11-10-03 tasks.xls

Additions? cancellations? priorities?

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
1	Design and development														
2	1A)	Aduro to investigate reset line implementation.					Done								
3	1B)	Aduro to investigate implementation of Bitblitz change to local fault transmission instead of error code on 3421.													
4	2A)	Aduro to send to Downers Grove a 3411 based unit that was tested and worked at the customers site last year to Emcore to test for CRC errors.													
5	2B)	Emcore to test 3411 based units in the same manner the 3421 based units were tested.													
6	2C)	Aduro to investigate setpoints for 3411 and 3421 and determine if there should be differences.													
7	2D)	Emcore to send back a couple 3421 based unit to Aduro.													
8	2E)	Aduro to test jitter on 3421 based unit at different patterns then CJPAT.					Done								
9	2F)	Emcore determine what rev chip Downers Grove used to achieve error free transmission on the lila box.													
10	2G)	If BB2421 was used, Aduro compare setpoints to Aduro BB3411 setpoints for differences.													
11	File provisional patent														
12		Patent searches- prior art search													
13	Invent new demux with no filters														
14	E2O project														
15		Die pad mask													
16		Wirebond detail on lasers													
17		5v to tx board test													
18		test 850 xenpaks													
19		Xenpak enclosure details for Rapidfire													
20	Cost reduction plan														
21		reinvent osa board and connector													
22															
23	Marketing														
24	Change email addresses to aduro														
25	Aduro press release														
26	Update website with product literature														
27	Product brochures and PDF specifications														
28	Answer phone														
29	Shareholder approval														
30	Close E2O deal														
31	Revenue generation plan														
32		New products													
33		New services													
34															
35	Executive / Admin														
36	Clean out Blaze crap we don't need														
37	Acquisition / finance plan														
38	Finish lease of equipment														
39	Building lease														
40															
41	Production/ Operations														
42	Build new Tx test test fixture														
43	Rework Rx boards														
44	Organize labs														
45	Get new silver glue														
46	Order ablestick														
47	Setup inventory manangement														
48	Inventory count														
49	Continue existing builds														
50	Continue tests continue alignments														
51															
52															
53	Strengths														
54		Microbench platform building													
55		Optical design													
56		High speed test equipment and knowledge													
57	Weaknesses														
58		Glue only processes													
59		Hermeticity													
60		Supply chain													
61	opportunities														
62		LX4													
63		Could develop solder processing													
64		Could develop hermeticity													
65	Threats														
66		Cash flow													
67		Continued market delays
