. Screw in the connectors

3. Drill the table top using the same pin position

4. Screw in the studs

5. Connect using MiniMag Mx2

Handrails

1. Position the pins and drill the handrail

2. Screw in the connectors

3. Drill the opposite side using the same pin position

4. Screw in the studs

5. Connect using MiniMag Mx2

Basic

Mono

Duo

Applications of Rasto

- Kitchen bench tops
- Hand rails
- Corner connections
- All shapes and profiles
- Mitre connections
- Furniture
- Stairs
- Dividing wall connections
- Surface connections

Ø 12 mm **6100061**

Art.No.

Wood drill bit with centring tip for Rasto drill jig:

Ø 5 mm **6100160**

Ø 6 mm **6106161**

Ø 8 mm **6108060**

Ø 10 mm **6110162**

Ø 12 mm **6112060**

500 mm connection rod, two-part **6160601**

Fastening screw **6560450**

Invis Mx2 spacer for Rasto **6112331**

Invis Mx2 insertion bush for studs 14mm **6112330**

Joining with the **Glueing System**

An ingenious glueing system for strong joining: economical, ready to use, modularly expandible

How it works

1. Equipment ready

2. Attach required nozzle

3. Apply glue

4. Clean nozzle

Advantages and properties

Dosage

«Simply apply the desired amount»
Optimise glue application: precisely set the ideal quantity.

Exact

«Exactly where I want it»
Improve quality: precisely apply in the correct position, optimise joint strength

Efficient

«As fast as possible»
Save time: apply efficiently with the correct nozzle, minimise cleaning requirement

Glue applicators

LK 3, LK 5, LK 10

Glue applicator for water soluble glues

Nozzles for grooves

Nozzles for surfaces

Pointed nozzle

Nozzles for edges

Kit

LK 3

LK 5

LK 10

Advantages and properties

- **Stainless steel pressure tank** guarantees a long service life
- **Minimal cleaning required** due to the user-friendly design (only the pistol's ends and nozzles)
- **One single pressurisation** suffices to expel the entire 10, 5 or 3 kg capacity (even after an extended time period)
- **Complete and ready to use** with standard equipment
- **Modularly expandable**

Technical data

Size.....	LK 3	Ø 210 x 220 mm
	LK 5	Ø 210 x 340 mm
	LK 10	Ø 285 x 410 mm
Capacity	LK 3	3 kg
	LK 5	5 kg
	LK 10	10 kg
Operating pressure.....		1–5 bar

Typ

Typ	Art.No.
LK 3.....	502003
LK 5.....	502005
LK 10.....	502010

Kit contains

Stainless steel pressure tank with:
inner plastic glue container, water container for glue pistol,
hose Ø 10 mm, length 4 m, glue pistol LK 0, pointed nozzle,
pump hose, manual

Accessories can be found from page 90 onwards

Glue pistols

LK 0, LK 100

Glue pistols for various applications

LK 100 pneumatic

LK 0 manual

Advantages and properties

- Glue quantity steplessly dosable
- Drip free and easy to clean
- Bayonet coupling for speedy nozzle changing
- Easy to service

Version	Application	Art.No.
LK 0.....	for manual operation	512200
LK 100.....	for pneumatic external operation.....	512210

Accessories can be found from page 90 onwards

LK 0

LK 100

Glue nozzles

Lamello glue nozzles are anodised, coating them with a hard surface, 3/100 mm thick

Advantages and properties

- Resistance to wear
- Smooth gliding surface
- Surfaces **easy to clean**
- Speedy nozzle changes are made possible with the Bayonet coupling

for edges

* according to your requirements

Repairing

«Quality takes top priority in our company.

We have found an expert partner in Lamello.

We particularly value the helpful, friendly nature of the Lamello team.»

