📦 The latest collection 2022/2023.

📦 Polish watch MENU and application in Polish.

📦 7 dials to choose from the watch and over 40 with the possibility of uploading from the application.

📦 A capacious 200 mAh battery along with an optimized system and a new processor will allow you to use the smartwatch for a long time.

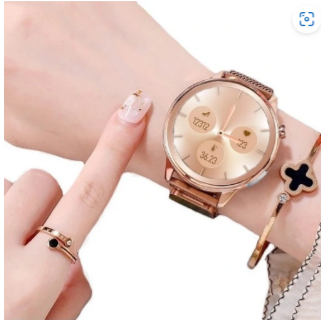

📦 Exceptionally bright E2E display with a size of 1.3" and a resolution of 240x240px.

📦 Each smartwatch is packed in a stylish box ideally suited for a GIFT.

📦 Smartwatches undergo a long series of tests both at the factory and during our distribution.

📦 Each smartwatch comes preloaded with the latest manufacturer's software characterized by reliable operation.

📦 Each watch is accompanied by an original user manual in Polish and an information leaflet prepared especially by us to facilitate the use of the smartwatch.

📦 Precise system of physical measurements consisting of up to 8 sensors

- CT1711 body temperature electrode,
- PPG Ti AFE4404 red and infrared sensor measuring blood oxygenation level,
- 2x OSRAM 2703 green sensor measuring pulse and pressure,
- 3x ECG electrode, closing the circuit by applying the other hand to the side electrode increases the precision of measurements.

🔗 The set includes:

📦 smartwatch in rose gold color with a magnetic bracelet in the same color,

📦 magnetic charging cable with USB plug,

📦 FREE! wall charger dedicated to smartwatch,

📦 Polish user manual,

📦 an elegant box ideally suited for a GIFT,

📦 The latest software uploaded to the smartwatch.

Dedicated SmartHealth application in POLISH.

The smartwatch has a dedicated **SmartHealth** application that helps in operating the smartwatch. Thanks to the application, you can check information such as:

- history of **physical activity** (steps, kilometers, calories burned),
- history of sports activities (**7 activities** to choose from),
- **sleep** history with information on the quality of sleep,
- history of **heart rate, blood pressure, blood oxygenation, body temperature, ECG** and **sleep**.

In addition, you can control functions such as:

- **notifications** from many applications including **phone calls, SMS, Facebook, Twitter, WhatsApp, Instagram, LinkedIn, Messenger, Skype, Smapchat, Gmail, etc.**
- alarm clock
- **calibration of the blood pressure monitor,**
- **the ability to upload one of over 40 discs,**
- **care - the ability to remotely check the basic health parameters of the person wearing the smartwatch,**
- reminders **to move and drink water,**
- **weather** displayed on the smartwatch,
- waking up after hand movement,
- **interval monitoring of vital signs, at intervals of 10-60 minutes, such as heart rate, pressure, oxygenation of blood, breathing rate, body temperature,**
- **HRV index** examining the variability of the sinus rhythm of the heart,
- **Report analyzing the health condition of the owner,**
- **alarms about exceeding the norms for vital signs such as pulse or temperature,**
- looking for a smartwatch,
- time format,
- Shutter release of the camera on the phone,
- software update,
- factory reset of the smartwatch,
- **keeping a menstrual calendar,**
- Do not disturb mode
- Set a daily step goal
- metric units.

- **SMS and social app notifications.**
- Do not disturb mode,
- Camera remote control,
- Remote control mode, media player,
- Adjust the screen brightness.

Take care of your health

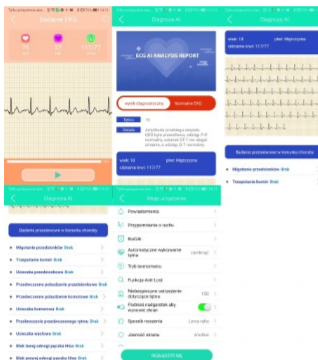

The key function of the smartwatch are **precise systems that check the physical parameters of the owner such as pulse, pressure, blood oxygenation, body temperature and EKG.** This and the **AW80D model are the best** (as of 29/11/2022) available smartwatches in our extensive offer, being tested with many medical devices, where the differences in measurements were marginal. Of course, having a designated smartwatch does not exempt from specialist control and checking parameters with medical equipment, but it is the most accurate option to be able to support your healthy lifestyle.

Amazing battery

Annoyed by charging your smartwatch every day? With this model you are not threatened! Incredibly long standby time on a single charge! It charges very quickly - only 2 hours. This is possible thanks to a modern energy-efficient processor, energy-efficient chips and a new generation of batteries. With this smartwatch you will forget where you left the charger.

Style and beauty

Stand out from the crowd and have something different and more original than a regular plastic watch. Treat yourself to a beautifully designed smartwatch with an elegant case and tempered glass.

Intuitive

The **smartwatch** will make it easier to lead an active lifestyle. Thanks to intelligent notifications along with a vibration signal, we will receive information on the smartwatch about the arrival of a call with the name of a contact from the phone book on the smartphone. Notifications from social media apps and SMS messages will also be displayed on the smartwatch dial. The above functions and the simplicity of their use will mean that you will not have to break away from everyday duties, and at the same time you will be informed about important issues without being distracted by other phone notifications. The wristband stores information about the last few notifications/messages. You can read up to 50 characters from the message. The **smartwatch** is equipped with a 3-axis G-motion sensor, thanks to which the screen will be automatically woken up when you raise your hand. The smartwatch recognizes the hours and phases of your sleep. In a dedicated smartwatch application, you can check - the length of sleep, the route traveled, the number of steps, calories burned, pulse history and much more.

Waterproof

The IP68 standard allows the smartwatch to be immersed in water for up to 60 minutes to a depth of up to one meter.

Your personal motivator

Thanks to the sport modes, you will have the motivation to act. The smartwatch using the pedometer module and health sensors will calculate the amount of calories burned, the distance traveled, and the history of records can be checked in the phone application.

E2E screen

The **smartwatch** is equipped with a high-quality **1.3" IPS** display with a resolution of **240x240px**, made in the latest **E2E** (Edge To Edge) technology. Thanks to this solution, there is no black margin around the displayed dials, disfiguring the elegant smartwatch.
