This is a collection of example Squid Configurations intended to demonstrate the flexibility of Squid.

Warning: Any example presented here is provided "as-is" with no support or guarantee of suitability. If you have any further questions about these examples please email the squid-users mailing list.

Contents

1. Online Manuals
2. Current configuration examples
 1. Authentication
 2. Interception
 3. Content Adaptation features
 4. Caching
 5. Captive Portal features
 6. Reverse Proxy (Acceleration)
 7. Instant Messaging / Chat Program filtering
 8. Multimedia and Data Stream filtering
 9. Torrent Filtering
 10. SMP (Symmetric Multiprocessing) configurations
 11. High Performance service
 12. General
 13. Strange and Weird configurations
3. External configuration examples
4. Create new configuration example

Online Manuals

We now provide an the Authoritative Configuration Manual for each version of squid. These manuals are built daily and directly from the squid source code to provide the most up to date information on squid options.

For Squid-3.1 the Manual is at <http://www.squid-cache.org/Versions/v3/3.1/cfgman/>

For Squid-3.2 the Manual is at <http://www.squid-cache.org/Versions/v3/3.2/cfgman/>

For Squid-3.3 the Manual is at <http://www.squid-cache.org/Versions/v3/3.3/cfgman/>

For Squid-3.4 the Manual is at <http://www.squid-cache.org/Versions/v3/3.4/cfgman/>

For Squid-3.5 the Manual is at <http://www.squid-cache.org/Versions/v3/3.5/cfgman/>

A combined Squid Manual can be found at <http://www.squid-cache.org/Doc/config/> with details on each option supported in Squid, and what differences can be encountered between major Squid releases.

11. [ConfigExamples/Chat/Trillian](#)
12. [ConfigExamples/Chat/Viber](#)
13. [ConfigExamples/Chat/Whatsapp](#)
14. [ConfigExamples/Chat/Wire](#)
15. [ConfigExamples/Chat/YahooMessenger](#)

Multimedia and Data Stream filtering

1. [ConfigExamples/Streams/Other](#)
2. [ConfigExamples/Streams/RealAudio](#)
3. [ConfigExamples/Streams/Vimeo](#)
4. [ConfigExamples/Streams/YouTube](#)

Torrent Filtering

 Torrent filtering is not simple task and can't be done using Squid's only. It uses arbitrary ports, protocols and transport. You must also use active network equipment and some experience.

ConfigExamples/TorrentFiltering

SMP (Symmetric Multiprocessing) configurations

 Squid SMP support is an ongoing series of improvements in Squid-3.2 and later. The configuration here may not be exactly up to date. Or may require you install a newer release.

1. ConfigExamples/SmpCarpCluster

High Performance service

1. ConfigExamples/ExtremeCarpFrontend

see also WCCP v2 overview for high-availability service.

General

1. ConfigExamples/BlockingMimeTypes
2. ConfigExamples/ChrootJail
3. ConfigExamples/ClusteringTproxySquid
4. ConfigExamples/CoinMiners
5. ConfigExamples/DynamicContent
6. ConfigExamples/DynamicContent/Coordinator
7. ConfigExamples/FullyTransparentWithTPROXY
8. ConfigExamples/MultiCpuSystem
9. ConfigExamples/MultiplePortsWithWccp2
10. ConfigExamples/NatAndWccp2
11. ConfigExamples/PhpRedirectors
12. ConfigExamples/SquidAndWccp2
13. ConfigExamples/UbuntuTproxy4Wccp2
14. ConfigExamples/Wccp2AndNat
15. ConfigExamples/WebwasherChained

Strange and Weird configurations

This is a section for weird (and sometimes wonderful) configurations Squid is capable of. Clued in admin often find no actual useful benefits from going to this much trouble, but well, people seems to occasionally ask for them...

1. ConfigExamples/Strange/BlockingTLD
2. ConfigExamples/Strange/RotatingIPs
3. ConfigExamples/Strange/TorifiedSquid
