UNITED STATES PATENT OFFICE

93,956

DESIGN FOR A TABLE-FORK OR SIMILAR ARTICLE

George Scott Wilson, Edinburgh, Scotland

Application May 1, 1934, Serial No. 51,616

Term of patent 14 years

To all whom it may concern:

Be it known that I, GEORGE SCOTT WILSON, a subject of the King of Great Britain, of 2, Ettrick Road, Edinburgh, Scotland, have invented a new, original, and ornamental Design for a Table-Fork or Similar Article, of which the following is a specification, reference being had to the accompanying drawing forming part thereof.

Figure 1 is a front view of the table-fork;

Figure 2 is a rear view;

Figure 3 is a side elevation showing an approximately central vertical section of the bowl portion of the table-fork;

Figure 4 is a transverse section of the bowl portion on line 4—4 of Figure 1.

Figure 5 is a transverse section of said bowl section on line 5—5 of Figure 1, while

Figure 6 is also a transverse section of said bowl portion on line 6—6 of Figure 1.

The dominant features of my design reside in the forward portion of the bowl portion thereof, which is flattened exteriorly where it extends rearwardly from the tines and correspondingly flattened upon the interior face, while the remaining or inward half of the bowl is exteriorly convex and interiorly concave similar to the bowl of a spoon. The bowl portion as a whole is of the greatest thickness along its longitudinal edges while the sides taper to said edges which are relatively sharp.

I claim:

The ornamental design for a table-fork or similar article substantially as shown and described.

GEORGE SCOTT WILSON.
