EXHIBIT A

**Infringement of U.S. Patent 11,334,598 (the “’598 Patent”)
by the Uber Accused Products**

This chart discloses SurgeTech’s contentions regarding infringement by Uber. Uber directly makes, uses, sells, offers to sell, or imports products that infringe at least claims 1-24 of the ’598 Patent.

[REDACTED]

As set forth below, the Uber Accused Products infringe literally and under the doctrine of equivalents. The structure and functionality of the Uber Accused Products are shown, on information and belief, in the images and disclosures included herein.

The citations to documents from Uber are strictly exemplary, and SurgeTech reserves the right to rely on any additional relevant information to prove the infringement theories disclosed in the charts. SurgeTech has only recently received discovery of operational documents and source code from Defendants and that document production does not appear to be complete. SurgeTech continues to review these materials. SurgeTech also anticipates that additional relevant evidence may be produced in the course of this litigation. Accordingly, SurgeTech will continue its investigation of Uber’s infringement of the Asserted Claims and its contentions will be supplemented as additional information becomes known to it, including through Defendant’s and third parties’ supplementation of their responses to SurgeTech’s outstanding discovery

[1.E] based on the query being answered in the affirmative, carrying out at least one of the following: adjusting, via the computerized network, a price of the items in the transportation services inventory allocated to each of the linked online distribution channels; and modifying, via the computerized network, the linkage of the items in the transportation services inventory to the respective online distribution channels by re-allocating the items in the transportation services inventory to or from said each of the online respective distribution channels from or to the other online distribution channels.	The Uber Accused Products meet this limitation. For example, on information and belief, the Uber Accused Products, based on the query being answered in the affirmative, either (1) adjust, via the computerized network, a price of the items in the transportation services inventory allocated to each of the linked online distribution channel, or (2) modify, via the computerized network, the linkage of the items in the transportation services inventory to the respective online distribution channels by re-allocating the items in the transportation services inventory to or from said each of the online respective distribution channels from or to the other online distribution channels.
