

AFFIDAVIT OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.
2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.
3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.
4. The archived data made viewable and browsable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.
5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]` aka an "extended URL". Thus, the extended URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.
6. Attached hereto as Exhibit A are true and accurate copies of screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

7. I declare under penalty of perjury that the foregoing is true and correct.

CLAMPS Accessories

Hosecraft USA clamps used for hoses/fittings are shown in some detail below, and can be purchased online.

The clamps and fittings are also used as parts of finished hose assemblies that can be configured and purchased elsewhere on this site, through our Price & Purchase configurator feature.

WORM GEAR CLAMP - Stainless steel bands and hosing with plated and chromate dip screw.

Details >

T-BOLT CLAMP - T-bolt clamps are applied with a standard 7/16" socket wrench. 3/4" wide.

Details >

BAND CLAMP - Clamps are high carbon coated steel or stainless steel, and apply with band clamp tool. 7/8" to 7" ODs.

Details >

BAND CLAMP TOOL - Lightweight and allows for side entry with band clamps.

Details >

DOUBLE BOLT CLAMP - A rugged, iron clamp with dual gripping ridges. 3-1/2" to 13" outer diameters.

Details >

BRASS FERRULE - Applied with a crimp-on tool.

Details >

SPRIAL BOLT CLAMP - Used on hoses with a convoluted cover. 2" to 12" diameters.

Details >

CRIMP ON TOOL - Crimping tool to apply ferrules to hoses.

Details >

BRIDGE CLAMP - These apply a tight seal by providing a step over the raised helix of duct hoses.

Details >

LAP EXHAUST CLAMP - Connect interlock metal hoses to exhaust and other systems.

Details >

JURAT ATTACHMENT

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

STATE OF Texas }

COUNTY OF Tarrant }

The foregoing instrument was subscribed and sworn before me this date of
07/14/2023 by Nathaniel Frank-White

This notarial act was an online notarization.
