ENCLOSED APPLICATION PARTS (check all that apply)

☐ Application Data Sheet. See 37 CFR 1.76	☐ CD(s), Number of CDs _____
☐ Drawing(s) Number of Sheets _____	☐ Other (specify) _____
☒ Specification (e.g. description of the invention) Number of Pages <u>6</u>	

Fees Due: Filing Fee of \$210 (\$105 for small entity). If the specification and drawings exceed 100 sheets of paper, an application size fee is also due, which is \$260 (\$130 for small entity) for each additional 50 sheets or fraction thereof. See 35 U.S.C. 41(a)(1)(G) and 37 CFR 1.16(s).

METHOD OF PAYMENT OF THE FILING FEE AND APPLICATION SIZE FEE FOR THIS PROVISIONAL APPLICATION FOR PATENT

☒ Applicant claims small entity status. See 37 CFR 1.27.	105
☐ A check or money order is enclosed to cover the filing fee and application size fee (if applicable).	
☐ Payment by credit card. Form PTO-2038 is attached	
☐ The Director is hereby authorized to charge the filing fee and application size fee (if applicable) or credit any overpayment to Deposit Account Number: _____ A duplicative copy of this form is enclosed for fee processing.	

TOTAL FEE AMOUNT (\$)

USE ONLY FOR FILING A PROVISIONAL APPLICATION FOR PATENT

This collection of information is required by 37 CFR 1.51. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

PROVISIONAL APPLICATION COVER SHEET

PTO/SB/16 (10-07)

Approved for use through 06/30/2010. OMB 0651-0032

U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

The invention was made by an agency of the United States Government or under a contract with an agency of the United States Government.

No.

Yes, the name of the U.S. Government agency and the Government contract number are: _____

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

PRIORITY CLAIM

This application incorporates by reference U.S. Provisional Application No. 60/886,269 filed January 23, 2007; U.S. Provisional Application No. 60/969,905 filed September 4, 2007; U.S. Provisional Application No. 60/977,870 filed October 5, 2007. All of the foregoing applications are hereby incorporated by reference in their entirety as if fully set forth herein.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

[0001] A method and system for location based identification is disclosed herein. A system for location based identification includes software that wirelessly communicates with an online registry (web-based database). A method for location based identification includes reviewing, updating, and/or defining the attributes of a static or immobile asset by its precise global position. Attributes include, but are not limited to, information, pictures, video, audio, and others.

BLACK LOWE & GRAHAM^{PLLC}

701 Fifth Avenue, Suite 4800
Seattle, Washington 98101
206.381.3300 • F: 206.381.3301

Exhibit 1011
Page 3 of 26

[0002] Location-based identification is advantageous for information management. A series of attributes of an asset are stored based on its global position location. In one embodiment, a web based database/registry allows the information to be accessed by multiple users. The users may view information on the database/registry, receive notifications, and change information in the database/registry. Large amounts of data can be stored with or without the use of position trackers. In one embodiment a user enters in position and therefore a transmitter is not preferable for stationary objects.

[0003] Currently, radio frequency identification "RFID" technology is not practical when trying to store attributes for buildings, parcels of land, and bodies of water. Recently, RFID has helped many companies streamline their supply chain, however RFID is used primarily in dynamic and mobile assets. Recently, RFID has extended its technology to static assets such as, but not limited to, bridges, hydrants, or buildings. In one embodiment, "RFID" companies may use Location Based Identification to define static assets without the use of an RFID transmitter or receiver. Each of those assets can be defined by its global position using Location Based Identification.

[0004] In one embodiment, RFID technology uses transmitters and receivers to update information about assets (including, but not limited to, a current location). Asset information is kept in a database. A receiver device is included, and is capable of scanning a specific transmitter tag to detail the specific attributes of that asset. In one embodiment, the RFID tag is used to define the asset it is attached to.

[0005] In one embodiment, location-based identification uses software for a mobile device. The mobile device receives its global position. The current position is then compared against a list of assets, the list of assets may be stored locally or on a web server. A user may further limit the list of assets by inputting search criterion. The device using software returns a list of nearby assets/property matching the current position and preferred criteria. Assets found that met the current location and the preferred criteria on the list may be selected by a

user to view the specific attributes for that asset/property. In an alternate embodiment, the list may be bypassed and a user may request to have only the closest asset matching a set of criteria displayed. The software includes, but is not limited to: storing, retrieving, updating, and managing assets/property in a web based database. The software further allows the database to be downloaded to a mobile device and locally cached, In an alternate embodiment, the mobile device may be wirelessly connected to the web based database. The software further allows the user of the mobile device to define preferences for receiving a particular set of assets.

[0006] In one embodiment, building and land assessors will use Location-Based Identification to review and update the attributes for a parcel of land, such as, but not limited to, previous tax assessment values, current value, or changes to property.

[0007] In one embodiment, water, gas, and electrical utilities will use Location-Based Identification to review, define, and update property attributes and extract contact information for billing.

[0008] In one embodiment, onsite services such as but not limited to installation, repair, or inspection will use Location Based Identification to review, define, and update property attributes and extract contact information for billing. Information, picture, audio, or video attributes may be added to detail deficiencies, unique occurrences, or to document work and conditions.

[0009] In one embodiment, real estate agents may use Location Based Identification to review and update a multiple listing service or information on a website such as “Zillow” information for specific properties as they near the property.