Ing. Christian Rasner, Site Manager at the laminated wood factory

Bakk. Valentina Kirnbauer, member of the management team at Franz Kirnbauer KG in Prigglitz, Austria

Repairing with the **Minispot System**

For the repair of wood defects and damaged areas such as resin pockets, small knots or damaged edges

How it works

1. Cut the defect

2. Apply the glue

3. Insert the Minispot patch

4. Plane the surface

Advantages and properties

System solution

«Where all parts match»

- All necessary components such as machines, templates, cutters and patches are made to fit ideally

Efficient and professional

«Field-proven and suited for the industry»

- Easy and fast positioning due to the markings and the see-through cover on templates and machines
- Efficient tools and standard attachment for dust extraction

Easy and complete

«The ideal solution for every situation»

- Diverse patch sizes for damaged areas available, single patches and patch rods from 85–500 mm
- Suitable system solutions for repairs of surfaces or edges

Fast

«Fast completion of the repair»

- Optimal hold of the patches due to the fine interlocking in the wood surface
- No long waiting time after glueing

Invisible

«Quality which pays off»

- Fine interlocking makes the patch invisible
- Patch takes on the same colour as the surrounding wood or can be stained, oiled or laquered accordingly

G20 S2

The Minispot grooving machine to cut grooves for patches sizes 2, 4, 22, 8, 20

Cutting defects

See-through cover

Stop square

Milling jig for Minispot patching rods

Advantages and properties

- **Precision guidance with finished surface**
- **Easy positioning** due to see-through cover
- No slipping while cutting due to anti-slide coating and fixation spikes
- **Controlled plunge** due to ergonomic push-down lever
- Suction stub for dust extraction

Technical data

Power	1'000 W
Voltage	230 V
Speed	10'000 min ⁻¹
Max. groove depth	20 mm
Weight	4.4 kg

Minispot G20 S2

Art.No.

in carton	111750
-----------------	--------

Kit contains

Machine (without cutter) with:
set of tools, manual

Accessories

Art.No.

Stop square for edge patches	121755
für G20 S2	
To cut Minispot-grooves on edges for all models since 2005	
Milling jig for Minispot patching rods	121702
85 / 250 / 500 mm	
for G20 / G20 S2 / G2A	

Accessories can be found from page 90 onwards

G2A

The Minispot grooving machine to cut grooves for patches size 2 and 8

Anti-slide coating

Repair in the groove

See-through cover

Sliding back cover

Advantages and properties

- **Precision guidance with finished surface**
- **Easy positioning** due to see-through cover
- No slipping while cutting due to anti-slide coating
- **Sliding back cover** for closer cuts in the groove
- Suction stub for dust extraction

Technical data

Power	780 W
Version	230 V
Speed	10'000 min ⁻¹
Cutter	Carbide tipped Minispot cutter size 2
Max. groove depth.....	8 mm
Weight.....	3.1 kg

Minispot G2A	Art.No.
in carton	111702

Kit contains

Machine with:
carbide cutter, set of tools, manual

Accessories	Art.No.
Milling jig for Minispot patching rods	121702
85 / 250 / 500 mm	
for G20 / G20 S2 / G2A	

Accessories can be found from page 90 onwards

Patchmaker 2

The patch-making machine for the manufacture of individual size 2 patches, using your own wood scraps 72 x 25 x 10 mm

Step 1:
Wood piece 72 x 25 x 10 mm

Step 2:
Cut profile

Step 3:
Cut profile

Step 4:
Cut off the wood patch

Advantages and properties

- The patch is made from the same wood piece as the workpiece
- Using your own wood offers a perfect match between workpiece and patch
- The patch is available immediately

Technical data

Power	250 W / 500 W
Voltage	230 V or 120 V
Speed	18'000 min ⁻¹ / 25'000 min ⁻¹
Tools	Carbide tipped profile cutter 2 teeth Carbide tipped saw blade 100 x 2.4 x 22 mm
Weight.....	9.3 kg

Patchmaker 2

Art.No.

in carton **111600**

Kit contains

Machine with:
carbide tipped form cutter / saw blade, suction hose with adapter piece, set of tools, manual

Accessories can be found from page 90 onwards

Plano 45 S2

The flush milling machine to flush-mill projecting wood pieces such as resin-pocket patches, patching rods, knots, crossbar patches

Tear-free cut

Adjustable milling height

Stainless steel base insert

Planing protruding patch

Advantages and properties

- **Unique helical milling geometry** produces a shearing cut which **guarantees tear-free work**
- **Low cutting pressure**, no chipping at the end of the piece
- **Perfect cut even on crossgrained wood**
- Set milling height easily in steps of 0.035 mm, +/- 0.7 mm
- Ergonomically improved and repositioned switches and handles
- **Cost-effective** tool due to long life
- Stainless steel base inserts for minimal wear
- Suction stub for dust extraction

Technical data

Power	1'000 W
Voltage	230 V or 120 V
Speed	10'000 min ⁻¹
Tool	Cutter head with 3 carbide reversing blades 45 x 12 x 1.5 mm
Cutting width	45 mm
Cutting height	3 mm
Weight.....	4.1 kg

Plano 45 S2

Renovating Windows

«The Tanga Delta is the perfect machine for window replacement since it is fast, robust and reliable.

