I, Sylvia D. Hall-Ellis, Ph.D., declare as follows:

I. INTRODUCTION

1. My name is Sylvia D. Hall-Ellis. I have been retained as an expert by Volkswagen Group of America, Inc. (“Petitioner”), who I am informed is Petitioner to this *inter partes* review (IPR) proceeding.

2. I have written this declaration at the request of the Petitioner to provide my expert opinion regarding the authenticity and public availability of several publications identified in Section V below. My declaration sets forth my opinions in detail and provides the basis for my opinions regarding the authenticity and public availability of these publications. If called to testify in the above-captioned matter, I will testify with regard to the opinions and bases set forth below.

3. I reserve the right to supplement or amend my opinions, and bases for them, in response to any additional evidence, testimony, discovery, argument, and/or other additional information that may be provided to me after the date of this declaration.

4. I am being compensated for my time spent working on this matter at my normal consulting rate of \$325 per hour, plus reimbursement for any additional reasonable expenses. My compensation is not in any way tied to the content of this

report, the substance of my opinions, or the outcome of this proceeding. I have no other interests in this proceeding or with any of the parties.

5. All of the materials that I considered and relied upon are discussed explicitly in this declaration.

II. QUALIFICATIONS

6. I am currently an Adjunct Professor in the School of Information at San José State University in San José, California. I obtained a Master of Library Science from the University of North Texas in 1972 and a Ph.D. in Library and Information Science from the University of Pittsburgh in 1985. Over the last fifty years, I have held various positions in the field of library and information resources. I was first employed as a librarian in 1966 and have been involved in the field of library sciences since, holding numerous positions.

7. I am a member of the American Library Association (ALA) and its Association for Library Collections & Technical Services (ALCTS) Division, and I served on the Committee on Cataloging: Resource and Description (which wrote the new cataloging rules) and as the chair of the Committee for Education and Training of Catalogers and the Competencies and Education for a Career in Cataloging Interest Group. I also served as the Chair of the ALCTS Division's Task Force on Competencies and Education for a Career in Cataloging. Additionally, I have served as the Chair for the ALA Office of Diversity's

Committee on Diversity, as a member of the REFORMA National Board of Directors, as a member of the Editorial Board for the ALCTS premier cataloging journal, *Library Resources and Technical Services*, and as a Co-Chair of the Membership Committee for the Library Research Round Table (LRRT). Currently, I serve as a member of the LRRT Nominating Committee.

8. I have also given over one hundred presentations in the field, including several on library-cataloging systems and Machine-Readable Cataloging (“MARC”) standards. My current research interests include library cataloging systems, metadata, and organization of electronic resources.

9. I have been deposed twenty-six times: (1) *Symantec Corp. vs. Finjan, Inc.*, Petition for *Inter Partes Review* of U.S. Patent No. 7,613,926, May 26, 2016, on behalf of Symantec Corp.; (2) *Symantec Corp. vs. Finjan, Inc.*, 4:14-cv-2998-HSG (N.D. 10. My full *curriculum vitae* is attached hereto as Attachment 6.

III. PRELIMINARIES

A. Scope of Declaration and Legal Standards

11. I am not an attorney and will not offer opinions on the law. I am, however, rendering my expert opinion on the authenticity of the documents referenced herein, and on when and how each of these documents was disseminated or otherwise made available to the extent that persons interested and ordinarily skilled in the subject matter or art, exercising reasonable diligence, could have located the documents before the dates discussed below with respect to the specific documents.

12. I am informed by counsel that a printed publication qualifies as publicly accessible as of the date it was disseminated or otherwise made available such that a person interested in and ordinarily skilled in the relevant subject matter could locate it through the exercise of ordinary diligence.

13. While I understand that the determination of public accessibility under the foregoing standard rests on a case-by-case analysis of the facts particular to an individual publication, I also understand that a printed publication is rendered “publicly accessible” if it is cataloged and indexed by a library such that a person interested in the relevant subject matter could locate it (i.e., I understand that cataloging and indexing by a library is sufficient, though there are other ways that a printed publication may qualify as publicly accessible). One manner of sufficient indexing is indexing according to subject matter category. I understand that the cataloging and indexing by a single library of a single instance of a particular printed publication is sufficient, even if the single library is in a foreign country. I understand that, even if access to a library is restricted, a printed publication that has been cataloged and indexed therein is publicly accessible so long as a presumption is raised that the portion of the public concerned with the relevant subject matter would know of the printed publication. I also understand that the cataloging and indexing of information that would guide a person interested in the relevant subject matter to the printed publication, such as the cataloging and indexing of an abstract for the printed publication, is sufficient to render the printed publication publicly accessible.

14. I understand that routine business practices, such as general library cataloging and indexing practices, can be used to establish an approximate date on which a printed publication became publicly accessible.

B. Persons of Ordinary Skill in the Art

15. I am told by counsel that the subject matter of this proceeding generally relates to cellular communications.

16. I have been informed by counsel that a person of ordinary skill in the art at the time of the invention (“POSA”) is a hypothetical person who is presumed to be familiar with the relevant field and its literature at the time of the inventions. This hypothetical person is also a person of ordinary creativity, capable of understanding the scientific principles applicable to the pertinent field.

17. I am told by counsel that a person of ordinary skill in this subject matter or art would have had a bachelor’s degree in electrical engineering, computer engineering, computer science, or an equivalent field, or an advanced degree in those fields, as well as at least 3-5 years of academic or industry experience in mobile wireless communications, or comparable industry experience. I have also been told that experience could take the place of some formal training, as domain knowledge may be learned on the job. I am told by counsel that this description is approximate, and a higher level of education or skill might make up for less experience, and vice versa. I have been further informed by counsel that a

person of ordinary skill in the art would have been familiar with and able to understand the information known in the art relating to these fields, including the publications discussed in this declaration.

C. Use of Authoritative Databases

18. In preparing this report, I used authoritative databases, such as the OCLC bibliographic database, the Library of Congress Online Catalog, the U.S. Copyright Office, and the IEEE Xplore database to confirm citation details of the publications discussed. Unless I note otherwise below in reference to a specific serial publication, it is my expert opinion that this standard protocol was followed for the publications discussed in Section V below.

