Customers say

Customers like the taste, quality and ingredients of the vitamin D drops. For example, they mention that it has a buttery unflavored sweetness, it's great to keep baby healthy and that the drops require only one tasteless drop to be put on a nipple or pacifier. That said, opinions are mixed on the delivery and value.

★★★★★ Clear, no bad taste, and only one drop!

Reviewed in the United States on February 23, 2024

Size: 0.08 Fl Oz (Pack of 1) | **Verified Purchase**

Recommended by my doctor and I LOVE these especially after doing different drops with my other two children that made their spit up turn brown. I actually have stuck with this one (versus abandoning vit D after a few weeks with the other two kids). I put a drop on my nipple prior to AM feeds and the baby has no issues with the taste at all. And the small bottle lasts 90 days which is great! Only downside is the drop can take a little while to come out which is annoying when the baby is screaming with hunger.

★★★★★ Easiest Vitamin D!

Reviewed in the United States on November 11, 2023

Size: 0.08 Fl Oz (Pack of 1) | **Verified Purchase**

I am glad I found these vitamins. After researching the better brands for infant vitamin D, I saw this one recommended over and over. I love that it is just one drop vs the vitamin D we were prescribed (where you have to administer an entire syringe). I find the vitamin comes out at a good rate and I haven't had any issues with it. It's free from any of the gross and unnecessary stuff (dyes, etc). Easy for breastfeeding or just put a drop on a pacifer. I'll continue to use this brand.

It is easy to use but somehow one bottle only lasts for two months (we use one drop a day) while the instructions say it should last for 3 months (90drops)

**Avoid scary accidents,- this is the way!**

Reviewed in the United States on March 15, 2024

Size: 0.08 Fl Oz (Pack of 1) | **Verified Purchase**

I used the Enfamil vitamin D drops with my first two kids without an issue. Those vitamin D drops require a full 1 ml of solution to reach the recommended daily dose.

With my third kid, I also used the same as it was recommended by the hospital and the pediatrician.

One day I was using the dropper and the drops must have went down his throat instead of towards the cheek as I usually position it, and my newborn started choking. He may have aspirated and when I tell you it was one of the scariest moments ever... I can't even describe it. It felt like 10 mins he was choking and trying to catch his breath all while I had him turned over, patting his back and crying. It was the worst feeling ever. When he finally cried, I subbed.

I went and threw away all the vitamin d bottles I had and immediately went online to look up other options. I'm shocked at how this only requires one drop versus an entire 1 ml

Estas vitaminas se las recetó la pediatra a mi bebé, las estuve buscando en mi ciudad y aquí fue el único lugar donde las conseguí.

Leí algunos comentarios sobre que el envase viene con muy poco producto, efectivamente solo incluye 1/4 de producto con respecto al frasco; en el envase y el folleto viene especificado.

Llego en la fecha programada y en buen estado.