[0010] In one embodiment, sanitation collection companies may use Location Based Identification to determine properties for which they are emptying garbage cans. Further attributes may be updated about the properties, such as the number of garbage cans or

the weight of the garbage. Pictures also may be added to the attributes to show unique conditions.

[0011] In one embodiment, asset managers will be able to update relevant attributes either online through a web application or via a mobile device. Changes to attributes may be made individually, for a set of assets, or globally. An asset manager may enable an automatic setting, which changes an attribute: such as, but not limited to, changing an inspection status to overdue when its annual cycle is completed without an inspection. Further the mobile device shows attributes to an asset manager, for example one of the attributes for an asset is 'Inspection Due'.

[0012] In one embodiment, fire marshals, building officials, and other authorities may use Location Based Identification to detail the specific attributes of an asset. For example, a fire marshal will be able to see the most current attributes of fire hydrants in his area. Further available useful information regarding the asset would include, but not be limited to, distance and direction from a mobile device, useful attributes of the hydrant would show the available flow, the type of maintenance needed, the date of the last inspection, and a current inspection status.

[0013] In one embodiment, building officials and authorities can use Location Based Identification as they drive near properties to detail if annual inspections are overdue. The attribute, "inspection status" would return the value "overdue" which would trigger a response by the official and/or authorities.

[0014] In one embodiment, Location Based Identification will allow bodies of water to be divided up into parcels or geofenced areas and have attributes for that global position identified. This would be useful for identifying information regarding items such as protected waters, dangers, underwater or above water assets, shipping lanes, or underwater geography. The ability to identify a 'parcel' of water more easily allows for the sale or lease and taxation of the parcel. An owner can restrict fishing, mining, or travel into the parcel.

For example, as a user with a mobile device travels, the user would see available assets/information in the immediate area and the specific attributes for those defined positions.

[0015] In one embodiment, fishing businesses may use Location Based Identification to identify where their underwater assets are located. For example, a fish company may store attributes for the type of catch, equipment used, etc. This information would be accessible to a predetermined group of users, all of a company's boats or shared outside their company. With RFID, a fish can be tracked from where exactly it was caught to the packing container to the distribution center and to the customer.

[0016] In one embodiment, airplanes may use Location Based Identification to identify airspace they are flying in, property they are flying over, and if they have entered into another aircraft's flight path.

[0017] In one embodiment, tourist companies will use Location Based Identification to identify landmarks or points of interest on a user's mobile device.

[0018] In one embodiment, building owners will use Location Based Identification to identify their business to customers with mobile devices. For example, this could include storefront information or current sales.

[0019] In one embodiment, Emergency Notification Organizations will use Location Based Identification to identify a specific point or region where an emergency is present along with the attributes/details of the emergency.

[0020] In one embodiment, public entities such as cities, counties, and others can use Location Based Identification to identify attributes/information of the city.

[0021] In one embodiment, advertisers can use Location Based Identification to define specific areas and provide attributes/media for that particular region.

[0022] In one embodiment, game companies can use Location Based Identification to define specific global positions and provide attributes/information to a mobile device user on a particular game.

[0023] While the preferred embodiment of the invention has been illustrated and described, as noted above, many changes can be made without departing from the spirit and scope of the invention. Accordingly, the scope of the invention is not limited by the disclosure of the preferred embodiment.

Date Mailed: 12/11/2007

Receipt is acknowledged of this provisional patent application. It will not be examined for patentability and will become abandoned not later than twelve months after its filing date. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections**

Title

METHOD AND SYSTEM FOR LOCATION BASED IDENTIFICATION

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international

patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and

Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

NOTICE TO FILE MISSING PARTS OF PROVISIONAL APPLICATION

FILED UNDER 37 CFR 1.53(c)

Filing Date Granted

An application number and filing date have been accorded to this provisional application. The items indicated below, however, are missing. Applicant is given **TWO MONTHS** from the date of this Notice within which to file all required items and pay any fees required below to avoid abandonment. Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a).

- The statutory basic filing fee is missing.
Applicant must submit \$105 to complete the basic filing fee for a small entity.

The applicant needs to satisfy supplemental fees problems indicated below.

The required item(s) identified below must be timely submitted to avoid abandonment:

- To avoid abandonment, a surcharge (for late submission of filing fee or cover sheet) as set forth in 37 CFR 1.16(g) of \$25 for a small entity in compliance with 37 CFR 1.27, must be submitted with the missing items identified in this notice.

SUMMARY OF FEES DUE:

Total additional fee(s) required for this application is **\$130** for a small entity

- **\$105** Statutory basic filing fee.
- **\$25** Surcharge.

Replies should be mailed to:

Mail Stop Missing Parts
Commissioner for Patents
P.O. Box 1450
Alexandria VA 22313-1450

Registered users of EFS-Web may alternatively submit their reply to this notice via EFS-Web.

NOTE: Signatures of all the inventors or assignees of record of the entire interest or their representative(s) are required. Submit multiple forms if more than one signature is required, see below. ☒ Total of <u>1</u> forms are submitted.																											

This collection of information is required by 37 CFR 1.136(a). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 6 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Receipt is acknowledged of this provisional patent application. It will not be examined for patentability and will become abandoned not later than twelve months after its filing date. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections**

Title

METHOD AND SYSTEM FOR LOCATION BASED IDENTIFICATION

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international

patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and

Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
