

AFFIDAVIT OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.
2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.
3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.
4. The archived data made viewable and browsable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.
5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]` aka an "extended URL". Thus, the extended URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.
6. Attached hereto as Exhibit A are true and accurate copies of browser screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

7. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

DATE: 04/02/2024

[Borrowing/circulation information for UC Berkeley libraries](#)

Library cards permit access to the Gardner (MAIN) Stacks and Moffitt Library, as well as open-stack subject specialty libraries. A library card allows you to have a maximum of 20 books charged out at any one time.

Sunday: 1pm-4:45pm

Hours may be different for holidays, intersessions, and academic breaks. Check [Library Hours](#).

Alumni of any University of California campus who have a paid membership in any of the ten campus alumni associations may obtain a UC Berkeley library card. All applicants must provide proof of California residence and a current government-issued ID such as a driver's license or passport. Please bring your alumni association membership card and required identification to the [Library Privileges Desk](#). The library borrowing card is good for the length of your annual membership. Lifetime alumni association members will receive cards with three-year terms. All cards must be renewed in-person as warranted by expiration date on the Library Card.

Visitors who are California residents may purchase a borrowing card, currently priced at \$100 for one year. All applicants must provide proof of California residence and a current government-issued ID such as a driver's license or passport. Payment may be made by VISA, MasterCard, American Express, Discover, bank debit card, personal check or money order, made payable to The Regents of the University of California. Please purchase your borrowing card at the Library Privileges Desk. Visitors who are registered with the [Visiting Scholars and Postdoc Affairs \(VSPA\) Program](#) are considered **visiting scholars**, and should consult our [Library Services for Visiting Scholars](#) page for more information.

Visitors, please begin your research at your local public or academic library. UC Berkeley Library material may be borrowed by placing a request for an item through your local public or academic library. If your library is unable to satisfy your research needs, including interlibrary services, you may speak with a reference librarian about access to UC Berkeley materials. Campus visitors are accorded free on site access to reference assistance, electronic research resources, reference collections, government reference materials, and the Library's reading rooms. Priority access to UC Berkeley Library services and resources is accorded to UC students, faculty and staff.

Many campus libraries have open stacks and visitors can use most collections on site, such as all government depository publications. Based on a visitor's information need and the Library's ability, arrangements may be made for use of restricted-access collections such as [The Bancroft Library](#) and [Gardner \(MAIN\) Stacks](#). All Library users may be requested to present current photo identification at all library service points.

Library computers provide access to the online catalogs and educational resources only. You do not need to have a library card to access the online catalogs [OskiCat](#) (UC Berkeley) or [Melvyl](#) (all UC campuses and worldwide) from off campus.

Cardholders may not have access to items on reserve for UC Berkeley classes. Access to some special collections such as the [Media Resources Center](#) is granted selectively. [Interlibrary borrowing](#) services are not available to cardholders or visitors. Remote access to databases involving contractual arrangements between the University and the database vendor are not available to cardholders or visitors. The restrictions on remote access is a condition placed on the Library by the database vendors, however most of the electronic resources are available to you at public computers in the Library. Please see [off-campus alternatives](#) for wireless connectivity for non-research related purposes.

Loan periods and due dates vary among the [campus libraries](#). It is your responsibility to note the due dates for materials and to return or [renew](#) them by those dates. Please familiarize yourself with the circulation policies of each library from which you borrow.

Return material to the circulation desk during library hours. After hours, return books to a library

book drop. Refer to the owning library for information on returning non-book materials. Return interlibrary loan material to 133 Doe.

Return Receipts may be requested from a circulation desk for returned material. Materials damaged or incomplete should be brought immediately to the owning library circulation desk to discuss repair or replacement options that may be available. The Library does not keep a record of receipts issued.

Inventory

Library borrowers who wish to review a list of materials they have checked out can do so by examining their inventory via [My OskiCat](#).

Searches, Recalls and Holds

At any circulation desk, borrowers may place a search request for materials not found on the shelf and not checked out. Borrowers will be notified by email when search requests have been located. Via [My OskiCat](#), you may update your email address if it changes.

Materials checked out to one borrower may be recalled by another borrower. Only library card holders with borrowing privileges are entitled to place recalls. You may recall an item online at [OskiCat](#) as well as at the circulation desk of any [campus library](#). You must supply the title or call number of the item needed. You will be notified by postcard or e-mail when the item is available to be picked up. Recalled items should be available within one week. When it is returned, the item will be put on hold. If more than one person has recalled it, these will be handled in the order the recalls were placed. If an item you have checked out is recalled, you must return it by the new due date.

[• Return to top of page](#)

Overdue, Lost or Damaged Material

Library borrowers are responsible for returning or renewing items by their due date. When an item becomes overdue, borrowing privileges will be blocked until the item is returned. Some libraries charge a fine for overdue items.

If an item is damaged or lost, borrowers are liable for charges incurred to repair or replace the item. A borrower may replace lost or damaged materials with copies acceptable to the lending library. Such arrangements should be made with the lending library before a replacement is purchased. Please see [Finding Replacements for Lost Library Books and Serials](#) for further details.

Replacement costs (\$150 default/book or the actual cost of the item, which ever is higher) and processing fees are charged for overdue materials that are not returned. The University Campus Accounts and Receivables Office adds a late fee to unpaid bills every 30 days an account is delinquent. Unpaid bills are forwarded to a collection agency. Questions about bills and blocked or revoked privileges should be directed to the Library Privileges Desk (Doe Library, floor 1).