A guaranteed clean job for the customer! »

Pascal Scheffer, Installer of Hefesta-Fensterbau Heil GmbH in Steinwenden, Germany

Window replacement with the **Tanga Delta**

Clean and efficient window replacement For good customer care

How it works

1. Unpack the machines

2. Cut the window out

3. Pull the window out

4. Install the new window

Advantages and properties

High working speed

Powerful 1600 W motor with ideal weight-power ratio

Cuts into the corner

Deep cuts into the corner with the Tanga Delta S2

High quality

Clean cuts into wood, stone and tiles without damaging surrounding structures

Only one cut

Cutting depth up to 68 mm

Flat, light construction

Low dust emission

Ideal air flow channeling minimises dust emissions

Safe

Smoothly running base plate is instantly retracted by the strong spring

Tanga Delta

The ideal machine for window replacement.

Tanga Delta S2

Tanga Delta H

Tanga Delta S2

Cut into the stone wall

Tanga Delta H

Cut into the timber frame

Base plate for cuts into corner

45° cut into the corner

Cut-out for the weatherboard

Cut into the tiled wall

Shortening doors

Cut groove for door seal with the rabbet stop

Tanga with diamond blade

Advantages and properties

– Effortless low friction guide for longevity despite daily use in stone and plaster

– Base plate with snap-in locker for a quick change of tools

Tanga Delta S2 – Cut into the stone wall

– Diamond blade for cutting plaster, stone and tiles

– 2 base plates for cutting straight-line and into the corner

Tanga Delta H – cut into the timber frame

– Saw blade for wood frames

– 1 base plate for cutting straight-line

Applications with Tanga Delta S2

– Clean replacement of old windows

– Cut the wall for larger windows

– Cut-outs for weatherboards

– Cuts for wall breakouts

– Dustless cuts into plasterboards

– Straight cuts into tiled walls

Technical data

Power 1'600 W
with electronic overload protection

Voltage 230 V

Speed 7'700 min⁻¹

Cutting height 6 mm (groove width)

Weight..... 5.4 kg

Tanga Delta S2

Diamond blade Ø 180 x 2.6 x 22 mm

Cutting depth adjustable 0–58 mm
(optional 0–68 mm with
200 mm saw blade)

Tanga Delta H

Carbide saw blade Ø 200 x 2.4 x 22 mm

Cutting depth adjustable 0–68 mm

in wooden case

Art.No.

Tanga Delta S2 with diamond blade **111553**

Tanga Delta H with saw blade for wood **111560**

Kit contains

4 m suction hose with suction stub, set of tools, safety glasses,

Tanga Delta S2: Diamond blade

Tanga Delta H: Carbide saw blade

Accessories can be found from page 90 onwards

Variocut

The expansion gap and parquet cutter for gap width 4–8 mm

Gap width 4–8 mm

Cutting gap

Expansion gaps

Additional option: Wood repair

Advantages and properties

- **For minimal gap width from 4–8 mm**
- Fast height adjustment 4–8 mm in tenths of a millimeter with the adjusting knob
- Plastic front cover for easy gliding on the ceiling or on the floor
- Can also be used for wood repairs with a Minispot cutter

Application

- Expansion gaps on ceilings
- Various cuts with and cross grain
- Expansion gaps on floor boards
- Wood repairing (with Minispot cutter Art.No. 132217)

Technical data

Power	800 W
Voltage	230 V
Speed	10'000 min ⁻¹
Carbide tipped cutter	Z20, Ø 100 x 2.4 x 22 mm
Gap width	4–8 mm (1/10 per step), or more by use of a spacer
Cutting depth	adjustable 0–20 mm
Weight	3.5 kg

Variocut

Art.No.

in wooden case..... **111450**

Kit contains

Machine with:
saw blade, set of tools, manual

Accessories can be found from page 90 onwards

Edge processing with the **Profila**

The edge profiling machine with a stable surface for various jobs

Advantages and properties

Stepless fine adjustment

Simple rotation of the nut ensures the base plate remains stable and correctly angled.

