

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

LG ELECTRONICS INC.,
Petitioner,

v.

JAWBONE INNOVATIONS, LLC,
Patent Owner.

IPR2023-01110
U.S. Patent No. 7,246,058

**PETITIONER’S REPLY ON PETITIONER’S
MOTION FOR JOINDER TO AND CONSOLIDATION
WITH RELATED *Inter Partes* REVIEW IPR2023-00222**

Petitioner filed its Motion for Joinder to and Consolidation with Related *Inter Partes* Review IPR2023-00222 (“the Amazon IPR”) concurrently with a petition for *inter partes* review of the ’058 patent based on the same prior-art references and arguments presented in the Amazon IPR. (Paper 2). On May 24, 2023, the Board instituted the Amazon IPR, finding a reasonable likelihood that *every* challenged claim is unpatentable based on the grounds presented in Amazon’s petition. *Amazon.com, Inc. v. Jawbone Innovations, LLC*, IPR2023-00222, Paper 7, 50, 72 (claim 1), 51, 72 (claim 2), 59 (claim 42), 52 (claims 3-5), 56 (claim 3), 73 (claims 4 and 5) (P.T.A.B May 24, 2023).

Should the Amazon IPR be terminated, Petitioner’s joinder motion should be denied as moot. Because Petitioner timely filed its petition and was not estopped from requesting IPR of the ’058 patent, the Board should proceed to the merits of the Petition. Moreover, because the Petition presents the same grounds as in the previously-instituted Amazon IPR, the Board has already determined that Petitioner’s Petition meets the standard for institution, i.e., Petitioner’s grounds establish a reasonable likelihood that at least one challenged claim is invalid. Indeed, the Board has already found a reasonable likelihood that *every* challenged claim is invalid in view of the grounds in the Petition. Accordingly, the Board should institute this IPR for the same reasons the Board instituted review in the Amazon IPR.

Respectfully submitted,

WILLKIE FARR & GALLAGHER LLP
