Microsoft® **Exchange** **Server**

Enterprise Edition

The Microsoft BackOffice Family of Server Applications

Microsoft® BackOffice® is the most comprehensive and integrated family of easy, yet powerful server applications. Designed for the Windows NT® Server platform, they work together or independently and can operate with your existing systems. The Microsoft BackOffice family combines Internet/intranet functionality with standard client/server technology to offer the best computing solutions while reducing overall cost of ownership.

Microsoft Windows NT Server

The easiest network operating system for your most demanding business needs. Includes Microsoft Internet Information Server, the powerful Web server.

Third-party server applications

A broad selection of third-party server applications offers unique services to help solve your business needs.

Microsoft SQL Server™

A scalable, high-performance client/server database management system that supports high-volume transaction processing and decision support applications in distributed environments.

Microsoft Proxy Server

The easy, cost-effective way to extend secure Internet access to every desktop in an organization.

Microsoft Systems Management Server

A powerful application that makes it easy to inventory PC hardware and software, deliver new software, and manage and troubleshoot entire PC networks from a central location.

Microsoft SNA Server

A standards-based server that provides PC users with reliable access to host systems—from AS/400 machines to large mainframes.

Microsoft Site Server

A server that provides a comprehensive Web site environment for enhancing, deploying, and managing rich intranet and Internet Web sites.

Microsoft Exchange Server

The most comprehensive platform for business-critical messaging and rich collaboration across the organization and the Internet.

The Basis for Business-Critical Messaging: Get unlimited storage capacity, full SMP support, high performance, and proven reliability—without system downtime.

The Leader in Openness and Interoperability: An architecture built on Internet standards and extensive interoperability with other messaging systems makes it easy to share information.

The Foundation for Collaboration: Enable the widest range of solutions—from real-time collaboration to BackOffice integration.

The Best Choice for Easy Administration: Integrated diagnostics, remote management, and flexible directory support add up to today's lowest-cost client/server messaging solution.

Microsoft Exchange Server	Microsoft Exchange Server Enterprise Edition
- Exchange Connector - Notes Connector - Internet Mail Service - Internet News Service - Microsoft Visual InterDev™	Includes all the features of Microsoft Exchange Server, plus: - Unlimited storage - Microsoft Cluster Server support - PROFS/SNADS Connectors - X.400 Connector

You must accept the enclosed License Agreements before you can use this product. If you do not accept the terms of the License Agreements, you should promptly return the product for a refund.

System requirements

- Server
- For Intel and compatible systems:
 - System with a Pentium 60 or faster processor; Pentium 133 recommended
 - 64 MB of RAM
 - 250 MB of available hard-disk space; 500 MB recommended
 - For RISC-based systems:
 - System with an Alpha 4/275 processor; Alpha 5/500 recommended
 - 64 MB of RAM
 - 300 MB of available hard-disk space; 500 MB recommended
 - Microsoft Windows NT Server version 4.0 and Windows NT Server 4.0 Service Pack 3*
 - CD-ROM drive

Actual requirements will vary based on features you choose to install and on your system configuration. System requirements for Windows NT-based programs may exceed system requirements described above.

For a complete list of client system requirements, visit the Microsoft Outlook™ World Wide Web site at <http://www.microsoft.com/outlook/>

- * Windows NT Server, Enterprise Edition, version 4.0 is required to enable Microsoft Cluster Server, support for more-than-four-processors SMP systems, and support for greater than 2 GB RAM.

END-USER LICENSE AGREEMENT FOR MICROSOFT SOFTWARE

SERVER LICENSE FOR MICROSOFT SERVER PRODUCTS

IMPORTANT—READ CAREFULLY: This Microsoft End-User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) and Microsoft Corporation for the Microsoft software product identified above, which includes computer software and may include associated media, printed materials, and "online" or electronic documentation ("SOFTWARE PRODUCT"). By installing, copying, or otherwise using the SOFTWARE PRODUCT, you agree to be bound by the terms of this EULA. If you do not agree to the terms of this EULA, do not install or use the SOFTWARE PRODUCT; you may, however, return it to your place of purchase for a full refund.

MICROSOFT SOFTWARE LICENSE

The SOFTWARE PRODUCT contains some or all of the following types of software: "Server Software" that is installed and provides services on a computer acting as a server ("Server"); "Connector Software" that enables a computer running Microsoft Exchange Server to communicate with other Servers running Microsoft Exchange Server or other electronic mail server software; and "Client Software" that allows a computer, workstation, handheld PC, pager, "smart phone," or other digital electronic device to access or utilize the services provided by the Server Software. Note: An amendment or addendum to this EULA may accompany certain components of the SOFTWARE PRODUCT.

Additional software components may have been distributed to you along with the SOFTWARE PRODUCT. Except as otherwise specifically referenced below, such additional software components are not subject to this EULA, but are covered by a separate End-User License Agreement provided with each component.