Stable working

Stability when working protruding edges is enabled by vertical positioning of the machine using the gap in the baseplate.

All shapes, any job

Whether curved inwards or outwards, if straight or rounded. Whether the top layer or the edging protrudes.

All standard cutters

No special cutters required. Use your existing cutters. The machines are shipped with collet chucks Ø 6mm, 8mm and ¼".

Variable tool opening

25 mm or 34 mm depending on the cutter size

Large base plate

The large base plate Ø 100 with a sliding coating on the surface allows for stable running on the work piece.

Profila

The edge profiling machine with electric or pneumatic motor for flush-milling, edge-milling and profiling of edges even on curved work pieces

Profila E plus

Profila Pro plus

Profila P2

Profila E plus (electric)
For every work shop,
use it anywhere

Flush trim or round edges

Profila Pro plus (pneumatic)
Light and ergonomic handling
only 1 kg

Flush trim or round edges

Profila P2 (pneumatic)
Light and ergonomic handling
only 900 g

Rounding edges

Advantages and properties

- Easy and stepless precision adjustment of the cutting depth by simply turning the base plate
- Ideal for all standard cutters
- Small, variable tool opening for 25 and 34 mm
- Special coating on the base plate avoids leaving marks on the workpiece
- Large base plate
- High speed for a clean cut

Profila E plus, Profila Pro plus

- The opening in the base plate enables milling of **protruding edges** through application on the surface instead of the edge. This allows for stable guiding of the machine and milling of curved work pieces.
- Ideal for cutting protruding PVC edges

Profila P2

- Ideal for rounding edges

Profila E plus	Art.No.

Cantex Ergo

The high-precision planer for top quality flush-milling of solid wood edges

Flush-planing efficient and clean

Rounded base plate

Tear-free work in cross-grained wood

Parallel guide for finished surfaces

High-precision cutter adjustment

Advantages and properties

- **Round front on the base plate** for more manoeuvrability, ideal for planing all-sided edges on panels
- **New: Scale on the cutter** for the exact setting of the parallel guide
- Unique helical milling geometry produces a **shearing cut which guarantees tear-free work**
- Low cutting pressure, no chipping at the end of the piece
- **Perfect cut even on cross-grained wood**
- Set milling height easily in steps of 0.035 mm, +/- 0.7 mm
- Sliding spacer prevents tipping of the machine when working in the surface

Technical data

Power	1'000 W
Voltage	230 V or 120 V
Speed	10'000 min ⁻¹
Tool	Cutter head with 3 carbide reversing blades, 45 x 12 x 1.5 mm
Milling height.....	adjustable in steps 0.035 mm, ± 0.7 mm
Cutting width	45 mm
Cutting height	3 mm
Weight.....	4.3 kg

LK 3, LK 5, LK 10	Art.No.
LK Service carriage	533205

The mobile station for LK 10, LK 5 und LK 3:

- adjustable suspension rod
- Incl. service boiler with grip, cover and grid basket to submerge nozzles in water when not in use, volume 3 l (533255)
- Dimensions 410 x 410 x 850 mm

LK Rolling base with handle	533204
--	---------------

For LK 5 and LK 3:

- On 4 wheels with pushing handle
- Complete with water container and hook for suspension of hose
- Dimensions 254 x 254 x 820 mm

LK Rolling base	533201
------------------------------	---------------

Allows pulling behind by hose of LK 5 and LK 3:

- Lowered platform for stability of the glue applicator
- Dimensions 254 x 254 mm

Suction stub LMA-74	for 3S, G2A, G2, Junior10, Dynamic, ...	281804
Directa, Top		
fits suction hose, int. Ø 23 mm		

Miscellaneous

Air wedge

Advantages and properties

The inflatable installation cushion works like an adjustable wedge

- Installation of window and door frames
- Fitting, and unhinging doors
- Lifting, pressing and setting workpieces
- Load capacity: max. 100 kg / pcs., Joint width: 2–50 mm

Air wedge

Set with 4 air wedges.....	Art.No. 060003
----------------------------	---------------------------------

Worktop / Countertop jigs

121300

131300

131305

Advantages and properties

For precise cutting of the recess necessary to join worktops / countertops in 90° or 2 x 45° angles

- Water resistant, heat and light resistant
- To be used with a router, guide bush Ø 30 mm, cutter shank 12.7 mm

Worktop jig
