ACS FIREHOUSE Software Home

You need a powerful records management system to manage critical information.

FIREHOUSE Software is the best fire records management software in the industry, backed by the best support. That explains why FIREHOUSE Software is the most widely used NFIRS 5.0 incident reporting software package, and more fire departments and EMS agencies depend on FIREHOUSE Software for their records management needs than any other software.

FIREHOUSE Software is designed to make records entry and records management as easy as possible for fire departments and EMS agencies of all sizes.