19. *Indexing.* A researcher may discover material relevant to his or her topic in a variety of ways. One common means of discovery is to search for relevant information in an index of periodical and other publications. Having found relevant material, the researcher will then normally obtain it online, look for it in libraries, or purchase it from the publisher, a bookstore, a document delivery service, or other provider. Sometimes, the date of a document's public accessibility will involve both indexing and library date information.

20. Indexing services use a wide variety of controlled vocabularies to provide subject access and other means of discovering the content of documents. The formats in which these access terms are presented vary from service to service.

21. Online indexing services and digital repositories commonly provide bibliographic information, abstracts, and full-text copies of the indexed publications, along with a list of the documents cited in the indexed publication. These services also often provide lists of publications that cite a given document. A citation of a document is evidence that the document was publicly available and in use by researchers no later than the publication date of the citing document.

IV. LIBRARY CATALOGING PRACTICES

A. MARC Records and OCLC

22. I am fully familiar with the library cataloging standard known as the MARC standard, which is an industry-wide standard method of storing and organizing library catalog information. MARC was first developed in the 1960s by the Library of Congress. A MARC-compatible library is one that has a catalog consisting of individual MARC records for works made available at that library.

23. Since at least the early 1970s and continuing to the present day, MARC has been the primary communications protocol for the transfer and storage of bibliographic metadata in libraries.¹ Almost every major library in the world is MARC-compatible. *See, e.g., Attachment 2, MARC Frequently Asked Questions*

¹ A complete history of the development of MARC can be found in *MARC: Its History and Implications* by Henrietta D. Avram (Washington, DC: Library of Congress, 1975) and is available online from the Hathi Trust.

(FAQ), LIBRARY OF CONGRESS, 0002 (“MARC is the acronym for MACHine-Readable Cataloging. It defines a data format that emerged from a Library of Congress-led initiative that began nearly [fifty] years ago. It provides the mechanism by which computers exchange, use, and interpret bibliographic information, and its data elements make up the foundation of most library catalogs used today.”). MARC is the ANSI/NISO Z39.2-1994 standard (reaffirmed in 2016) for Information Interchange Format. The full text of the standard is available from the Library of Congress.

24. A MARC record comprises several fields, each of which contains specific data about the work. Each field is identified by a standardized, unique, three-digit code corresponding to the type of data that follow. For example, a work’s title is recorded in field 245, the primary author of the work is recorded in field 100, a work’s International Standard Book Number (“ISBN”) is recorded in field 020, a work’s International Standard Serial Number (“ISSN”) is recorded in field 022, and the publication date is recorded in field 260 under the subfield “c.” In some MARC records, field 264 is used rather than field 260 to record publication information. Information in field 264 is similar to information in field 260 (Publication, Distribution, etc. (Imprint)). Field 264 is useful for cases where the content standard or institutional policies make a distinction between functions. If a work is a periodical, then its publication frequency is recorded in field 310, and

the publication dates (e.g., the first and last publication) are recorded in field 362, which is also referred to as the enumeration/chronology field.

25. The library that initially created the MARC record is reflected in field 040 in subfield “a” with that library’s unique library code. Once a MARC record for a particular work is originally created by one library, other libraries can use that original MARC record to then create their own MARC records for their own copies of the same work. These other libraries may modify or add to the original MARC record as necessary to reflect data specific to their own copies of the work. However, the library that created the original MARC record would still be reflected in these modified MARC records (corresponding to other copies of the same work at other libraries) in field 040, subfield “a.” The modifying library (or libraries) is reflected in field 040, subfield “d.”

26. I consulted the Directory of OCLC Libraries in order to identify the institution that created or modified the MARC record. Moreover, when viewing the MARC record online via Online Computer Library Center’s (“OCLC”) bibliographic database, which I discuss further below, hovering over a library code in field 040 with the mouse reveals the full name of the library. I also used this method of “mousing over” the library codes in the OCLC database to identify the originating and modifying libraries for the MARC records discussed in this report.

27. MARC records also include one or more fields that show information regarding subject matter classification. For example, 6XX fields are termed “Subject Access Fields.” Among these, for example, is the 650 field; this is the “Subject Added Entry – Topical Term” field. The 650 field is a “[s]ubject added entry in which the entry element is a topical term.” Attachment 3, 0001. These entries “are assigned to a bibliographic record to provide access according to generally accepted thesaurus-building rules (e.g., *Library of Congress Subject Headings* (LCSH), *Medical Subject Headings* (MeSH)).” Attachment 3, 0001.

28. Further, MARC records can include call numbers, which themselves contain a classification number. For example, a MARC record may identify a 050 field, which is the “Library of Congress Call Number.” A defined portion of the Library of Congress Call Number is the classification number, and the “source of the classification number is *Library of Congress Classification* and the *LC Classification-Additions and Changes*.” Attachment 4, 0001. Thus, the 050 field may be used to show information regarding subject matter classification. Further, the 082 field is the “Dewey Decimal Call Number.” A defined portion of the Dewey Decimal Call (DDC) Number is the classification number, which is included in the 082 field and determined through use of the *Dewey Decimal Classification and Relative Index*.

29. Each item in a library has a single classification number. A library selects a classification scheme (e.g., the Library of Congress Classification scheme just described or a similar scheme such as the Dewey Decimal Classification scheme) and uses it consistently. When the Library of Congress assigns the classification number, it appears as part of the 050 field, as discussed above. For MARC records created by libraries other than the Library of Congress (e.g., a university library or a local public library), the classification number may appear in a 09X (e.g., 090) field.

30. When a MARC-compatible library acquires a work, it creates a MARC record for its copy of the work in its computer catalog system in the ordinary course of its business. This MARC record (for the copy of a work available at the particular library) may be later accessed by researchers in a number of ways. For example, many libraries, including the Library of Congress, make their MARC records available through their website. One could, of course, always physically visit the library at which the work is available, and request to see that library's MARC record for the work. Moreover, members of the Online Computer Library Center ("OCLC") can access the MARC records of other member institutions through OCLC's online bibliographic database, as I explain further below.