Scanning and printing

Campus libraries provide printing and scanning options. Self-service printing is available from many library workstations; dedicated bookscan stations offer printing and scanning capabilities. For more information about the above (cost, capability, location) visit the library [printing and scanning](#) page. The Moffitt Library houses a full service [Copy Center](#), which provides expanded services.

Responsibilities of Borrowers

Borrowers are responsible for library materials charged out to them until they are returned to the lending library. Borrowers are prohibited by Library policy from lending their library card to others. Borrowers are responsible for maintaining a current address on file with the Library Privileges Desk. Borrowers planning to be away from their mailing address for a week or more should return material to avoid recall fines.

Borrowers who abuse Library borrowing privileges may have these privileges suspended throughout the Library. Examples of abuse of library borrowing privileges include repeatedly not returning materials on time, not paying replacement bills, not responding to recall notices, not returning library materials even after replacement bills have been issued, and mutilation or damage of library materials.

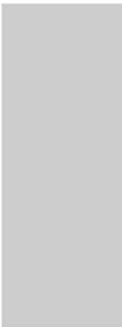

Policies for Library Users

The [Library Code of Conduct](#) and [Library Computer Use Policy](#) detail standards for Library use intended to create a safe and pleasant research environment for all Library patrons.

The Library is responsible for safeguarding the confidentiality of a borrower's transaction, as mandated by the California Information Practices Act of 1977. Please see the Library's [Privacy Policies](#) for more information.

The Find Information section of the UC Berkeley Library Website provides access to the tools you'll need to find print, electronic and multi-media resources in the UC Berkeley Library collections, and on the Web.

Books and e-books	Direct links to the OskiCat (UC Berkeley) and Melvyl (all UC campuses) library catalogs, a database of electronic book and text resources, and links to other library catalogs you may find helpful you in your research.
Articles	Links to article databases by subject, general article databases, newspaper article databases, government information databases, and a comprehensive list of all the article databases to which the UC Berkeley Library subscribes.
E-Journal titles A-Z	Use this list to find electronic journal titles available through The Library.
Electronic resources	Use the electronic resources pages to find article databases, archival collections, encyclopedias, and databases of all types, in the academic subjects taught on the UC Berkeley campus.
Data and GIS Services	Use the Data and GIS Services pages to find services and software offered by the Library, GIS services, data management plan and scientific data services, and other UC Berkeley campus facilities.
Recent Acquisitions	Links to titles cataloged or recataloged during the last 60 days (excluding serials). New acquisitions lists are available as HTML pages and RSS feeds.
Websites	Links to the best sources for locating useful information on the World Wide Web.
All types	Links that will help you find various kinds of information resources, both electronic and printed.

Find Dissertations and Theses

The sources listed below help you identify master's theses and doctoral dissertations. The UC Berkeley Library does not systematically collect dissertations from other institutions, though it has a nearly complete collection of Berkeley doctoral dissertations, and large numbers of Berkeley masters' theses. Occasionally dissertations are printed later by a commercial publisher as a book.

To determine if we own a **printed** copy of a specific dissertation or thesis, search the library catalogs **OskiCat** and **Melvyl**.

OskiCat (UC Berkeley)
OskiCat is the catalog of materials in UC Berkeley library collections, which are spread throughout the 20 campus libraries. A few of the UC Berkeley affiliated libraries' collections are also included in this catalog.

- Use "Quick Search" to search basic fields, like title and author.
- Use "Advanced Keyword Search" for more complex searches combining keywords from two or more fields.
- Some materials are shelved at the [Northern Regional Library Facility](#) (NRLF). Use the REQUEST button to order an item from NRLF.
- Recent UC Berkeley dissertations are available online as PDFs. In the OskiCat record look for "Link to online version(s)".

Melvyl (all UC campuses)
Melvyl is the catalog of materials available from the libraries of the ten UC campuses, and other research collections in the state. Most of the UC Berkeley affiliated libraries' collections are included in this catalog. Current UC Berkeley students, faculty, and staff may request materials not owned by UC Berkeley through the online Request feature in Melvyl.

Dissertations & Theses @ University of California (UCB access only)
Dissertations & Theses @, a subset of the Digital Dissertations database, indexes dissertations and theses from the University of California. The full text of items published after 1996 may be downloaded for free from campus computers and via the [proxy server](#).

- Search "keywords" to find theses and dissertations on a theme or topic.
- Choose "24 page Preview" to see an excerpt of the PDF file.
- The complete PDF is available for free when [free download] appears.
- To purchase a personal copy of the item, choose [order now].

Dissertations and Theses (Digital Dissertations) (UCB access only)
Digital Dissertations indexes over 1.5 million dissertations completed in North American and European universities, from 1861 to the present. Listings after 1980 also include abstracts.

- Search "keywords" to find theses and dissertations on a theme or topic.
- Choose "24 page Preview" to see an excerpt of the PDF file.
- The complete PDF is available for free only if you see [free download]
- To purchase a personal copy of the item, choose [order now].
- Or you could search a library catalog and borrow a copy from the library.

Index to Theses
This database indexes all master's theses completed at universities in Great Britain and Ireland from 1970 to the present. All listings include abstracts, but no full text.

Dissertation and Thesis Databases
Find dissertations and theses via a librarian-selected list of databases.