The SOFTWARE PRODUCT is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The SOFTWARE PRODUCT is licensed, not sold.

1. GRANT OF LICENSE. This EULA grants you the following rights:

- a. **Installation**—The CD-ROM or floppy disk(s) on which the Server Software and the Connector Software reside may contain several copies of the Server Software and the Connector Software, each of which is compatible with a different microprocessor architecture (such as the x86 architecture or various RISC architectures). You may install the Server Software and the Connector Software for use with only one of those architectures at any given time. **Server Software.** You may install **one** copy of the Server Software on a single computer (the computer running the Server Software shall be referred to as the "Server"). **Connector Software.** You may install **one** copy of the Connector Software on one Server running Microsoft Exchange Server. If you choose to make the Connector Software a usable feature on a Microsoft Exchange Server, you must also acquire a separate license or licenses (whether as part of the license for Microsoft Exchange Server or as a separate license for the Connector Software) to install and/or use the Connector Software on every other Microsoft Exchange Server in the same "Microsoft Exchange Organization." A "Microsoft Exchange Organization" is the group of all Microsoft Exchange Servers with the same organization name specified during the Microsoft Exchange Server installation process for the express purpose of connecting the servers. **Client Software.** You may install the Client Software on any computer, workstation, or other digital electronic device.
- b. **Use of the Server Software**—You may use **one** copy of the Server Software on **one** Server, which may be connected at any point in time to an unlimited number of workstations or computers operating on one or more networks. **You must acquire a separate Client Access License to access or otherwise utilize the services of the Server Software installed on a Server, whether you use the Client Software or any other software to do so,** unless otherwise noted in Paragraph d below. Each Client Access License must be dedicated to one unique computer or workstation. It permits that computer or workstation to access or utilize the services of the Server Software. This is known as using the Server Software in "Per Seat Mode." However, you may elect to use the Server Software for Microsoft SQL Server, Windows NT Server, or SNA Server (but not Microsoft Exchange Server or Systems Management Server) in "Per Server Mode" as defined below. If you choose Per Seat Mode, your choice is permanent. If you initially choose Per Server Mode, you have the right to change **one time only** to Per Seat Mode, as long as you acquire a Client Access License for each unique workstation or computer accessing or utilizing the services of the Server Software.

CLIENT ACCESS LICENSE FOR MICROSOFT EXCHANGE
SERVER VERSION 5.5 NFR
LICENSES: 10

MICROSOFT LICENSE AGREEMENT

CLIENT ACCESS LICENSE FOR MICROSOFT SERVER PRODUCTS

IMPORTANT—READ CAREFULLY BEFORE ACCESSING MICROSOFT SERVER SOFTWARE: By accessing or otherwise utilizing the services of the Microsoft server software listed above ("Server Software"), you agree to be bound by the terms of this license agreement ("Client Access License"). If you do not agree to the terms of this Client Access License, promptly return this package to the place from which you obtained it for a full refund.

MICROSOFT SOFTWARE LICENSE

1. GRANT OF LICENSE.

- a. Overview of the Use of the Client Access License.** This Client Access License describes your rights to access or otherwise utilize the services of the Server Software or other server software as may be noted in Section 2 of the Server License for Microsoft Server Products. The services of the Server Software are considered to be accessed or utilized when there is a direct or indirect connection between a computer or workstation, handheld PC, pager, "smart phone," or other digital electronic device and the Server Software running on a computer. This Client Access License must be dedicated to one unique computer, workstation, or other digital electronic device. It permits that computer, workstation, or other digital electronic device to access or otherwise utilize the services of the Server Software licensed by you. This is known as using the Server Software in "Per Seat Mode." However, you may elect to use the Server Software for Microsoft SQL Server, Windows NT Server, or SNA Server (but not Microsoft Exchange Server or Systems Management Server) in "Per Server Mode," as defined below. If you choose Per Seat Mode, your choice is permanent. If you initially choose Per Server Mode, you have the right to change *one time only* to Per Seat Mode, as long as you acquire a Client Access License for each unique workstation, computer, or other digital electronic device accessing or otherwise utilizing the services of the Server Software licensed by you. This Client Access License, however, does not entitle you to access any Server Software when it is a component of Microsoft BackOffice Small Business Server.
- b. Alternate Terms if you elect to use the Client Access Licenses for Microsoft SQL Server, Windows NT Server, or SNA Server in the Per Server Mode.** In Per Server Mode, you must acquire, and designate for exclusive use, the number of Client Access Licenses equal to the maximum number of computers, workstations, or other digital electronic devices that will access or otherwise utilize the services of that Server Software licensed by you at any given point in time. If you elect to change from Per Server Mode to Per Seat Mode, you may transfer any Client Access Licenses you acquired for use in Per Server Mode to an equal number of workstations, computers, or other digital electronic devices for use in Per Seat Mode.
- c. Note Regarding the use of the Client Access License for Microsoft BackOffice.** The Client Access License for Microsoft BackOffice may only be used in the Per Seat Mode. Each Client Access License in the Per Seat Mode entitles you to access or utilize the services of any computer running any Server Software component of the Microsoft BackOffice product suite (not including any component upgrades thereto, unless otherwise permitted below), whether licensed as part of the BackOffice product suite or acquired separately. If you upgrade a component of the Microsoft BackOffice product suite to an Enterprise Edition of such component with the same or lower version number as the component being upgraded, the Microsoft BackOffice Client Access License that you acquired to access the component being upgraded (to the extent applicable) entitles you to access such Enterprise Edition, whether licensed as an upgrade to the Microsoft BackOffice product suite or acquired separately. A Client Access License for Microsoft BackOffice product suite, however, does not entitle you to access any Microsoft BackOffice Small Business Server.
- d. Note Regarding Use of the Client Access License for Microsoft Exchange Server on a Digital Electronic Device.** If you have acquired a Client Access License for Microsoft Exchange Server for your computer and/or workstation, you may also use that same Client Access License for any other digital electronic device that you use less than twenty percent (20%) of the your total connection time. The term "total connection time" in the previous sentence means the total amount of time that you use Microsoft client software (other than the client software component of the Microsoft Exchange Server chat service) to access and otherwise use Microsoft Exchange Server and/or the services of any other electronic mail server software from a computer, workstation, and other digital electronic device.