B. OCLC

31. The OCLC was created to establish, maintain, and operate a computerized library network and to promote the evolution of library use, of libraries themselves, and of librarianship, and to provide processes and products for the benefit of library users and libraries, including such objectives as increasing availability of library resources to individual library patrons and reducing the rate of rise of library per-unit costs, all for the fundamental public purpose of furthering ease of access to and use of the ever-expanding body of worldwide scientific, literary, and educational knowledge and information. Among other services, OCLC and its members are responsible for maintaining the WorldCat® database, used by independent and institutional libraries throughout the world. All libraries that are members of OCLC are MARC-compatible. Like the two superseded OCLC documents, this revised set of guidelines is intended to assist catalogers in creating records for electronic resources in WorldCat, the OCLC Online Union Catalog. These guidelines pertain to OCLC-MARC tagging (that is, content designation). Bibliographic data are transcribed into the MARC content format according to internationally developed rules and practices that are included in manuals (such as the *Anglo-American Cataloging Rules*, 2nd revision (AACR2), and *Resource Description and Access* (RDA)).

32. When an OCLC member institution acquires a publication, like the other MARC-compatible libraries discussed above, it creates a MARC record for this publication in its computer catalog system in the ordinary course of its business. MARC records created at the Library of Congress were tape-loaded into the OCLC database through a subscription to MARC Distribution Services daily or weekly. Once the MARC record is created by a cataloger at an OCLC member library or may be tape-loaded from the Library of Congress, the MARC record is then made available to any other OCLC members online, and thereby made available to the public. Accordingly, once the MARC record is created by a cataloger at an OCLC member library or is tape-loaded from the Library of Congress, any publication corresponding to the MARC record has been cataloged and indexed according to its subject matter such that a person interested in that subject matter could, with reasonable diligence, locate and access the publication through any library with access to the OCLC bibliographic database or through the Library of Congress.

33. When a MARC-compatible library creates an original MARC record for a work, the library records the date of creation of that MARC record in field 008, characters 00 through 05, in the ordinary course of its business. For OCLC member institutions that use OCLC software to create original MARC records, the date of creation in field 008 is automatically supplied by the OCLC software. The

MARC record creation date in field 008 thus reflects the date on which, or shortly after which, a work was first acquired and cataloged by the library that created the original MARC record.

34. When other MARC-compatible libraries subsequently acquire their own copies of the same work, as mentioned, they create MARC records in their own computer catalog systems for their copies in the ordinary course of business. They may use a MARC record previously created for that work (by another MARC-compatible library) to create their own MARC records for their own copies of that same work. The previously created MARC record, used by subsequently-acquiring libraries to create MARC records for their own copies, may be obtained through the OCLC bibliographic database, as described above. If, when creating a MARC record to represent its own copy of the work, the subsequently-acquiring library uses the master MARC record in its original form, the subsequently-acquiring library cannot reenter data into the 008 field; therefore, the date in the 008 field will continue to reflect the date the MARC record was initially created by the originating library. On the other hand, if the subsequently-acquiring library modifies the previously created MARC record when creating its own MARC record for its own copy of the work, the subsequently-acquiring library may enter into the 008 field of its own MARC record the date its own MARC record was

created.² But the library that created the original MARC record used by the subsequently-acquiring library would still be reflected in the MARC record of the subsequently-acquiring library in field 040, subfield “a.” Thus, the work identified by any MARC record possessed by any MARC-compatible library would have been accessible to the public at least as of the date shown in the 008 field, or shortly thereafter, either from the library that possesses the MARC record itself, or from the originating library indicated in field 040, subfield “a.” As discussed, a MARC-compatible library in the ordinary course of its business creates a MARC record in its own catalog system for a work when it acquires a copy of that work.

35. Moreover, when a MARC record is created by a library for its own copy of a work, field 005 is automatically populated with the date that MARC record was created in year, month, day format (YYYYMMDD). Thereafter, the library’s computer system may automatically update the date in field 005 every time the library updates the MARC record (e.g., to reflect that an item has been

² This practice is not required by but is nevertheless consistent with the MARC standard. Many MARC records exist today whose 008 fields indicate when the first original MARC record for a work was created, rather than when a derivative record was created based on the original MARC record by a subsequently-acquiring library for its own computer catalog system.

moved to a different shelving location within the library). Attachment 5, 0001.

Thus, the work identified by any MARC record possessed by any MARC-compatible library would have been accessible to the public at least as of the date shown in the 005 field, or shortly thereafter, from the library that possesses the MARC record. As noted, because the 005 field may be updated each time the library updates its MARC record, the work identified by the MARC record may, in fact, have been accessible to the public from that library much earlier than the date indicated in the 005 field.

36. Based on my personal experience as a professional librarian using the MARC and OCLC resources, it has been my experience that both resources were continuously operational and available since at least 1992. Indeed, in the course of my work, I have extensively used both resources over the past 30+ years, and I have consistently found the information contained within these resources to be complete and reliable. I have never found the date of accessibility as indicated in fields 008, 005, or 955 to be incorrect. And in only a minute number of cases have I found any errors at all in these records – none of which affected my ability to render an accurate opinion as to accessibility, indexing, or subject headings.

V. PUBLICATION IN THIS PROCEEDING

A. Exhibit 1010: *The Mobile Communications Handbook*, 2nd ed., by Jerry D. Gibson (“Gibson”)

37. Exhibit 1010, which I understand is being submitted along with my Declaration, is a scanned copy of a treatise, *The Mobile Communications Handbook*, 2nd ed., by Jerry D. Gibson (hereafter “Gibson”) and issued by CRC Press with a 1999 copyright date. CRC Press is an established and well-known publisher. Exhibit 1010 is a true and correct copy of the entire treatise, including the title page, copyright page, preface, table of contents, 36 chapters, and index as held in print by the Karl F. Wendt Engineering Library at the University of Wisconsin – Madison³ (see Attachment 1a). The text in Exhibit 1010 is complete. No pages are missing, and the text on each page appears to flow seamlessly from one page to the next. I have been informed by counsel that Exhibit 1010 was generated by scanning a used copy of Gibson that was purchased from a vendor on the Internet. I examined the digital copy of Gibson held in the King Library at San José State University (San José, California) and compared it with the scanned copy of the book purchased from the Internet. Based on my review, I believe Exhibit

³ The Gibson treatise is also available in the King Library at San José State University (San José, California).

1010 is a true and correct copy in a condition that creates no suspicion about its authenticity.

