

Can You Chip In?

Please don't scroll past this—the Wayback Machine is a crucial resource in the fight against disinformation, and we need your help. The Internet Archive (which runs this project) relies on donations averaging just \$25.51 to help us keep the record straight. We'd be deeply grateful if you'd join the one in a thousand users that support us financially.

Right now, we have a **2-to-1 Matching Gift Campaign**, tripling the impact of every donation. We understand that not everyone can donate right now, but if you can afford to contribute, we promise it will be put to good use. Access to information is more crucial than ever—if you find all these bits and bytes useful, **please pitch in**.

Everything is Better With a Laser

This full-size battery powered submachine gun toy is one of the most full featured airsoft guns around... perfect for reliving your juvenile obsession with anything that shoots. Firing soft plastic 6mm airsoft pellets this gun sports a wealth of goodies including a real laser sight, electric crosshair gun sight, and a blue illuminator flashlight. You even get eye-protection goggles, rechargeable batteries and an AC wall adapter for charging.

Important Note:

Please keep in mind that this submachine gun is only for responsible geeks 18 and over. Always use eye-protection and never shoot this gun at any human or animal. Removal of any warning stickers or protective markings, such as the 10 mm blaze orange tip will violate federal law.
