

Innovation

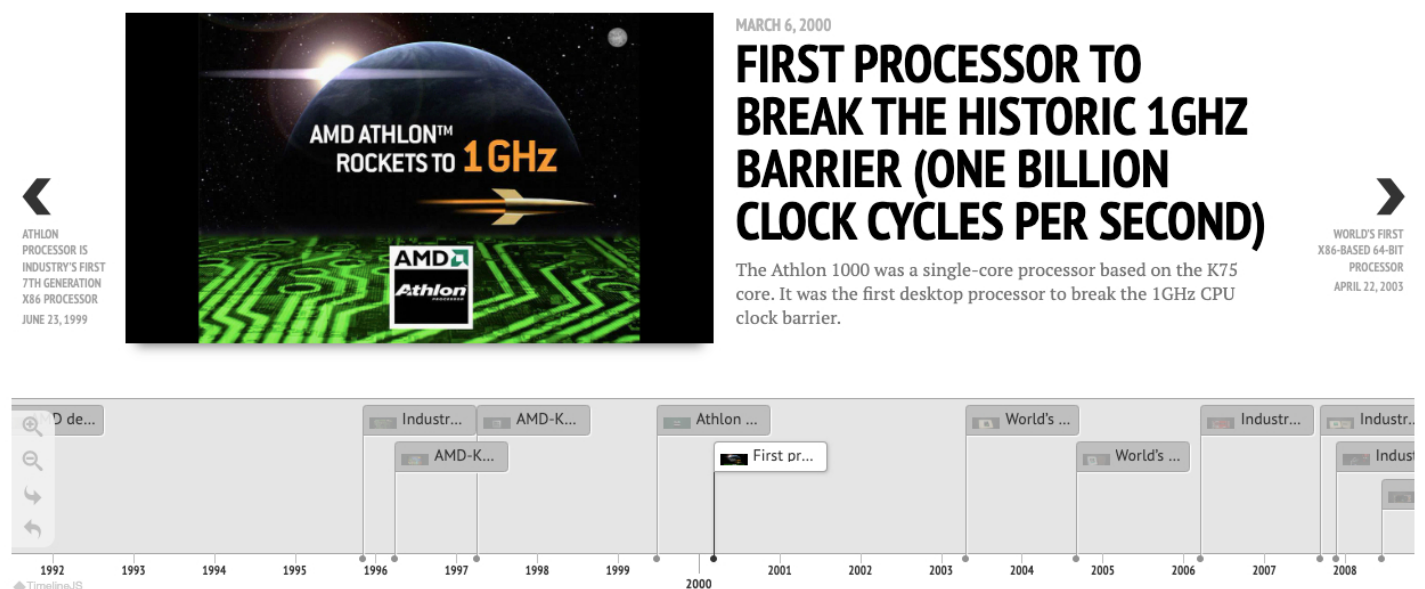

Technology changes the world, but not on its own.

When processing power meets brain power, the future comes alive.

[LEARN MORE](#)

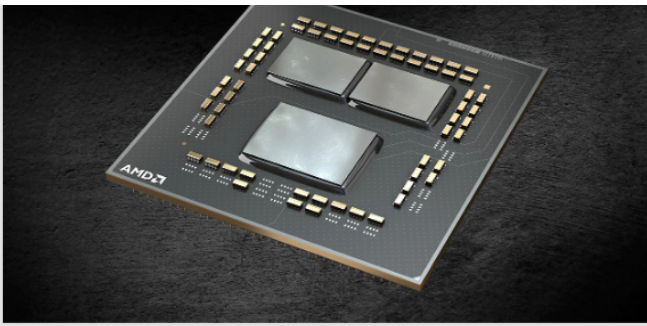

At AMD, we build high-performance computing and graphics technologies that are helping solve some of the world's toughest challenges by enabling its researchers, creators, inventors, and explorers.

AMD Innovation Timeline

AMD Technologies

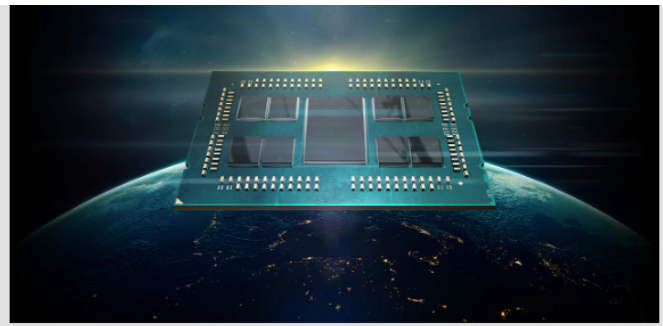

AMD is the only company in the world with both high-performance compute and high-performance graphics technology and the expertise to combine them into custom solutions. We're leading the way with powerful architectures based on the latest process technology.

“Zen 3” x86 Core Architecture

The “Zen 3” core architecture delivers a ~19% increase in instructions-per-clock¹⁰, the largest generational increase since AMD introduced the first “Zen” architecture in 2017. It enables leadership single-thread, multi-thread, and gaming performance in the AMD Ryzen™ 5000 Series CPUs. AMD will bring the power of “Zen 3” to the data center market with the upcoming 3rd Gen AMD EPYC™ CPUs in early 2021.

[LEARN MORE](#)

“Zen 2” x86 Core Architecture

The “Zen 2” core architecture for servers, laptops, and desktops leverages a modular design methodology, leading-edge 7nm process technology, and 2nd generation AMD Infinity Architecture to deliver powerful, efficient performance. The result? More CPU cores at the same power, and more cost-effective manufacturing than traditional monolithic chip designs.

AMD RDNA™ + AMD RDNA™ 2 Graphics Architectures

The AMD RDNA architecture is designed to drive the future of PC, console, mobile, and cloud-based gaming with superior performance, scalability, and power efficiency. The latest AMD RDNA 2 architecture, powering the [AMD Radeon RX 6000 Series](#), delivers up to 2X higher performance¹¹ and up to 54% higher performance-per-watt¹².

[LEARN MORE](#)

AMD CDNA™

AMD Compute DNA (AMD CDNA) architecture is designed to accelerate data center compute workloads and deliver power efficiency, enterprise features and scalability. The AMD CDNA architecture delivers exceptional performance and power efficiency in the [AMD Instinct™ MI100 accelerator](#).

[LEARN MORE](#)

AMD Infinity Architecture

AMD Infinity Architecture is the scalable interconnect for AMD CPUs and GPUs that delivers multi-processor performance, efficiency, and scalability.

AMD Ventures

AMD Ventures is looking for innovative software and application companies who strategically align with our technologies and serve large and growing markets across high-performance client, server and embedded.

[LEARN MORE](#)

AMD Research

AMD performs leading-edge research and provides technology direction critical to our company's future. Our goal is to influence both industry and academia through exploration of important research directions and future technologies.

[LEARN MORE](#)

Case Studies

AMD is a company that dares to imagine a better world and takes inspiration from our customers to deliver innovative solutions to the challenges and possibilities of our digital age. We don't create technology for technology's sake, we innovate for you and what you can achieve.