38. Attached hereto as Attachment 1b is a true and correct copy of the MARC record for the Gibson treatise titled *The Mobile Communications Handbook*, 2nd ed., obtained from the OCLC bibliographic database. I personally identified and retrieved the MARC record that is Attachment 1b.⁴ As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 1b, that library code is “DLC,” which means that the MARC record for this book was created at the Library of Congress as part of the Cataloging in Publication (CIP) Program. A cataloger prepares basic information about the forthcoming book which is included on the verso of the title page (also called the copyright page). The information is provided to save time needed for the cataloging process at the library after the book is purchased. The CIP data includes the author (field 100), title and subtitle (field 245), edition statement (field 250), ISBN (field 022), suggested subject headings (field 650), classification numbers for the Library of Congress classification number (field 050), Dewey Decimal classification number (field 082), and the Library of Congress control number

⁴ Attachment 1c is the work form view of Attachment 1b. I personally created Attachment 1c by performing a screen capture of the work form view.

(field 010). These data elements are included in the MARC record that the Library of Congress contributes to the OCLC bibliographic database.

39. As can be seen in the “Entered” field in the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 39985639 on September 24, 1998 (“19980924”). *See* Attachment 1c. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 1b occurred on July 2, 2022, as shown in the “Replaced” field (“20220702”). *See* Attachment 1c. I personally identified and retrieved the MARC record that is Attachment 1b.

40. Attachment 1b further includes an entry in field 050 (“TK6570.M6 \$b M5934 1999”)—as described above, this includes a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system)—and an entry in field 082 (“621.3845”), a subject matter consistent with the Dewey Decimal classification system. Attachment 1b further includes a descriptor term reading “Mobile communication systems” (see Attachment 1d, Library of Congress subject heading sh85086371) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 1b was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 050 entry, the field 082 entry, and the field 650 entry.

Further, as of September 24, 1998, the MARC record attached hereto as Attachment 1b was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that added this book to its collection, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

41. The Library of Congress received a copy of the Gibson book on September 24, 1998, as shown in field 955 of the MARC record from the online catalog (see Attachment 1e). The Gibson book was sent to subject heading assignment on September 25, 1998 (“09-25-98”) and to CIP verification on March 12, 1999 (“03-12-99”).

42. In view of above, Gibson was publicly available as early as March 15, 2000, because by that date it had been cataloged and indexed at the Library of Congress and made part of the OCLC bibliographic database, and at least by September 2000, when the physical copy was sent to BCCD.

43. Further supporting my opinion that Exhibit 1010 was publicly accessible to ordinarily skilled and interested researchers in the field is the fact that the volume titled *The Mobile Communications Handbook*, 2nd ed., was registered with the U. S. Copyright Office as item TX0004939558 on March 8, 1999, and indicated a publication date of February 23, 1999. EX1015 (U. S. Copyright Office

Public Catalog). As noted above, this would have provided a person interested in the relevant subject matter with keyword searching capabilities and other tools to locate this book.

VI. CONCLUSION

44. In signing this declaration, I recognize that the declaration will be filed as evidence in a case before the Patent Trial and Appeal Board of the United States Patent and Trademark Office. I also recognize that I may be subject to cross-examination in the case and that cross-examination will take place within the United States. If cross-examination is required of me, I will appear for cross-examination within the United States during the time allotted for cross-examination.

45. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

Dated: January 11, 2023

Respectfully submitted,

General Information

What is MARC 21? What does the acronym “MARC” mean?

MARC is the acronym for MACHINE-Readable Cataloging. It defines a data format that emerged from a Library of Congress-led initiative that began nearly forty years ago. It provides the mechanism by which computers exchange, use, and interpret bibliographic information, and its data elements make up the foundation of most library catalogs used today. MARC became USMARC in the 1980s and MARC 21 in the late 1990s.

How does MARC 21 differ from the USMARC and CAN/MARC formats?

MARC 21 is not a new format. After having discussions and making minor changes to both formats that accommodated USMARC and CAN/MARC users' specific needs, the USMARC and CAN/MARC (Canadian MARC) formats were “harmonized” into MARC 21 in 1997. See [//www.loc.gov/marc/annmarc21.html](https://www.loc.gov/marc/annmarc21.html) for more information about the harmonization.

Who maintains the MARC 21 formats?

The Network Development and MARC Standards Office at the Library of Congress and the Standards and the Support Office at the Library and Archives Canada maintain the MARC 21 formats. Input for development is provided by MARC 21 users from around the world, including libraries, library networks and utilities, and library system vendors. See [//www.loc.gov/marc/overview.html](https://www.loc.gov/marc/overview.html) for more information about the development and maintenance of the formats.

What are the Network Development and MARC Standards Office and the Standards Division?

The [Network Development and MARC Standards Office](https://www.loc.gov/marc/ndmso/) plans and develops library and information network standards at the Library of Congress. It is the maintenance agency for several national standards, including the MARC 21 formats. To contact it, please e-mail ndmso@loc.gov.

The [Standards Division](https://www.bac-lac.gc.ca/eng/standards/Pages/default.aspx) at the Library and Archives Canada maintains and supports the MARC 21 formats and other library standards. To contact it, please e-mail BAC.Normesdecatalogage-Cataloguingstandards.LAC@canada.ca.

Are there any discussion groups or forums for the MARC 21 formats?

The [MARC Forum](https://www.loc.gov/marc/forum/) is a listserv maintained by the Network Development and MARC Standards Office and is open to anyone interested in the implementation, maintenance and development of the MARC 21 formats. The forum provides an opportunity for members of the information community to participate in discussions related to the formats. Vendor, network, technical service, automation, and reference staff and researchers are encouraged to participate. While there is a close linkage between MARC 21 and the cataloging of materials, the focus of the forum is on the use of MARC 21 as a communications format.

[Back to Top](#)

MARC 21 Documentation

What documentation is available and how do I obtain it?

The [MARC Standards](#) page has links to both extensive documentation on MARC 21, including both the full and concise formats, code and field lists, information about MARC 21 development, and documentation to help users with the MARC 21 format. There is a [format overview](#) listing changes to MARC documentation. Some documentation is also available in [translation](#). A [bibliography](#) is also available on the Library's MARC Standards webpage.

Documentation of French versions of some of the formats in Canada is available at [Library and Archives Canada](#).

How often is MARC 21 documentation updated?

The MARC 21 formats are updated two times per year, in the spring and fall. Other documentation is updated as it becomes necessary.

May I use excerpts from MARC 21 documentation?

Using excerpts is permissible as long as credit is given.

[Back to Top](#)

MARC 21 Tutorials

Is there a tutorial for the MARC 21 formats?