(Continued)

Microsoft®

END-USER LICENSE AGREEMENT FOR MICROSOFT SOFTWARE

IMPORTANT—READ CAREFULLY: This Microsoft End-User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) and Microsoft Corporation for the Microsoft software product identified above, which includes computer software and may include associated media, printed materials, and "online" or electronic documentation ("SOFTWARE PRODUCT"). The SOFTWARE PRODUCT also includes any updates and supplements to the original SOFTWARE PRODUCT provided to you by Microsoft. Any software provided along with the SOFTWARE PRODUCT that is associated with a separate end-user license agreement is licensed to you under the terms of that license agreement. By installing, copying, downloading, accessing or otherwise using the SOFTWARE PRODUCT, you agree to be bound by the terms of this EULA. If you do not agree to the terms of this EULA, do not install or use the SOFTWARE PRODUCT; you may, however, return it to your place of purchase for a full refund.

SOFTWARE PRODUCT LICENSE

The SOFTWARE PRODUCT is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The SOFTWARE PRODUCT is licensed, not sold.

1. **GRANT OF LICENSE.** This EULA grants you the following rights:

- **Applications Software.** You may install, use, access, display, run, or otherwise interact with ("RUN") one copy of the SOFTWARE PRODUCT, or any prior version for the same operating system, on a single computer, workstation, terminal, handheld PC, pager, "smart phone," or other digital electronic device ("COMPUTER"). The primary user of the COMPUTER on which the SOFTWARE PRODUCT is installed may make a second copy for his or her exclusive use on a portable computer.
- **Storage/Network Use.** You may also store or install a copy of the SOFTWARE PRODUCT on a storage device, such as a network server, used only to RUN the SOFTWARE PRODUCT on your other COMPUTERS over an internal network; however, you must acquire and dedicate a license for each separate COMPUTER on which the SOFTWARE PRODUCT is RUN from the storage device. A license for the SOFTWARE PRODUCT may not be shared or used concurrently on different COMPUTERS.
- **License Pack.** If this package is a Microsoft License Pack, you may RUN additional copies of the computer software portion of the SOFTWARE PRODUCT up to the number of copies specified above as "Licensed Copies." You are also entitled to make a corresponding number of secondary copies for portable computer use as specified above.
- **Reservation of Rights.** All rights not expressly granted are reserved by Microsoft.

2. **DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS.**

- **Academic Edition Software.** If the SOFTWARE PRODUCT is identified as "Academic Edition" or "AE," you must be a "Qualified Educational User" to use the SOFTWARE PRODUCT. If you are not a Qualified Educational User, you have no rights under this EULA. To determine whether you are a Qualified Educational User, please contact the Microsoft Sales Information Center/One Microsoft Way/Redmond, WA 98052-6399 or the Microsoft subsidiary serving your country.
- **Not for Resale Software.** If the SOFTWARE PRODUCT is labeled "Not For Resale" or "NFR," then, notwithstanding other sections of this EULA, your use of the SOFTWARE PRODUCT is limited to use for demonstration, test, or evaluation purposes and you may not resell, or otherwise transfer for value, the SOFTWARE PRODUCT.
- **Limitations on Reverse Engineering, Decompilation, and Disassembly.** You may not reverse engineer, decompile, or disassemble the SOFTWARE PRODUCT, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation.