[Understanding MARC Bibliographic](#) is a good introduction to the MARC 21 bibliographic format and includes a bibliography, discussion questions and examples. It is widely used and has been translated into several different languages.

[Understanding MARC Authority Records](#) is a good introduction to the MARC 21 authority format and includes a bibliography, discussion questions and examples.

Both *Understanding MARC Bibliographic* and *Understanding MARC Authority Records* are also available as booklets from the [Cataloging Distribution Service](#).

[Back to Top](#)

MARC 21, SGML, XML and other metadata standards

Are SGML or XML versions of the MARC 21 formats available?

The Network Development and MARC Standards Office has developed a framework for working with MARC data in a XML environment. This framework is intended to be flexible and extensible, allowing users to work with MARC data in ways that meet their specific needs. The framework contains many components such as schemas, stylesheets, and software tools developed and maintained by the Library of Congress. Conversion utilities between MARC (ISO 2709) and MARCXML are also available. Please see www.loc.gov/marc/marcxml.html.

The Network Development and MARC Standards Office also developed a MARC to SGML and SGML to MARC conversion program. The following documents contain the program and additional information:

- [MARC DTDs: Background and Development](#)
- [MARC DTDs: Beta Test Version](#)
- [MARC-SGML and SGML-MARC Conversion Program User Guide](#)
- [MARC-SGML and SGML-MARC Conversion Programs Maintenance Guide](#)

A list of some tools that work with HTML, SGML and XML applications is at [//www.loc.gov/marc/marctools.html](http://www.loc.gov/marc/marctools.html).

Is MARC 21 mapped to other metadata standards? Are other standards mapped to MARC 21?

MARC 21 has been mapped to the following metadata standards:

- [MODS](#)
- [Dublin Core](#)
- [MARC Character Sets to UCS/Unicode](#)
- [Digital Geospatial Metadata](#)
- [RDA](#) (See Tools tab)

The following metadata standards have been mapped to MARC 21:

- [MODS](#)
- [Dublin Core](#)
- [UNIMARC to MARC 21](#)
- [ONIX](#)
- [Digital Geospatial Metadata to MARC](#)
- [RDA](#) (See Tools tab)

[Back to Top](#)

MARC 21 Translations

Are there any translations of the MARC 21 formats?

The [MARC 21 Translations](#) page contains a list of documents that are either direct translations or close adaptations of the MARC 21 formats and other MARC documentation. Where applicable, information regarding differences between the translations and MARC 21 is provided. The formats are listed alphabetically by the language of each translation and include full bibliographic citations and contact information.

I would like to translate a MARC 21 publication. What should I do?

Translations of the MARC 21 formats and other MARC documentation are greatly encouraged because of their usefulness to the entire MARC 21 community. The [Network Development and MARC Standards Office](#) does ask that intellectual credit information be included in the translation. The following statement is recommended:

“The MARC 21 [insert name of publication that was translated] was originally prepared by the Network Development MARC Standards Office, Library of Congress and the Standards Division, Library and Archives Canada. It has been translated with permission.”

Once you complete your translation, please send the Network Development and MARC Standards Office an official announcement that includes your publication's bibliographic information and contact information on obtaining copies. If possible, send a printed copy for our collection of translations. If the translation is available on the Internet, please include its URL for inclusion on the [MARC 21 Translations](#) page. Listing a translation is not mandatory; however translations are extremely useful to other MARC 21 users.

A [Translators's Tools](#) page contains additional information about translating MARC 21 documents.

[Back to Top](#)

Tools, Systems and Services That Work With MARC 21

Is there a list of tools compatible with the MARC 21 formats?

A list of some of the bibliographic tools that support the MARC 21 formats is at www.loc.gov/marc/marctools.html. It includes software programs that provide enhanced usability to MARC 21 records and systems. Some of the tools are freeware or open source.

Is there a list of MARC 21 record services?

A list of some of the record services that support the MARC 21 formats is at www.loc.gov/marc/marcrcsvrs.html. It includes services that distribute MARC 21 records, such as records for copy cataloging, records supplied with materials, records used for recon purposes, updated records, conversion services, etc.

What systems are compatible with the MARC 21 formats?

A list of some of the systems that support the MARC 21 formats is at www.loc.gov/marc/marcsysvend.html. The list includes systems that collect, organize and manage MARC 21 records.

How do I add a record service, vendor system or tool to these lists?

Vendors, software producers, and anyone else who provides vendor records, system services, or who has developed specialized MARC tools, are encouraged to fill out a [submission form](#).

Please note: Individuals who submit the form on someone else's behalf should put their contact information in the "Citation Contact" field and the name of the individual/company on whose behalf the form is submitted in the "Product Contact" field.

Making Changes to the MARC 21 Formats and Code Lists

How do I report errors in MARC 21 documentation?

If you notice an error or omission in either the print or online MARC 21 documentation, please contact ndmso@loc.gov. Describe the error and where it occurs. Please be as specific as possible.

How do I propose making a change to the MARC 21 formats?

Proposals for changes to the formats may originate from any MARC 21 user. Please either fill out the [MARC 21 Formats Proposed Change Form](#) or contact the [Network Development and MARC Standards Office](#) at the Library of Congress or the [Standards division](#) at the Library and Archives Canada. Maintenance agency staff at the Library of Congress and the Library and Archives Canada write, edit and review proposals and discussion papers twice a year and distribute them via the [MARC Forum listserv](#) and the MARC Standards web site. Discussions at the semiannual [MARBI \(Machine-Readable Bibliographic Information\)](#) meetings in the United States and the annual [CCM \(Canadian Committee on MARC\)](#) meeting in Canada, along with suggestions received by e-mail and the listserv, are used by the maintenance agencies to make final decisions on the proposals.

How do I request new or revised MARC 21 organization codes?

Before requesting a MARC 21 organization code, please first search the [MARC Code List for Organizations](#). If you do not find a code for your organization, click on one of these links to access a request form in the language of your choice.

[\[ENGLISH\]](#) [\[ESPAÑOL\]](#) [\[PORTUGUÊS\]](#)

You may use the online form to request up to three codes. If more than three codes are needed, please submit a list of the organizations with their names and addresses (including street, city, state, postal code, and country) via email to ndmso@loc.gov. Please include contact information. Note: Attachments to e-mail messages are not accepted.

The *MARC Code List for Organizations* is updated frequently, as codes are often added. Since information in a request must be verified and then incorporated into the list, there is a short delay between the time of the request and the appearance of a newly-assigned code in the database. Names and addresses are revised when changes are reported.

Requests for the assignment of new codes or changes involving organizations in Canada should be sent to the [Interlibrary Loan Division](#) at the Library and Archives Canada.

Requests for the assignment of new codes or changes involving organizations in the United Kingdom should be sent to the [UK National Agency for MARC Organisation Codes](#) at the British Library.

Requests for the assignment of new MARC organization codes or for changes to codes may also be sent via fax to +1-202-707-0115 or by surface mail to:

Library of Congress
Network Development and MARC Standards Office
101 Independence Avenue, S.E.
Washington, DC, 20540-4402 USA

How do I request MARC 21 relator, sources or description convention codes?

Requests for relators, sources or description convention codes should be sent to ndmso@loc.gov.

Requests can also be faxed to +1-202-707-0115 or sent by surface mail to:

Library of Congress
Network Development and MARC Standards Office
101 Independence Avenue, S.E.
Washington, DC, 20540-4402 USA

Requests should include a full bibliographic citation and a scan, photocopy or Internet link for the item to be added.

[Back to Top](#)

Record Requirements and Record and File Specifications for MARC 21

Where do I find the U.S. National Level/Minimal Level Record Requirements for the MARC 21 formats?

There is no list of “mandatory” data elements that must appear in a MARC 21 record. Theoretically, a record could simply consist of a leader and a 245 (title) field. However, there is a list of the MARC 21 data elements required to meet minimal and national level requirements in the United States for the [bibliographic](#) and [authority](#) formats. Please note that other countries may have different lists of required data elements.

What are the appropriate record and file specifications for the formats?

Information about the file specifications for the MARC 21 formats is in [MARC 21 Specifications for Record Structure, Character Sets, and Exchange Media](#). This document is also available from the [Cataloging Distribution Service](#). For a basic introduction to MARC 21 file and record structure, you may also want to look at [Understanding MARC Bibliographic](#).

What are the specifications for character sets?

MARC 21 records intended for broad, standard interchange should be encoded according to the following specifications. Either an 8-bit based encoding system (called MARC-8 in MARC 21 documentation) or a variable 8/16-bit encoding following ISO/IEC 10646 (UCS) and Unicode UTF-8 encoding rules (called UCS/Unicode UTF-8 in MARC 21 documentation) may be used.

A very large repertoire of characters is defined for use in the MARC-8 environment. For standard MARC 21 interchange, the use of UCS/Unicode UTF-8 is limited to this same repertoire, a subset of UCS/Unicode. This is necessary for interchange until all systems fully accommodate the complete UCS/Unicode repertoire of characters. This restriction will be periodically reviewed as the character encoding environment develops.

Please see [//www.loc.gov/marc/specifications/speccharintro.html](http://www.loc.gov/marc/specifications/speccharintro.html) for detailed information on MARC 21 character sets.

How do I code electronic resources in a MARC 21 record?

The document [Guidelines for Coding Electronic Resources in Leader/06](#) assists users coding fixed fields in records for electronic resources. [Guidelines for the Use of Field 856](#) provides guidance on using field 856 (Electronic location and access) in all the MARC 21 formats. [Guidelines for Distinguishing Cartographic Electronic Resources from other Electronic Resources](#) assists catalogers working with cartographic electronic resources.

FIELD DEFINITION AND SCOPE

Subject added entry in which the entry element is a topical term.

Topical subject added entries may consist of general subject terms including names of events or objects. Subject added entries are assigned to a bibliographic record to provide access according to generally accepted thesaurus-building rules (e.g., *Library of Congress Subject Headings* (LCSH), *Medical Subject Headings* (MeSH)). Field 650 may be used by any institution assigning subject headings based on the lists and authority files identified in the second indicator position or in subfield \$2 (Source of heading or term).

A title (e.g., Bible and atheism), a geographic name (e.g., Iran in the Koran), or the name of a corporate body (e.g., Catholic Church and humanism) used in a phrase subject heading are also recorded in field 650.

GUIDELINES FOR APPLYING CONTENT DESIGNATORS

■ INDICATORS

First Indicator - Level of subject

Used to distinguish primary and secondary descriptors.

- No information provided

0 - No level specified

Level of the subject term could be determined but is not specified.

650 00\$aFlour industry\$vPeriodicals.

1 - Primary

Main focus or subject content of the material.

650 17\$aCareer Exploration.\$2ericd

650 #7\$aCareer Exploration.\$2ericd

650 17\$aCooks.\$2ericd

2 - Secondary

Less important aspect of the content of the material.

650 27\$aFood Service.\$2ericd

650 27\$aJunior High Schools.\$2ericd

650 27\$aSimulation.\$2ericd

[Primary and secondary subject content identified.]

Second Indicator - Thesaurus

Subject heading system or thesaurus used in constructing the subject heading.

0 - Library of Congress Subject Headings

Subject added entry conforms to and is appropriate for use in the *Library of Congress Subject Headings* (LCSH) and the Name authority files that are maintained by the Library of Congress.

1 - LC subject headings for children's literature

Subject added entry conforms to the "AC Subject Headings" section of the *Library of Congress Subject Headings* and is appropriate for use in the LC Annotated Card Program.

2 - Medical Subject Headings

Subject added entry conforms to and is appropriate for use in the National Library of Medicine authority files.

3 - National Agricultural Library subject authority file

Subject added entry conforms to and is appropriate for use in the National Agricultural Library subject authority file.

4 - Source not specified

Subject added entry conforms to a controlled list that cannot be identified by second indicator values 0-3, 5-6 or by a code in subfield \$2. Field 653 (Index Term-Uncontrolled) is used to record terms that are not derived from controlled subject heading lists.

5 - Canadian Subject Headings

Subject added entry conforms to and is appropriate for use in the *Canadian Subject Headings* that is maintained by the Library and Archives Canada.

6 - Répertoire de vedettes-matière

Subject added entry conforms to the *Répertoire de vedettes-matière* that is maintained by the Bibliothèque de l'Université Laval and/or name authority files maintained by libraries in Canada using French as the language of description.

7 - Source specified in subfield \$2

Subject added entry conforms to a set of subject heading system/thesaurus building rules. The identifying code is given in subfield \$2.

■ SUBFIELD CODES**\$a - Topical term or geographic name entry element**

Topical subject or a geographic name used as an entry element for a topical term. Parenthetical qualifying information associated with the term is not separately subfield coded.

- 650 #0\$aAmish.
- 650 #0\$aKalmyk cattle.
- 650 #0\$aAstronauts.
- 650 #0\$aEgypt in the Bible.
- 650 #0\$aBASIC (Computer program language)
- 650 #0\$aBull Run, 2d Battle, 1862.

- 650 #0\$aVocal music\$zFrance\$y18th century.
- 650 #0\$aDentistry\$vJuvenile films.
- 650 #5\$aCanadian wit and humor (English)

\$b - Topical term following geographic name entry element

Topical term that is entered under a geographic name contained in subfield \$a. This construction is not used in AACR2 formulated records.

- 650 #0\$aCaracas.\$bBolivar Statue.

\$c - Location of event**\$d - Active dates**

Time period during which an event occurred.

\$e - Relator term

Specifies the relationship between the topical heading and the described materials, e.g., depicted.

- 650 #0\$aSeabiscuit (Race horse),\$edepicted.
[*Photograph of Seabiscuit, the race horse.*]
- 650 #0\$aUnicorns,\$edepicted.
[*Bayeux Tapestry, showing a unicorn.*]

\$g - Miscellaneous information

Data element that is not more appropriately contained in another defined subfield.

\$v - Form subdivision

Form subdivision that designates a specific kind or genre of material as defined by the thesaurus being used. Subfield \$v is appropriate only when a form subject subdivision is added to a main term.

650 #0\$aScuba diving\$vPeriodicals.

650 #0\$aVomiting\$xTreatment\$vHandbooks, manuals, etc.

\$x - General subdivision

Subject subdivision that is not more appropriately contained in subfields \$v (Form subdivision), \$y (Chronological subdivision), or \$z (Geographic subdivision). Subfield \$x is appropriate only when a general topical subdivision is added to a main term.

650 #0\$aRacetracks (Horse-racing)\$zUnited States\$xHistory.

650 #0\$aNumismatics\$xCollectors and collecting.

\$y - Chronological subdivision

Subject subdivision that represents a period of time. Subfield \$y is appropriate only when a chronological subject subdivision is added to a main term.

650 #0\$aMusic\$y500-1400.

\$z - Geographic subdivision

Geographic subject subdivision. Subfield \$z is appropriate in field 650 only when a geographic subject subdivision is added to a main term.

650 #0\$aWorld War, 1939-1945\$xCampaigns\$zTunisia.

650 #0\$aReal property\$zMississippi\$zTippah County\$vMaps.

\$0 - Authority record control number or standard number

See description of this subfield in Appendix A: [Control Subfields](#).

\$1 - Real World Object URI

See description of this subfield in Appendix A: [Control Subfields](#).

\$2 - Source of heading or term

MARC code that identifies the source list from which the subject added entry was assigned. It is used only when the second indicator position contains value 7 (Source specified in subfield \$2). Code from: [Subject Heading and Term Source Codes](#).

650 #7\$aEducational buildings\$zWashington (D.C.)\$y1890-1910.\$2lctgm

650 17\$aAcoustic measurement.\$2test

\$3 - Materials specified

Part of the described materials to which the field applies.

\$4 - Relationship

Code or URI that specifies the relationship from the entity described in the record to the entity referenced in the field. A source of relationship codes is: [MARC Code List for Relators](#).

\$6 - Linkage

See description of this subfield in Appendix A: [Control Subfields](#).

\$7 - Data provenance

See description of this subfield in Appendix J: [Data Provenance Subfields](#).

\$8 - Field link and sequence number

See description of this subfield in Appendix A: [Control Subfields](#).

INPUT CONVENTIONS

Ambiguous Headings - See [Appendix E](#).

Punctuation - Field 650 ends with a mark of punctuation or a closing parenthesis. If the final subfields are subfield \$2 or \$3, the mark of punctuation precedes those subfields.

650 17\$aCareer Exploration.**\$2**ericd

650 #0\$aBallads, English**\$z**Hudson River Valley (N.Y. and N.J.)

Main term portion followed by a subject subdivision does not end with a mark of punctuation unless the main term portion ends with an abbreviation, initial/letter, or open date.

650 #0\$aRain and rainfall**\$z**Washington (State)**\$z**Seattle**\$v**Maps.

Spacing - No spaces are used in initialisms, acronyms, or abbreviations.

650 #0\$aMARC formats.

650 #0\$aC.O.D. shipments.

Display Constant

- *[dash associated with the content of subfield \$v, \$x, \$y, or \$z]*

Dash (-) that precedes a subject subdivision in an extended subject heading is not carried in the machine-readable record. It may be system generated as a display constant associated with the content of subfield \$v, \$x, \$y, and \$z.

Content designated field :

650 #0\$aNuclear energy**\$x**History.

Display example:

Nuclear energy-History.

Initial Article - Initial articles (e.g., The) occurring at the beginning of topical subject added entry fields are usually omitted in most languages (except when the intent is to file on the article).

Any diacritics and/or special characters occurring at the beginning of fields are retained. Note that such characters are usually ignored for purposes of sorting and filing.

CONTENT DESIGNATOR HISTORY

\$b - Topical term following geographic name as entry element [OBSOLETE, 1981]

Subfield was restored for use in retrospective record conversion in 1987.

\$g - Miscellaneous information [NEW, 2014]

\$0 - Authority record control number [NEW, 2007]

\$0 - Authority record control number [REDEFINED, 2010]

\$1 - Real World Object URI [NEW, 2017]

\$4 - Relator code [NEW, 2005]

\$4 - Relator code [RENAMED, 2017] [REDESCRIBED, 2017]

Subfield \$4 was renamed and redescribed to allow for the recording of relationship URIs in addition to MARC and non-MARC codes.

FIELD DEFINITION AND SCOPE

Classification or call number that is taken from *Library of Congress Classification* or *LC Classification Additions and Changes*. The brackets that customarily surround alternate class/call numbers are not carried in the MARC record; they may be generated based on the presence of repeated \$a subfields.

Second indicator values distinguish between content actually assigned by the Library of Congress and content assigned by an organization other than LC.

Note that only subfield \$u is locally defined. The entire field description is repeated here for ease of use of this document.

GUIDELINES FOR APPLYING CONTENT DESIGNATORS

■ INDICATORS

First Indicator - Existence in LC collection

Whether or not the item is contained in the LC collections.

- No information provided

Used for all call numbers assigned by agencies other than the Library of Congress.

050 #4\$aNB933.F44\$bT6

0 - Item is in LC

Item is in the LC collections under the call number given in the field.

Other agencies should use this value when transcribing from LC cataloging copy on which the call number is neither enclosed within brackets nor preceded by a Maltese cross.

050 00\$aZ695.7\$b.B37 1980

1 - Item is not in LC

Item is not in the LC collections, or that it is not shelved under that number.

Used by other agencies when transcribing from LC copy on which the call number appears in brackets or is preceded by a Maltese cross. Brackets that customarily surround call numbers for items not in LC are not carried in the MARC record; they may be generated for display.

050 10\$aBJ1533.C4\$bL49

Second Indicator - Source of call number

Whether the source of the class/call number is the Library of Congress or another organization.

0 - Assigned by LC

Used when an institution is transcribing from LC cataloging copy.

050 00\$aJK609\$b.M2

4 - Assigned by agency other than LC**■ SUBFIELD CODES****\$a - Classification number**

Classification number portion of the call number. The source of the classification number is *Library of Congress Classification* and the *LC Classification-Additions and Changes*. Subfield \$a is repeated to record an alternative class number. The alternate class number is recorded following the last subfield of the call number. If the alternate class number also includes an item number, the item number is included in the same subfield \$a as the alternate class number; it is not separately subfielded.

050 00\$aQC861.2\$b.B36

050 00\$aRC951

\$b - Item number

Item number portion of the call number. An item number is the Cutter, date, term, etc. that is added to a classification number to distinguish an item from any other item assigned the same classification number.

Organizations that use the *Cutter-Sanborn Three-Figure Author Table* may conform to Library of Congress item number practice by applying *Subject Cataloging Manual: Shelflisting conventions*.

\$0 - Authority record control number or standard number

See description of this subfield in Appendix A: [Control Subfields](#).

\$1 - Real World Object URI

See description of this subfield in Appendix A: [Control Subfields](#).

\$3 - Materials specified

Part of the described material to which the field applies. The subfield is used with archival-type materials; its use is parallel with the use of subfield \$3 in other fields.

\$6 - Linkage

See description of this subfield in Appendix A: [Control Subfields](#).

\$8 - Field link and sequence number

See description of this subfield in Appendix A: [Control Subfields](#).

INPUT CONVENTIONS

LCCNs - When the call number field consists only of a class number (letters followed by numbers, possibly including a period and also a space), no subfield \$b is used.

050 00\$aQA37

050 00\$aE525.5 123d

General rule is that the item number part of the call number begins at the last capital letter in the call number or the period, if present, preceding it.

050 00\$aHF5549.5.R44\$bM35

Exceptions to the general rule for item numbers:

If the call number is followed by only a date, with no Cutter number, the date is contained in subfield \$b.

050 00\$aE457.92\$b1967

If the call number is followed by volume numbering that includes uppercase letters, these letters are ignored in locating the last capital letter.

050 00\$aJX1977\$b.A2 St/ESA/35

050 00\$aHA1501\$bA, Nr. 615

050 00\$aHD28\$b.Y555 vol. 55 Suppl.

If the call number begins with CS71, subfield \$b contains the date.

050 00\$aCS71.C323\$b1977

If the call number is for a classification schedule (i.e., it is a call number beginning with Z696.U5), the class letter(s) for the particular classification and any following digit(s) are recorded in subfield \$a (as part of the classification). Subfield \$b contains the date.

050 00\$aZ696.U5E3\$b1958

050 00\$aZ696.U5H-HJ\$b1981

Abbreviations *subser.* and *Suppl.* are recorded in subfield \$b, even when there is no item number.

Capitalization - Alphabetic characters in the classification number portion of the field are generally uppercase.

Spacing - Any spaces that are desired as part of the call number must be input.

050 00\$aDK274.3 1968\$b.K39

050 00\$aVM341\$b.M9 vol. 48

050 00\$aCS71.C323\$b1977

Display Constant

[...] *[brackets]*

Brackets that customarily surround call numbers for items not in LC or alternate class/call numbers are not carried in the MARC record. They may be system generated as a display constant associated with the first indicator value 1 or additional \$a subfields.

CONTENT DESIGNATOR HISTORY

Indicator 1 - Existence in LC collection

- *No information provided*

Prior to the definition of code 4 in the second indicator position in 1982, the first indicator in the visual materials specifications was undefined. Visual materials records created prior to 1982 may contain a # meaning *undefined* in the first indicator position.

Indicator 2 - Series call number (SE) [OBSOLETE]

In the serials specifications, the use of the second indicator position to indicate the type of series was made obsolete in 1976. The values were: 0 (No series involved), 1 (Main series), 2 (Subseries), 3 (Sub-subseries).

Indicator 2 - Source of call number

- *No information provided [OBSOLETE]*

Second indicator was defined in 1982. Prior to that change, 050 was an agency-assigned field and contained only call numbers assigned by the Library of Congress. LC records created before the definition of this indicator may contain a blank (#) meaning *undefined* in this position.

\$d - Supplementary class number (MU) [OBSOLETE, 1981]

\$0 - Authority record control number or standard number [NEW, 2017]

\$1 - Real World Object URI [NEW, 2017]

Indicators and Subfield Codes

This field has no indicators or subfield codes.

FIELD DEFINITION AND SCOPE

Sixteen characters that indicate the date and time of the latest record transaction and serve as a version identifier for the record. They are recorded according to *Representation of Dates and Times* (ISO 8601). The date requires 8 numeric characters in the pattern *yyyymmdd*. The time requires 8 numeric characters in the pattern *hhmmss.f*, expressed in terms of the 24-hour (00-23) clock.

Date characters *yyyymmdd* include 4 for the year, 2 for the month, and 2 for the day.

Time characters *hhmmss.f* include 2 for the hour, 2 for the minute, 2 for the second, and 2 for a decimal fraction of the second, including the decimal point. The 24-hour clock (00-23) is used.

The date on which a record is first entered into machine-readable form is contained in field 008/00-05. The Date entered on file never changes.
